

NO matter how careful one may be in washing sweaters and other knit goods, ordinary laundry soap never leaves them as soft and pretty as when new.

The alkali and inferior fats contract, stiffen and weaken the woolen fibers. This means a change both in the appearance and fit of the garment.

To keep them in perfect condition, wash with Ivory Soap. Because of its freedom from alkali and all harmful materials, Ivory is as easy on these garments as your own careful handling. It cleans them but their texture remains the same.

Here are some timely hints on washing knit goods:

If very loosely woven put them into a pillow case or cheese cloth bag so they will not be stretched. If no bag is used, slip a towel under them to remove them from the suds. Throw the sleeves of sweater over the back of a chair while the body lies on the seat. Use lukewarm water and Ivory Soap Paste. (See directions in inside wrapper.) Do not rub soap on the garment or the garment on the board.

IVORY SOAP . . . 99 4/100% PURE

Machine vs. Beast. When the automobile owner leaves his car outside on a cold day he covers the engine with a heavy robe, but there are horse owners, who will leave their animals outside on the coldest days without any covering whatsoever. Why is it?—Ex.

—Vigerta Rasmusson, who attends the Normal at Winona, arrived Friday evening to spend the holidays with her parents, Mr. and Mrs. Chas. Rasmusson.

A BIG MAP SCHEME.

New Map of Montana issued by U. S. Geological Survey in Conformity With Big Scheme.

By international agreement the United States and nearly all the other principal countries of the world in 1909 planned for the preparation of maps of the entire surface of the earth, to be published on a scale one-millionth of actual size, or about 1 inch to every 16 miles.

The Survey has already issued 25 such State maps, the latest one being that of Montana, and this is the largest one of the series so far published.

In compiling the map every available source of information has been ransacked for material, and many data never before available to the public in any form have been procured, so that the map far exceeds in accuracy any heretofore published. The map is in two sheets, each 40 by 46 inches, and is sold and delivered free by the Geological Survey for the nominal price of 45 cents.

By an inspection of this map and comparison with some others one begins to realize the great area of Montana. There are four counties in the State any one of which has a greater area than that of an even dozen States of the size of Rhode Island. The combined area of the New England States is less than half of that of Montana.

The northern line of the State is the Canadian boundary and is over 500 miles long. Fortunately it never will need an army to guard it.

A million people from the European nations now at war could find peaceful, happy homes in this one State alone, and its natural resources are so great that the million could support themselves in comfort and even luxury.

EAST DOVRE. East Dovre, Dec. 21—A Merry Christmas to you all.

Mr. Leonard Rustad of Norway Lake visited at Berg's a few days last week.

Doughnuts

That will remain moist. Every housewife who bakes her own bread knows that if a little potato is added to the sponge, the bread will not dry out so quickly. In this recipe potato is utilized to make doughnuts that will remain moist and fresh for several days.

K C will be found to have distinct advantages over any other Baking Powder for doughnuts. K C is a double acting baking powder with which a large batch of doughnuts may be mixed and fried a few at a time. The last will be as light and nice as the first.

K C Potato Doughnuts

By Mrs. Nevada Briggs, of Baking School fame.

3 cups flour; 2 eggs; 1 cup sugar; 1/2 tsp. salt; 1/2 tsp. yeast; 1/2 cup milk; 1/2 cup oil; 1/2 cup potato; 1/2 cup molasses; 1/2 cup milk, or more if needed.

Sift three times, the flour, salt, spice and baking powder. Beat eggs with rotary beater, then stir rotary beater, gradually add sugar, then work in the mashed potato with spoon and alternately add milk and flour mixture. Make a soft dough, roll into a sheet, cut into rounds, prick a hole in the center with the finger and fry in deep fat.

Fat for frying should not be hot enough to brown the doughnut until it has risen. When the doughnut is cooked, lift it out of the fat, drain on a paper, and serve.

GIVE "SYRUP OF FIGS" TO CONSTIPATED CHILD

Delicious "Fruit Laxative" can't harm tender little stomach, liver and bowels.

Look at the tongue, mother! If coated, your little one's stomach, liver and bowels need cleansing at once. When the tongue is coated, the child doesn't sleep, eat or act naturally, or is feverish, stomach sour, breath bad; has sore throat, diarrhoea, full of cold, give a teaspoonful of "California Syrup of Figs," and in a few days all the foul, constipated, undigested food and sour bile gently moves out of its little bowels without griping, and you have a well, playful child again. Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which contains full directions for babies, children of all ages and for grown-ups.

AUTO AND CARRIAGE PAINTING

Any Shade or Color. Prices Reasonable. Also Furniture Refinishing. Will look like new.
