

BETHEL LUTHERAN CHURCH

REV. W. E. PEARSON, A. M., Pastor

ALL ARE CORDIALLY INVITED TO ATTEND OUR SERVICES

SERVICES NEXT SUNDAY.

"Högessa" at 10:30 o'clock Sunday morning. Sunday school after services.

English services Sunday evening at 7:30 o'clock.

The Ladies' Aid will meet tomorrow afternoon, September 23rd. Refreshments will be served by Mesdames C. B. and S. B. Carlson, Peter Lundberg and Andrew Nordstrom.

Personal and Otherwise

Cecil Johnstone of Maynard spent today visiting friends in this city. Even Erickson of New London made the Tribune a pleasant call Saturday. Miss Stella Noren was called to this city last Saturday by the death of her father. Russell Johnson went to Benson this afternoon to act as best man at the wedding of his brother, Edward, to Miss Stella Noren.

Mrs. Marion Gratz left Sunday morning for South Hampton, Mass., to attend Mount Holyoke College. Mrs. N. McIntyre will be hostess to the Eyelet Club Thursday afternoon of this week. Clifford Hanson returned to Lambert the latter part of the week after a week's visit with his parents in this city. This evening (Wednesday), at the Free Lutheran church in Benson, occurs the marriage of Edwin L. Johnson of this city to Miss Inga Lanmark of Benson. Rev. T. M. Findley will conduct services Sunday, September 26th, as follows: Paynesville, 11:00 a. m.; Hawick, 2:30 p. m.; and New London, 7:45 p. m. Everybody cordially welcome.

The Arctic Summer. The arctic summer is brief, but for weeks together there is nothing to distinguish day and night. Once at Dvornik two naturalists had left their ship at different hours. When later they met one said, "Good morning," the other, "Good evening." Both agreed that the hour was 7, but while one traveler held that it was 7 tomorrow morning the other maintained that it was 7 o'clock last night. On returning to the ship they settled that it was last night, so they dined and went to bed again.

Ceilings and Ventilation. Rooms with low ceilings or with ceilings even with the window tops are susceptible of more perfect ventilation than those with high ceilings. In such rooms the leakage at the windows, which is constantly going on, keeps the air in motion throughout the room, whereas if the ceiling is higher only the lower part of the air is moved, and an inverted lake of foul and hot air is left floating in the space above the window tops. This lake keeps actively at work, pulling the fresh currents circulating beneath it.

Birds' Songs. A French writer says that notwithstanding the fact of their simplicity the songs of birds cannot be imitated with musical instruments because of the impossibility of reproducing their peculiar timbre. The notes of birds, while corresponding with our musical scale, also include vibrations occupying the intervals between our notes. The duration of birds' songs is usually very short, two or three seconds for thrushes and chaffinches, four or five seconds for blackbirds, but from two to five minutes for the lark.

Eggs of Crabs and Lobsters. Crabs and lobsters are hatched from eggs, resembling upon birth nothing so much as the anemone shown by the microscope in a drop of ditch water. They are as unlike the shellfish they are to become in mature life as a grub is unlike a butterfly. In the case of the crab the egg clusters are attached beneath the animal after extrusion, while with the lobster they become fastened to the tail, which by its fanning motion increases the stream of oxygenated air through and among the ova.

A TRIPLE SCARE

By SAGE OLCOTT

Mrs. Carpenter returned from shopping and rang the bell of her dwelling. The maid who admitted her looked at her, surprised. "What's the matter, Ellen?" asked the mistress. "La! sakes, mum! I thought you'd come in and was upstairs." Mrs. Carpenter thought nothing of this. The maid went back to the kitchen, and the lady went up to her room. Standing before a dresser was herself. Mrs. Carpenter put her hand to her forehead, then rested it on the doorpost for support. Her double was arranging her toilet, looking at herself in a mirror. On hearing some one at the door she turned her face and saw Mrs. Carpenter, exclaimed: "My gracious!" "Who-o are you?" asked Mrs. Carpenter, gasping. "Who are you?" was the reply. "I'm Margaret Carpenter." "So am I." There was an interval of silence, during which each woman regarded the other with obvious terror. The woman before the glass showed signs of fainting. "Oh, my heavens!" she cried. "Have I lost my mind?" "Do go away!" begged Mrs. Carpenter. "Go away yourself. What do you mean by coming into my house, as though you were I? Oh, my! Can it be that?" She looked again at Mrs. Carpenter, then buried her face in her hands. The latter staggered to the head of the stairs, held tight to the banister, descended and tottered into the kitchen. "Ellen!" she moaned. "What is it, mum?" asked the girl, frightened at her mistress' appearance. "Who is it upstairs?" "I don't know, mum. You came in ten minutes ago and went to your room, and now you have come in again." "Then there really is some one there. I'm not gone daft." "I don't know, mum. I'll go and see." "Do," moaned the mistress. Ellen ran upstairs and was back again in a couple of minutes looking much troubled. She was very pale. "I knew it," cried Mrs. Carpenter. "I've received a stroke. Oh, Ellen! And she fell back into a chair. There was a sound of a latchkey in the front door, and Mr. Carpenter walked in. He saw the swish of a skirt on the landing above. His wife had fainted in the kitchen, and the

maid was trying to keep her from falling to the floor. Mr. Carpenter went upstairs to his wife's room and saw her standing before the dresser. He was surprised to see the blinds closed. "Why, my dear," he exclaimed, "why shut out the light?" "I'm afraid I've had something break in my brain." "Break in your brain? What do you mean?" "I've seen myself." "In the mirror, of course." "No, standing in the doorway where you are now. It's gone." "Vanished?" "No; it went downstairs." "Calm yourself. Some one who resembles you was here." He approached her, but she drew away. "Go downstairs," she said, "and see if I am there." He stood irresolute for a moment, and she gave him an appealing look. "Steady, my dear." She snatched on the lounge. "I'll be back in a moment. You have mistaken some one for yourself." He ran down the stairs, passed into the living room, then the dining room, and, pushing a swinging door, stood in the kitchen. There on a chair, pale as a ghost, supported by the maid, was his wife. She gave him an appealing glance. "Oh, Henry," she cried, "I'm afraid something awful has happened to me." "Great Scott," cried the man, "I'm afraid something awful has happened to me!" "Has she gone?" "Are you Margaret or is the woman upstairs Margaret?" "Then there is really some one there?" "A woman who looks exactly like you, only the blinds are closed and I can't see distinctly." An explanation occurred simultaneously to both Mr. and Mrs. Carpenter. Mrs. Carpenter righted herself. The front door was heard to close. Mr. Carpenter ran into the hall and opened the door just in time to see the swish of a skirt around the corner. He stood thinking, then ran upstairs into his wife's room and opened a tin box in which his wife kept her jewels. It was empty. Going to the landing, he called: "Margaret, come up here." Mrs. Carpenter, considering the fright she had been under, went upstairs and into her room with remarkable rapidity. There stood her husband with her empty jewel box in his hands. "You've been fooled," he said. "How—where—what?" "Some woman resembling you has secured you out of your wits and taken your jewels." "The horrid thing!" "The police were put on the case and the woman was arrested, but the jewels were not recovered. The thief had seen Mrs. Carpenter, and struck with the likeness to herself, had resolved to play a game for some plunder. And she played it well."

STOCK EXHIBITS BEST EVER SHOWN HERE

One Hundred Twenty Cattle Of Fine Bred Strains—Horses, Swine and Sheep.

The live stock show this year was the finest ever made in Kandiyohi county. There were one hundred and twenty head of cattle, forty-five head of show horses, thirty-one hogs and thirty-two sheep. There were about two hundred birds in the poultry show and some pet stock. The prize winners will all be listed in an early issue of the Tribune. The stock parade on Saturday was an imposing affair. The showing of cattle was only a small part of the exhibit as there was difficulty in securing a sufficient number of hands to lead the animals at the time. The parade was headed by Supt. C. O. Bergquist on horseback. The line of purebreds in the parade strung out over a quarter of a mile. The silver cup for the best dairy herd was won by Robert Thompson. He gave a dinner to about forty of the stock men at the eating pavilion on Friday. C. O. Bergquist won the sweepstakes for beef cattle and the silver cup for the best dairy herd. The silver cup given by the Live Stock Breeders' Association for the best general exhibit of live stock was awarded to John Swenson by the cattle judge, Prof. Kalash. He stated the previous day that the live stock breeder who could show up the largest number of blue ribbons for his stock would win the cup. Mr. Bergquist therefore entered a contest, and the matter has been referred to the officers of the association who will give the cup for their decision, which will be conclusive.

L. S. DALE BECOMES SCOUT EXECUTIVE IN DENVER

National Field Scout Commissioner is Granted Leave of Absence to Do Extensive Work.

Dr. Ludvig S. Dale, National Field Scout Commissioner, has been granted a leave of absence, to accept the position of Scout Executive in Denver, Colo., which was extended to him recently by the local council of that city. Mr. Dale will leave National Headquarters in order to begin work in Denver about the first of October. Mr. Dale's appointment to Denver came largely on account of the favorable impression he made on the Denver officials last June, when he managed a campaign for \$5,000 to provide a two years' budget for scout work in that city. Mr. Dale was so well liked by the Denver people that they were insistent that he be appointed to the position of Scout Executive. There are few men in the country who have had a wider experience in scout work than the new Denver executive. Mr. Dale first became interested in scout work in 1909, when he applied for a commission as scoutmaster in Willmar, Minn. The Willmar troop did such remarkable work that it attracted a European visit of several months, which he spent in making a careful study of boy scout work in foreign countries. As National Field Scout Commissioner, Mr. Dale's work is well known to every scout official. As a field representative of National Headquarters he has covered more than 30,000 miles and has addressed more than a quarter of a million people. In addition to his more extended trips, Mr. Dale did intensive work in financial and publicity campaigns in Louisville, Pittsburgh, Chicago, Grand Rapids, Boston, Buffalo, Richmond, Va., Rochester, Worcester, Hartford and Denver. For some time it has been Mr. Dale's ambition to take charge of the work in some one locality, and to concentrate some of his important problems of Scouting, such as the relationship of the Movement to education, relationship of the Movement to business, etc. Denver appealed to him very strongly, as offering exceptional opportunities for work along these special lines. The work in that city is well supported by a splendid group of enthusiastic men. Among the more interested workers is Governor Carlson of Colorado, who has promised his active support to the development of the boy scout program in Denver and in other cities of Colorado. Mr. Dale will take with him to Denver the best wishes of a host of friends who will watch with interest the development of Scouting under his expert guidance.—Scouting.

Prof. Kalash stated that the exhibit of stock at the Kandiyohi County fair this year was the best he has ever been called on to judge at a county fair in this state. The Little Oak Tractor had an exhibit at the fair, and took visitors across the lake to a demonstration on the Skoog & Anderson farm. Other machines shown was the "Bull" tractor, a corn shredder, the Oman Engine Works showed an electric plant for the farm. W. S. Geer was busy demonstrating the Kero Water Burner. There were other mechanical demonstrations on the grounds.

An exhibit that attracted a good deal of attention in the ladies' department was a shelf and a wall case in scroll-work done by Mrs. Albert Bengtson of Genesee. The infinite care and patience necessary to complete the pieces of furniture of that kind must be great indeed.

A large bird cage, the work of Mrs. Henry Johnson of Willmar township, was another example of a woman's skill in wood-work.

The four farm club booths at the County Fair received much favorable comment from the visitors. The score on all four ran wonderfully close. The judges were Haroldson, Miller and Balmer, of the State Department. In order that all may see what a good showing all these booths made we reproduce on page 8 the score-sheet of the judges. It was frequently remarked what a wonderful spirit of progress the pains and trouble taken to arrange these booths reflected. The bands of young ladies and men who devoted their best energies to produce these exhibitions demonstrated much better than can be done with words what the farmer's clubs stand for. If your community does not have a live farmers' club get busy and organize one. Prof. Kalash, managing editor of the Tribune, has promised the editor that he will have something to say about these booth exhibits in an early issue of our paper. Views of the four booths will appear in our Newspaper Week edition.

The finances of the fair sluffered severely from the wet weather and resultant bad roads which kept away thousands who had intended to come. The following are the price of meals this year, compared with those of last year:

Table with 2 columns: Date and Price. Wednesday 1915 \$376.20, 1914 \$316.25. Thursday 1915 371.20, 1914 381.80. Friday 1915 1,139.10, 1914 1,025.10. Saturday 1915 911.60, 1914 838.20.

Total \$2,789.95 \$2,961.35. This shows receipts amounting to \$171.43 more than last year. There was about \$300 more paid in premiums this year than last. The concessions brought in less also, due to the fickle weather which kept the crowds away. The management estimates its loss by reason of unfavorable weather at from \$1,500 to \$3,000.

The ladies of the Housekeepers' Club served good meals at the eating pavilion, and enjoyed a splendid patronage. The price of meals was placed at the low price of 25 cents. The work netted the Club about \$275, which will be used in keeping up the public rest room.

G. Akerling the expert silhouette cutter of St. Paul, who has been at the State Fair for years back, had a booth and was busy making likeness with his shears.

The first exhibits to arrive from the country on Tuesday over the wet roads was the South Edwards Alfalfa Club. The Green Lake Farm booth boys were next. The exposition was a busy bee-hive Tuesday night.

The Neffsks, the Russian dancers, were among the best vaudeville troupes that has ever come to our city. They pleased the people. They were good musicians and on Thursday night gave a few numbers on the balalaika, the Russian musical instruments, on the stage in the auditorium.

There is some talk of making the Kandiyohi Fair a six day event. It is argued that many of the expenses of the fair would not be materially added to and the chance of being hit by bad rainy days during the whole fair would be less. It is difficult to get judges the last days of the week, and in one instance at the last fair the blue ribbons were not in place until on Saturday, shortly before the exhibits were taken away. Stockmen and other exhibitors would have more time to meet visitors and talk to them. There would be more time to adjust the premiums to be paid and much confusion and

hurried work could be obviated. Why not discuss this proposition further before the annual meeting in December.

Bids Wanted. Sealed bids will be accepted up till 3 p. m., Oct. 18th, 1915, at the Township Clerk's office by the Township Board of New London, Kandiyohi county, Minnesota, for the construction of a bridge across Crow river between Sections 8 and 17, Township 121, Range 34, said bridge to be built according to plans and specifications now on file in the Township Clerk's office. All bids must be accompanied with a certified check to the amount of 5 per cent of each bid, sealed and addressed to A. Skeie, Township Clerk. The successful bidder to give a bond to the amount required by the Township Board.

The Township Board reserves the right to reject any or all bids. A. A. SKEIE, Township Clerk.

A Light Frost. John B. Sluka of Roseland called at our office yesterday. He said the frost did some damage to corn in his vicinity Monday night. H. J. Drag, of Mosley, said some tomatoes and beans morning that little if any damage had been done to corn. Reports from other portions of the county are that the frost did damage only in spots.

Autos Stolen. Father McDevitt's Ford auto was stolen Sunday evening and driven to Kandiyohi where it was left and found the next day. At Kandiyohi the thief or thieves broke in the garage, took the passenger Ford belonging to Mr. McDevitt and drove away with it. He was heard of either the car or thieves.

At the Tri-State Fair. John Swenson attended the Tri-State Fair at Sioux City yesterday, being there Minnesota Day. He was there to witness the judging of Duroc hogs, of course. John says that the frost Monday night was a blessing, as it was Sunday at the fair.

Weather Bureau. Charles F. Marvin, Chief.

Weather Forecast for the Week Beginning Wednesday, Sept. 22, 1915, issued by the U. S. Weather Bureau, Washington, D. C.

For the Plains States and Upper Mississippi Valley: Fair weather and moderate temperature the first half of the week, although frosts are probable Wednesday in the Upper Mississippi valley. The weather will become warmer and unsettled by the middle of the week, with scattered showers. The latter part of the week will be generally fair.

KANDIYOHI FARMERS' ELEVATOR. GRAIN, FLOUR, FEED AND FUEL. FAIR TREATMENT RIGHT PRICES. BUY ALWAYS THE BEST. "MASCOT" "ATWATER'S BEST" "GRAIN BELT" Manufactured by the ATWATER MILLING CO.

HEADQUARTERS FOR HARDWARE. ONLY 6 TO 8 H. P. GASOLINE ENGINE REQUIRED TO RUN IT. Also made in three other larger sizes. Fill Your Silo with a Rosenthal Cyclone Feed Cutter and Silo Filler. Self Feeding, controlled by Automatic Governor. Emery Wheel attached to machine for grinding knives. Call and get catalog and further particulars. Our guarantee is backed by the manufacturers—ROSENTHAL CORN HUSKER CO., Milwaukee, Wis.

HARDWARE AND FARM IMPLEMENTS. Another Point or Two About International Harvester Engines. NOTE the frame of this engine. The base carries all the working parts, yet none of them are part of the base. Base and sub-base are separate castings, a precaution taken to avoid unnecessary expense in case of accident. The cylinder also is a separate casting, because a more even thickness of cylinder wall can be obtained in this way. The frame design places the strength where it is needed—at the base, where the power is applied to the crank shaft. Provision is made for large, long, substantial bearings, adjustable below and above, keeping the crank shaft always in line. This base is one of the reasons why I H C engines last such a long time. Nothing can get loose or out of line and there is weight enough to absorb the vibration caused by the explosions. This is one of many features of I H C engines we shall be glad to show you when you come in to see them.

Tending the Baby. But He'll Never Repeat the Performance. By M. QUAD. Copyright, 1915, by the McClure Newspaper Syndicate.

By this time the baby's eyes had got below my hat, and they began to betray a great deal of anxiety. I kept my knees moving and sang to him. I had sung about a rod of "The Old Oaken Bucket," which I have always found to have a soothing effect, and he was looking at me with great curiosity, when a fat woman came sailing along and stopped to exclaim: "Kitchie, what a sweet little baby!"

Walking about with a baby in your arms is rather monotonous on the spine and knees and shoulders, but was invented as an offset for paregoric. I lifted up the baby and took a walk-a-baby walk. As I walked I tried to divert his mind into a new channel by telling him a bear story. He was gradually becoming interested and had probably made up his mind that I was at least his stepfather when a little old man who hadn't the slightest excuse for living blocked my way and shrilly observed: "My wife died and left a baby about as big as him on my hands, and I know how to pty you. Are you raising him on the bottle?"

I went on with the bear story, but it was no use. The baby began to crawl in the face and to kick and growl, and he finally yelled out at the top of his voice. I changed him to the other shoulder, but it was no good. I got him down on my arm and tossed him up and down, but he piped the harder. No fewer than six full grown people at once gathered around to discuss the case, and because I couldn't stand still to answer their questions I heard them say that I was a heartless father and that the Humane society ought to station an agent at the depot.

I carried him over to the ticket office and the information bureau, but here he was not in want of anything in that line. I walked and waved him to and fro; then I stood still and tossed him up and down; then I sat down and bounced him on my knee until his first tooth was almost shaken out. He had made up his mind that things were not according to his logic, however, and he stuck to his story. I don't remember all that was said by the waiting passengers, but here are a few sample specimens from the stock: "No one can make me believe that he is that child's father."

"He doesn't seem to have a spark of love for the poor little thing."

BROOK TROUT.

Science Outdoes Nature in Raising the Young Fish. The brook trout is a neat builder, but does not belong to the group of fish which cares for its eggs and young. When the function of egg laying is completed and the nest covered with gravel the parent fish seem to feel that their whole duty has been performed, and they depart, leaving both eggs and the young when they are hatched to the care of nature, and nature, it must be confessed, is generally neglectful of her charge.

Early in autumn the mature brook trout in pairs seek the gravelly bottoms of shoals and spring runs. Here with nose and fins they hollow out a shallow basin and make it scrupulously clean. This is their nest, and over the bottom the eggs are scattered, covered with gravel, and their duty to posterity is ended.

Only a small proportion of the eggs deposited naturally are fertilized, and many of these are destroyed by spawn eating fishes. Most of the tiny fish which do develop and succeed in punching a hole through the egg shell with their little tails and emerging into a watery world do so only to find quick lodgment in some larger fish. As a foster parent the trout culturist is a greater success than Dame Nature. The latter, under the most favorable circumstances, rarely succeeds in hatching more than 10 per cent of the eggs deposited, while the former expects to develop into wiggling fishes nearly 50 per cent of the eggs obtained.

By Comparison. "Dubbins is a great comfort to me." "I don't see how you can say that. He's the most tiresome chump I have ever met."

"That's just it. Although I don't amount to much, it's true, every time I look at Dubbins I feel that I could amount to less." — Birmingham Age-Herald.

His Favorite Play. Edith—That Mr. Phin is conversationally impossible. Ethel—Why so? Edith—We were talking about the theatre, and when I inquired what his favorite play he said it had any favorite it was seeing a man steal second.—Boston Transcript.

Different. "Your wife came from a fine old family, didn't she?" "No. She brought them with her."—Judge.
