

"1892" Pure Spun Aluminum Ware

15 Days at Our Risk

Buy any piece of this ware from your dealer—try it fifteen days. If in that time you find that all the claims we make for it are not true, and if it is not just as represented, take it back and get your money.

Here at last is the ideal kitchen and cooking utensil—"The Ware That Wears"—made from Pure Spun Aluminum, and guaranteed by the makers to last 25 years with average usage. "Spun" Aluminum, mind you, not cast Aluminum, which will sometimes crack and scale. Spun Aluminum Ware will never crack, peel, scale or break.

Enamel ware is iron coated with colored glass. Iron expands with heat. Colored glass does not, but chips off into the food with dangerous results to those who eat it.

"1892" Pure Aluminum Ware Saves Doctors' Bills.

It enables you to bake bread, pies, pancakes, etc., without grease, which is the great cause of dyspepsia and indigestion. Aluminum griddles require no grease; hence are smokeless and odorless.

"1892" Pure Aluminum Ware Will Not Scorch or Burn

—is easily cleaned, will not rust or corrode. Handsome in appearance. Looks like silver, but weighs only about one-fourth as much, and is light and convenient to handle.

The original and only genuine Spun Aluminum Ware is made by the Illinois Pure Aluminum Co. at Lemont, Ill. Every piece bearing their trade-mark, the Maltese Cross, and marked "1892" Pure Aluminum Ware is absolutely pure, wholesome and hygienic—guaranteed for 25 yrs.

See that you get the right goods and accept no substitute.

ENAMEL WARE CAUSES CANCER, SAYS DOCTOR

Tells Homeopaths Particles From Dishes Start Growths in Stomach.

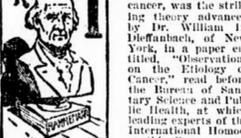

Special Dispatch to The North American.

ATLANTIC CITY, Sept. 11.

INTRODUCTION of modern enamel ware in the kitchen of the country is responsible for many cases of cancer, was the striking theory advanced by Dr. William H. DeFornbach, of New York, in a paper entitled, "Observations on the Etiology of Cancer," read before the Bureau of Sanitary Science and Public Health, at which leading experts of the International Homeopathic Congress met today to discuss questions of public health.

The argument advanced was that chips of the hard-coated dishes used in preparation of meals allowed minute but dangerous particles of foreign matter to become mixed with the food. These are taken into the stomach, where the cancerous growth is caused by abrasions which they make in the walls of the stomach.

FOUR THOUSAND CONSUMPTIVES STARVE YEARLY.

Many Indigent Dying Cases are Being Sent to Southwest.

Cruel and inhuman practices are alleged in a statement given out today by the National Association for the Study and Prevention of Tuberculosis against the eastern doctors who persist in sending dying cases of consumption to the Southwest.

Fully 7,180 persons hopelessly diseased with tuberculosis annually come to die in the states of California, Arizona, New Mexico, Texas and Colorado, most of them by order of their physicians. The statement, which is based upon the testimony of well-known experts, and all available statistics, shows that at least 50 per cent of those who go to the Southwest every year for their health are so far advanced in their disease that they cannot hope for a cure in any climate, under any circumstances. More than this, at least sixty per cent of these advanced cases are so poor that they have not sufficient means to provide for the proper necessities of life which means that 4,315 consumptives are either starved to death, or forced to accept charitable relief every year.

It is not an uncommon thing, the National Association declares, for whole families, who can hardly eke out a living in the East, to migrate to the West in the hope of saving the life of some member of the family. In most instances, the abject poverty of such cases forces them to beg, or to live on a very

low level. Often consumptives who cannot afford the proper traveling accommodations are found dead on the trains before reaching their destination. The resources of almost every charitable organization in the Southwest are ordained every year to care for cases which would be self-supporting in their Eastern homes.

It cost, on an average, at least \$50 per month for the support of a consumptive in the Southwest, including some medical attention. The National Association strongly urges no one to go to this section who has not sufficient funds to care for himself at least one year, in addition to what his family might require of him during this time. It is also urged that no persons who are far advanced with tuberculosis go so distant a climate.

Consumption can be cured, or arrested, in any section of the United States, and the percentage of cures in the East and West is nearly the same. Any physician, therefore, who sends a person to the Southwest without sufficient funds, or in an advanced stage of the disease, is guilty of cruelty to his patient.

Renewed efforts are being made to stop this practice, and to encourage the building of small local hospitals in every city and town of the country. Attempts are also being made in Southern California and in Texas to exclude indigent consumptives or to send them back to the East.

Allen's Kusion Komfort Shoes

We have now arranged to have the Allen's Kusion Komfort Shoes placed on exhibit at J. C. Dale's grocery store, where samples may be seen and orders left.

Allen's Kusion Komfort Shoes are carefully modeled from the best materials according to a scientific knowledge of the human foot and its true and tender structure. In style, shape and appearance the counterpart of the exclusive city custom makers' finest models. The sole construction is ORIGINAL and UNEQUALLED. It keeps the foot warm and dry as no other ever made will do. Comfortable from the start. Instant relief for tired and tender feet.

Komfort Shoe dressing will also be for sale at the same place. It adds life to all kinds of leather. A waterproof patent leather luster that does not rub off. Harmless. Price 25 cents.

General Agent.

The Metropolitan barber shop, Bank of Willmar building, B. T. Otos, proprietor, is the shop to get a shave, hair cut or bath.

CURE YOUR KIDNEYS

Do Not Endanger Life When a Citizen Shows you the Cure.

Why will people continue to suffer the agonies of kidney complaint, backache, urinary disorders, lameness, headaches, languor, why allow themselves to become chronic invalids, when a certain cure is offered them?

Doan's Kidney Pills is the remedy to use, because it gives to the kidneys the help they need to perform their work. If you have any, even one, of the symptoms of kidney diseases, cure yourself now, before diabetes, dropsy or Bright's disease sets in. Read this Willmar testimony: J. H. Taylor, 314 Lake Ave., Willmar, Minn., says: "I have been troubled with my kidneys for about two years and during that time experienced a great deal of suffering. I work in an office and as I am obliged to sit in the same position for a long time, this, no doubt, was the cause of my kidney trouble. I doctored a great deal but got no relief until at last I procured a box of Doan's Kidney Pills at A. E. Mossberg's Drug Store. They went at once to the seat of the complaint and soon cured me.

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

Green Lake, Sept. 6.—Willie Lawler and Mike Murray made a business trip to Willmar Saturday.

The Mesdames W. and M. Lawler left for St. Paul Friday to visit friends and take in the sights of the state fair.

Mr. Gunder Axelson called on friends here Thursday.

Mrs. Elmer Thorson and daughter, from Hancock, who have been visiting at Anton Thorson's home for a few days, left for their home Saturday.

Mr. and Mrs. Ingmar Romning and daughter, from near Penock, visited at the home of Mrs. Ronning's parents, Mr. and Mrs. Martin Matson from Saturday till Monday.

Mr. C. A. Thorpe delivered stock at Kandiyoji Monday.

Olaus Anderson plans to attend the state fair the last part of the week.

A son was born to Mr. and Mrs. Oscar Fauchald Sunday. Mother and child are doing nicely.

Mr. and Mrs. John Daugherty were in Willmar Saturday on a combined business and pleasure trip.

Alma Lucken is working at Oscar Fauchald's place at present.

East Lake Lillian, Sept. 6.—Madge Jacobson has gone to the cities to spend the winter.

Mr. and Mrs. Joe Grose visited near Olivia Saturday and Sunday. Joe Wallenta has purchased a gasoline engine to pump water, and it is a "dandy."

Miss Theresa Hubsch has returned to Bird Island, after spending two months here.

Mike Hubsch helped F. W. Blocker finish stacking Monday and Tuesday.

Henry Thody and Frank Wendorf left for North Dakota Wednesday.

The dance at Windorff's place Saturday night was well attended, and everybody present reports a fine time.

Mike Hubsch has sold his half interest in the property here to his brother Clem, and will leave for the northern part of the state about November 1.

STATE BOARD REPORTS REGARDING SEWER SYSTEM FOR WILLMAR

Full Text of Prof. Bass' Report to the City Council of Willmar.

The city of Willmar has a difficult problem before it in the planning of its sewerage system. The difficulty is largely caused by the topography of the site, but also by the lack of sufficient natural drainage at the city limits.

The central or business district of Willmar is situated on the higher land at an elevation of approximately 200.00 Willmar datum. The highest land lies to the northeast and the lowest to the south. The highest elevation is 216.7 and the lowest 188.8. The average slope of the ground is about 6 feet per 1000.

The natural drainage is then to the south, but on account of the proximity of Foot Lake, sewers have from time to time been constructed draining to the north into the lake. There is a settling basin on the south shore of Foot Lake into which the sewage is at present run. It is of brick construction, in a dilapidated condition, and perhaps 15 ft. in diameter.

A sewer has recently been constructed in Ella Avenue in the northwesterly part of the city. This drains directly into the lake.

The total length of sewers in the business portion at present is about 7000 ft. The size and grade of these is not shown on the map prepared by Mr. Claussen, and Mr. Day, the county surveyor, is uncertain about them. They are used as combined sewers.

The system which Mr. Claussen has laid out for Willmar is the combined storm and sanitary type also continuing the present sewer building policy. It divides the city into two principal drainage districts which is on account of the flat topography advisable if not necessary. The pipe sizes range from 12 in. to 42 in.; the sewer slopes from 3 per cent to 0.15 per cent. This latter slope, which obtains frequently and other slopes of 0.4 per cent and less are of doubtful desirability without means for frequent and easy flushing. Flushing in the large pipes of a combined system is of very little utility, dependence being upon the uncertainties of the rainfall. I believe that greater slopes should be used for the prevention of deposits. This would however necessitate a considerably greater expense than is now contemplated, and as the system shown by Mr. Claussen's plan would cost something over \$150,000 I would recommend that the City of Willmar ask Mr. Claussen to further study the situation with a view of planning for a system of separate sewers.

I made special inquiry while in Willmar in regard to trouble from storm water and Mr. Peterson, the Mayor, assured me that only in the heaviest downpours was any inconvenience caused, and never any considerable damage.

For sanitary sewers, by restricting slightly the drainage area in the southern portion of the city, the total ultimate cost would be in the neighborhood of \$75,000, less than half that of the combined system. This approximate estimate includes a septic tank at Foot Lake, a septic tank and percolating filter at the outlet of the southerly district, and three pumping stations,

all of which are estimated to cost \$120,000.

In beginning the construction it would of course be necessary to start at the outlet and gradually radiate to the outermost districts. In the combined system this would entail a very heavy expense in the initial stages as the first pipes to be laid would be in the southerly district 24 in. in diameter. Three blocks of this sewer would cost not far from \$10,000, whereas if the separate system were used a 15 in. pipe would be the largest necessary and would cost not to exceed \$1500 for the same distance. This comparison while not meant to be precise indicates that the adoption of the combined system will delay, and the adoption of the separate system will hasten the day when Willmar will receive the benefit of sewerage.

To make a beginning, using the separate system I would judge that an initial expense of from \$30,000 to \$50,000 would be advantageous.

The proposed outlet for the southerly drainage district is considerably near the limit of the populated district and indications are that in the near future the immediate neighborhood will be built up in the plan suggested for separate sanitary sewers with small lifts or pumping stations this outlet could be removed to the southerly limit of the city. A percolating filter as well as a septic tank should be provided for here as the effluent would often in dry summer months stand in the drain ditch and become offensive. A percolating filter would prevent such a nuisance.

The system which Mr. Claussen has laid out for Willmar is the combined storm and sanitary type also continuing the present sewer building policy. It divides the city into two principal drainage districts which is on account of the flat topography advisable if not necessary. The pipe sizes range from 12 in. to 42 in.; the sewer slopes from 3 per cent to 0.15 per cent. This latter slope, which obtains frequently and other slopes of 0.4 per cent and less are of doubtful desirability without means for frequent and easy flushing. Flushing in the large pipes of a combined system is of very little utility, dependence being upon the uncertainties of the rainfall. I believe that greater slopes should be used for the prevention of deposits. This would however necessitate a considerably greater expense than is now contemplated, and as the system shown by Mr. Claussen's plan would cost something over \$150,000 I would recommend that the City of Willmar ask Mr. Claussen to further study the situation with a view of planning for a system of separate sewers.

G. P. Karwand,
Willmar, Minn.

Miss Frances Reeves of North Lampton, Mass., was a week-end guest of Miss Alene Sherwood.

Miss Alyda Danens has gone to Lake Preston to spend some time with her sister and attend school.

Miss Laura Ames will leave on Thursday for Minneapolis, where she is a student at the state university.

Mrs. George Sanderson entertained a small company of ladies very pleasantly on Saturday afternoon.

Miss Ella Feig has gone to Buell, where she will be one of the instructors in the schools of that place.

Misses Ellen and Emma Syse are at home, after spending three weeks in North Dakota and the Twin cities.

Misses Ruth and Edna Sanderson came home Saturday from a week's visit with relatives and friends in Atwater.

Miss Agnes Haines, who will teach in the Beardsley schools the coming year, left for that place on Saturday.

Judge and Mrs. C. L. Brown and daughter Margaret arrived on Friday for an over Sunday visit with Willmar relatives.

Miss Julia Booth was in Willmar Monday, returning to St. Cloud, where she is a member of the Normal school faculty.

Mr. and Mrs. Henry G. Meyer were week-end guests of Mr. and Mrs. Alton Crosby at their summer home at Crescent Beach.

Mrs. C. J. Christianson and three sons left for their home in Minneapolis on Thursday, after visiting relatives here and at Penock.

Mr. and Mrs. Martin Olson of Atwater, who had just returned from an extended western trip, visited Willmar friends last week.

Miss Hattie Carlson left on Wednesday morning for Minneapolis, where she will take a course at the Minnesota Business College.

Mr. and Mrs. H. J. Knox of Boise, Idaho, left for the East on Thursday, after a ten days' visit at the home of Mr. and Mrs. F. H. Knox.

Mr. and Mrs. E. A. Peterson went to Kerkhoven Friday, where they will spend Mr. Peterson's two weeks vacation from his duties at the Willmar post office.

Mrs. George R. Lawrence of Litchfield was a guest of Mrs. F. W. Minton Saturday, on her way to Miles City, where she is supervisor of primary work in the schools.

Mr. and Mrs. John Feig and little daughter Adeline went to Long Prairie Saturday, where they were the guests of Mrs. Feig's sisters, Mesdames Henry Goldhahn and Fred Maynard, for a few days.

Mr. and Mrs. D. N. Tallman and Miss Mata O'Neil are enjoying the week in the cities and at the state fair, making the trip in the Tallman touring car.

Mason Spicer left Willmar Monday on a business trip to Burlington and other points in Iowa and later in the week will continue his journey to his home in Denver, Colorado.

Miss Edna Benson returned to Kokato on Monday.

Mrs. Moore is spending a couple of weeks in Minneapolis.

Miss Edith Frost spent Sunday with friends at Interlachen.

Miss Olive Crosby is the guest of friends in Minneapolis this week.

Miss Martha Haley spent a week at Fergus Falls, returning to Willmar on Friday.

Mr. and Mrs. Samuel Porter are at home after a season's outing at their cottage on Crescent Beach.

The "Hooligan Wedding," one of the prettiest art productions of the year, for sale at all art stores.

Donald Minton returned Saturday evening from Spring Valley, where he had been since the first of June.

Mrs. L. A. Vik and sons Elliott and Percival are at home after an extended stay at their Green Lake Beach cottage.

Mr. and Mrs. W. D. Wiggins and sons closed their Crescent Beach cottage and returned to Willmar on Monday.

Mr. and Mrs. Russell Spicer visited Minneapolis in their touring car on Friday, returning to Willmar on Sunday.

Mr. and Mrs. John Palm of Litchfield were entertained at the home of the former's sister, Mrs. Ed Benson, over Sunday.

Miss Hazel Parsons, who had been the guest of Miss Hazel Benson for several days, left for her home in Grove City on Saturday.

Miss Jessie Spicer was a guest of Miss Esther DeCaster at Litchfield on Thursday, going from there to Minneapolis for a few days' stay.

Mrs. A. Moline of Kokato, who was a guest of Mrs. C. A. Benson, was called home Sunday morning by the serious illness of her father.

Miss Elsie Roberts went to St. Paul Friday to assume her duties as one of the instructors in the Franklin school. She was accompanied by her mother, Mrs. I. Roberts, and her nephew, Master George Moscript.

Mrs. P. C. Williams was the guest of Mesdames F. W. Minton and A. O. Bryant Thursday and Friday, and left for St. Paul Saturday morning. Several informal social affairs were given in her honor before her departure.
