 THE WEEKLY TIMES-HERALD.
 Published every Thursday and contains a summary of the week's news, throughout local and foreign.
 One year in advance, \$1.25
 Six months in advance, \$0.75
 Three months in advance, \$0.50
 Single copies, 10 cents.
 THURSDAY, NOVEMBER 12, 1914.

of course is mainly due to improvement in the credit situation. The demand for our wheat and cotton has been a very important factor. A number of our local industries are also being helped by the foreign demand for war material, which promises to increase for some time to come. Perhaps the most significant development is the more hopeful tone in the steel trade. It is true that production continues at low water mark, or considerably less than 50 per cent of capacity, and that prices are very low. Nevertheless, the improved conditions have imparted a decidedly more optimistic tone to steel manufacturers, most of whom appear to be convinced that depression of the industry has reached its limit. In the textile trades there has been for nearly a week a feeling of greater confidence. The impression has grown that values have about touched bottom and that consumption is really at a minimum. The woolen industry is much exercised by interference with its regular supplies of wool under war conditions, though on the other hand some manufacturers have succeeded in capturing large and profitable war contracts. In the agricultural sections, particularly in the wheat belt, there is no abatement of the hopeful feeling engendered by large crops. The south is naturally disappointed at the low prices of cotton, for which the big yield will only partly compensate. The resumption of the export trade, however, plus the efforts to finance the crop through co-operation has imparted very important relief. It looks as if at no distant date the cotton exchange would reopen.

A HELPFUL WORK.
 In its regular weekly letter to the press, newspapers of the state the North Dakota Development League Press Bureau announces the inauguration of a special agricultural service which should be very helpful. All editors of the state are invited to send to them, by bureau inquiries on any agricultural topic which is of special interest to them or their constituents, and on receipt of the inquiry the bureau editor will obtain expert advice on the subject, and will cause to be prepared for the use of the applicant an article covering the subject of interest.

TWO CONSPIRACIES.
 New York Times: The United States attorney general gives a clean bill of health to the cotton corner of unprecedented dimensions now being run under the auspices of the treasury. This happens by a curious coincidence, on the same day that damages are claimed as the result of a corner in oats a dozen years ago. The complaint in the oats case is that the operations of the conspirators were on a scale sufficient to control the price. That is the very object of the cotton pool under the distinguished auspices of the country's bankers and treasury officials. If a corner is a corner, and there's an end on't, then the operation of the cotton corner or pool is as much more flagrant than the oats operation as 5,000,000 bales of cotton is greater in value than 10,000,000 bushels of oats. If it is objectionable to make a fictitious price for horse feed, what shall be said of an attempt to raise the price of skirts and pajamas, and compel the heathen to shear an inch off their shirts?

DANGER TO BE AVOIDED.
 A medical journal calls attention to a danger against which owners of dogs should be on their guard, and his suggestion is pertinent in this season, where the use of the silo is becoming more and more common. The danger is that arising from the collection of carbonic acid gas from silage. Early last month four men from Ohio entered a silo by a side entrance near the top, jumping down a rope six feet from the doorway to fill the top of the contents. A little later they were found unconscious, and from one of them recovered. It was found that the six feet from the bottom of the doorway to the top of the silage was full of almost pure carbonic acid gas, in which no breath could be taken. This gas, being heavier than air, seeks the lowest level, and by its weight crowds out the oxygen.

WAR AND ALCOHOL.
 Of supreme importance in time of war is the efficiency of the men who are called to the front. Nothing that any government can do is left undone to make the soldiers more comfortable, more healthy, or better nourished, because the army whose men lack in any of these things is at a disadvantage. It is interesting and significant to note that out of the present war has come very emphatic recognition of the value of sobriety among the soldiers, and those who may become soldiers, and of the difficulty of securing sobriety when the sale of intoxicants is permitted. Germany has often been cited as a nation which exemplifies in the highest degree the value, or at any rate,

Use "Gets-It," Corns Shriveled, Vanish!
 It's the New Way, and You'll Forget You Ever Had Corns.
 "I drops put on in 2 seconds, corn shrivels, comes clean off!" That's the marvelous story of "GETS-IT," the new plan corn cure. Nothing can be simpler for the cure of corns—and it never fails. That's why millions of people are using their fussy plasters, sticky tape, co-salt-ing salves, and "wrapping outfits" that make a bundle around the toe and choke it into pain by pressing either on or around the corn. There is nothing to stick to your stocking, nothing to cause inflammation or rawness, nothing to press on or around the corn. You apply it in 2 seconds. No more knives, razors, cutters or files, with their blood-poison dangers. Try "GETS-IT" for that corn, callus, wart or bunion.
 "GETS-IT" is sold by druggists everywhere, 25c a bottle, or sent direct by H. Lawrence & Co., Chicago.

BETTER PROSPECTS.
 In its weekly review of finance and the Henry Clews says:
 "The temporary toward revival in business is more pronounced than at any time since the war. This

AMUSEMENTS OF PARIS BANNED

French Permit Nothing in Way of Frivolity—Hard on the Singers.

Paris, Nov. 12.—(Correspondence of the Associated Press).—Poor dramatic artists unqualified for roles in the theater of war are among those who feel most the rigors of martial law. One of the baritones of the Opera Comique is driving a taxicab. Others have been driven to seek the most menial occupations. During the first days of the war many of these artists were heard to sing in the streets, and really good artists were heard in the courts of apartment buildings, but on account of the crowds they drew the means of eking out an existence was forbidden. One familiar with the night life of Paris would hardly seek patriotic emotions at that music hall to which the "Can-can" gave a certain notoriety, and yet this place until recently closed was nightly the scene of impressive incidents characteristic of the few distractions the city offers. All amusements, if they may be so called, are censured to the feeling of the moment.

TOO MUCH AND TOO CRUDE.
 One evil from which our states suffer is that there is too much legislation. Another is that the legislation is of too crude a character.

PRAYERS FOR PEACE OFFERED IN JAPAN
 Washington, Nov. 12.—Prayers for peace were offered in Japan in response to President Wilson's peace declaration last month, though Japan is one of the belligerent powers in the great war. Word of this came to the American Red Cross headquarters here in a letter from M. S. Togo, secretary of the Japanese Red Cross.

MUFFS
 Included are Jap mink, muskrat and coney muffs, all medium sized, your choice at each **\$5.00**

One lot of Silk Waists at \$2.00 | Fine Lingerie Waists at \$1.98

MANY VESSELS SINK IN PORT
 Vancouver, B. C., Nov. 12.—A message received at the navy yard at Esquimalt today from the commander-in-chief of the Japanese second squadron, which bombarded Tsingtau, said:
 "The following vessels were found by us by explosion in Kiao Chow bay: Juguar, Luths, Itlis, Cormorant, Tiger, Taku and Ruchin, which was a mine boat, and in addition the Kaiser-Elizabeth."
 All these ships, with the exception of the last named, were German. The Kaiser-Elizabeth was Austrian.

ANOTHER SHIP SAILS TO BELGIUM
 Washington, Nov. 12.—Arrangements were completed at the American Red Cross headquarters today for the sailing of another Belgian relief ship—the Norwegian steamer Thelma, which as the result of a Philadelphia newspaper campaign is about to start from Philadelphia with 2,000 tons of food supplies consigned to American Minister Van Dyke in Holland. The newspaper committee informed the Red Cross officials they might have enough money to send another ship in the near future.
