

WILLMAR TRIBUNE.

Vol. 4.

Willmar, Minnesota, March 1, 1898.

No. 3.

Few People
Have Eyes Alike.

Fully nine-tenths of those who wear glasses have different vision in each eye. Sometimes it's a decided difference—in others only a slight variation. A careless examination will fail to bring out this defect—the same lenses will be adjusted to both eyes—and headaches and eye strain that medicine fails to relieve are the result. WE test each eye SEPARATELY and select the proper lenses and adjust glasses to suit both eyes. Examination free.
