

# COUNTY HISTORY CLUB

## Balance of Copies of the History of Kandiyohi County Will be Closed Out at a Club Price on Condition that a Good Number are Sold.

The publisher of the Willmar Tribune has a large amount of money tied up in the edition of the Illustrated History of Kandiyohi County. Occasionally we sell a copy, and eventually would sell them all, but we need money now to carry out our plans for improvement which are urgently required for the development of our printing plant. Therefore we have decided to make a special offer on these books on condition that a considerable number of them are disposed of on or before June 4, 1913.

The regular price of the book was placed at \$10.00, a very low price when compared with histories published in other counties. Our special offer will enable all who have cherished the idea of possessing this work an opportunity to secure it at a substantial reduction. The special price until June 4, 1913, if not less than 100 books are sold, will be per copy **\$7.50**

### Who Will be the First to Respond?

Who will be the first to respond, and have the honor of leading the list of the County History Club, the final move in the Great Undertaking, which will remain a credit to Kandiyohi County as long as there are people who live here? No other county in the country possesses so complete and exhaustive a history of its first fifty years of development. Every progressive Kandiyohi home should have a copy for the instruction of the children, for ready reference of the older, and the great interest and enjoyment of all.

Let us hear from as many as possible during the coming week.

### This is Your Opportunity

There are many families in the county and old-time residents of the county who would be pleased to own copies of this work, but who have for various reasons so far failed to place their orders. There are many of the original patrons who would be glad to secure additional copies for themselves or members of their families. Now is their opportunity to secure the book at a reduced price and easy terms. We believe that this will develop into a clean-up sale and that every available copy will be disposed of. Let no-one interested put off the matter any longer, but avail themselves of this offer.

Write us a letter or a card stating that you will take a copy under the terms offered. Settlement to be made before June 4 on delivery of the book either by cash or a good note due in the fall without interest to that time.

#### MANY WOMEN REPLENISH TABLE SILVERWARE

Housewives Rush to Stores to Exchange Galvanic Soap Wrappers for Rogers Spoons.

Thrifty housewives of this city in large numbers have taken advantage of the limited offer of the B. J. Johnson Soap Company to exchange the wrappers from Galvanic Soap for a beautiful set of Rogers silver plated spoons. The wrappers are redeemed through the local dealers, the spoons being given out at the local grocery stores.

The offer, and its prompt acceptance by many women of this city, have caused considerable comment. The women save the outside wrappers from a hundred cakes of the soap, and in exchange for these they are allowed to select either half a dozen of the Rogers silver teaspoons or three of the Rogers silver dessert or soup spoons. The spoons are of the exquisite LaVigne pattern, and are A-1 extra silver plate. No return other than the wrappers is asked by the soap company for the spoons.

The offer is an unusual one, the spoons being given as a form of advertising to introduce Galvanic soap into the homes of this city. It is too expensive to be continued long, the manufacturer says, and hence the offer is limited to May 1st.

Because of the limited time in which to secure the wrappers, many women of foresight are buying the soap by the box and taking their silverware at once. A prominent dealer, who was interviewed this morning declared that this offer is creating more interest among women than anything which had been attempted for some time.

#### GOOD BASKET-BALL, AND LOTS OF IT

A Series of Fast Games. Willmar High School Finally Loses One at St. Cloud.

A week ago Wednesday the Seminary basket ball team went down to defeat before the fast high school team. The score was 22 to 16. The game was one of the best that has been played here this year. For the High School Branton got 6 field baskets, Taylor 2 and Johnson 1. Taylor shot 2 fouls. The game was very fast and clean and not a kick was heard from either side on the refereeing. For the Seminary Carlsson got 3 field baskets, as did Nordstrom. The rest failed to connect with the basket. The biggest crowd that was ever in attendance at a basket ball game was at this game and the way that the high school rooters yelled was one of the features. Myron Cramer sure makes some rooster king. Anyone who did not see this game surely missed a big event. Last Friday the high school team went to St. Cloud and met their first defeat of the season by the score of 14 to 17. This game was the fastest that the high school has participated in this year. Each team started in with a rush and it was eleven minutes before either team scored. The half ended 11 to 8 in favor of St. Cloud. During the last half the two teams played even. Taylor for Willmar, made 12 points by free shots and field baskets while Johnson got one field basket. Evidently from comparison of scores the high school has the better team for they beat St. Cloud on their own floor by six points while St. Cloud only beat the locals 3 points on their own floor. There was also three new men, who were put in because of better basket ball qualities, thus strengthening the St. Cloud team greatly, since they played Willmar early in the season.

#### The Inquiry About Hog Cholera.

Well friends, the farmers who had their hogs treated with the Hog Cholera Serum have been rather slow, or may be, they have no interest in finding out about it. I have not heard from any one of them but one. L. O. Thorpe had 27 treated and lost three. If everybody could say that, it would be all right, but I had 37 treated and lost 26 out of that number and a few that I did not treat. The ones that I did not have treated lived just as long as those I had treated. The hogs that I did not have treated were the poorest in the bunch, so whether the lack of treatment was the cause of losing them or the treatment saved those I have left of those that were treated, I do not know.

I am surprised that the farmers do not take more interest in the matter, especially those who had their hogs treated. Hoping they will get more interested in the future, I remain,
