"Our esteemed contemporary, the Daily Morning Liar of St. Louis remarks that "silver fails to rise in price because there is no more demand for it." It also insists that the main reason why we should not coin the supply of silver is because it is cheap. Now we want to ask just one question right here. Would not the free coinage of silver increase the demand for it, and would not this increased demand enhance its price? The position assumed by the goldbugs reminds us of the old lady who did not want her boy to go about the water until he learnt to swim. Until silver was demonetized there was a demand for it which kept up the price. When it was demonetized the demand fell off and the price went down. It is folly now to say that to increase its uses will not also increase the demand and also the price."—Ex.

Circlograph For Draftsmen.

Mr. Thomas Clarkon, C. E., of Mark Lane, E. C., has brought out a useful instrument for scientific draftsmen called the "circlograph." It enables him to draw curves to practically any radius and is based on the fact that strips of steel of uniform thickness can be bent into circular curves by pressure on their ends. The circlograph is a handy little instrument and is calculated to save much valuable time.—London Globe.

Phosphorus was discovered in 1669 by Brandt of Hamburg.

THE FIRST CELEBRATION.

It Passed Off Much as Independence Day Does Now.

The people of the United States took to the Fourth of July very naturally. The first anniversary of the Declaration of Independence, July 4, 1777, was celebrated at Philadelphia as gayly, as prettily and as enthusiastically as though the inhabitants had had a century's practice in the art.

In the morning all the ships, the market barges and the armed galleys were drawn up in a line before the city, with their flags and streamers flying. At 1 o'clock, the shore being lined with eager spectators, the yards were manned and each vessel in turn fired a salute of 13 guns.

When the last salute was over, congress, with a number of officers, civil and military, dined together and drank the usual patriotic toasts, each toast being followed by a discharge of artillery. And who furnished the music for the feast? Why, a band of Hessian prisoners, who had been captured a few months before at Trenton! Their music was much admired.

After dinner there was a military parade, consisting of companies of horse, a body of artillery and a brigade of regular troops from North Carolina, which was witnessed by congress and its guests from the banquet, besides nearly the whole population of the town. As night drew on the church bells were rung. As soon as it was quite dark there was an exhibition of fireworks and a general illumination. The young and old appeared to enjoy the occasion thoroughly from early morning until late in the evening.

Warning Her.

Husband—You are not going to wear your low neck dress at the fireworks to-night, are you?

Wife—Certainly. They are going to have dancing.

Husband—Well, you had better put something around your waist, or you may get burned.

Thrilled All Nations.

The astonished nations as they read that all men are created equal started out of their lethargy like those who have been exiles from childhood when they suddenly hear the dimly remembered accents of their mother's tongue.—Ban-croft.

Considerate.

Kind Lady—Willie Waffles, I heard you boys tied a bunch of firecrackers to a dog's tail. Don't you think that is very cruel?

Willie Waffles—No'm. We out it off first.
