Atwater Promised New Depot

We have it from good authority that the State Railway and Warehouse Commission has received from Mr. J. M. Gruber, the general manager of the Great Northern Railway Co., a communication to the effect that during the course of the year, before that possible, a new depot would be constructed at Atwater and that the Inter-State elevator would be shifted to another location; also that three alarm bells would be put in, at the First, Second and Third street crossings respectively. We understand that the matter has been communicated officially to the secretary of the Atwater Commercial Club and when that body again convenes the full text of the letter will be made known. It is encouraging to those who had given up all hopes of seeing a new building here in the near future. The fact that the old building was being repaired led our citizens to believe that something new and sturdy would not materialize this year.—Atwater Republican-Press.

Both amounts are written in the Genessee & Acton Mutual Fire Insurance Co.
