

# THE S. E. STANSBERRY IMPLEMENT CO.

S. E. STANSBERRY.

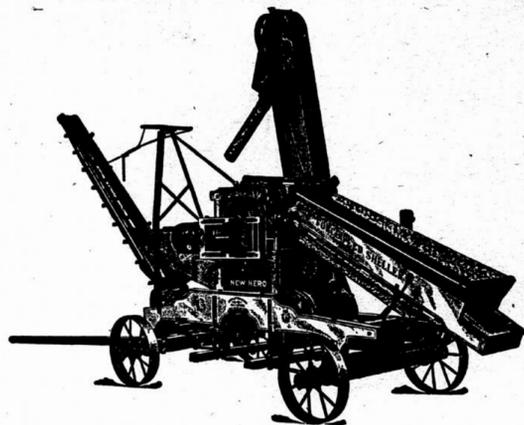

We are showing on this page a few of the articles which we have to sell, and as we do very little canvassing, we will not be able to see you at your homes and talk these goods over with you, but every farmer who wishes to buy anything in our line who will come to our warehouse, and look our goods over, we will prove to him that we will save him the cost of a canvasser, which is quite an item to add to the cost of goods. We need not tell you that we are the oldest Implement Company now doing business in this part of the country, and our reputation for a square deal is well known.

In our buggy line you will find the latest and best styles. We have just received a carload of Stoughton Wagons, which need no recommendation from us. We also handle John Deere Wagons, John Deere Plows of all descriptions and sizes. We have the No. 9 Deere Planter, John Deere Cultivators and Harrows, Kentucky Drills, DeLaval and Sharples Separators, Fairbanks, Morse and Waterloo Gasoline Engines, Dain Mowers, Hay Stackers and Sweep Rakes, Success and John Deere Spreaders.

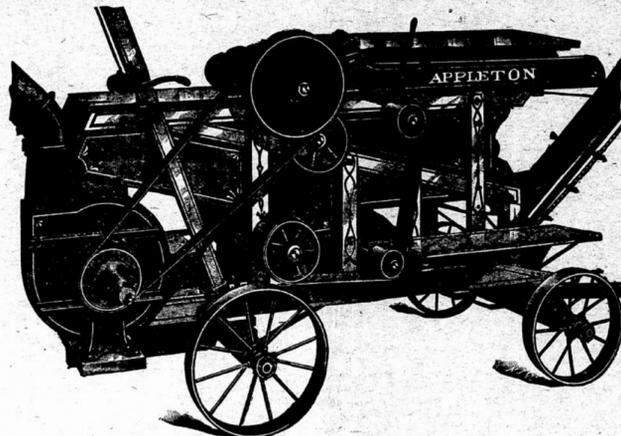

We have on hand a good supply of Steel Culverts. We make special prices to townships for any size and any length of culvert. We also make special prices to townships on Wheel Scrapers. We handle the K. & J. Press Bowl Wheel Scraper and everything in the road machinery line.

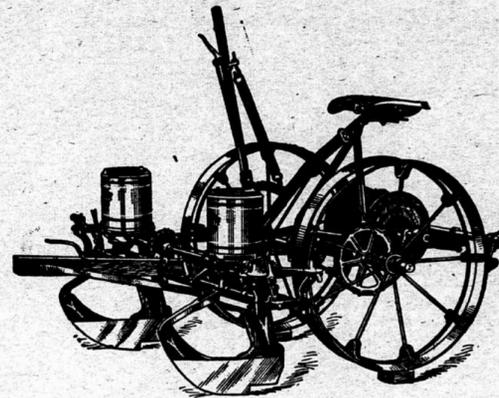

J. E. MARTIN.
