EQUITY LIFE INSURANCE COMPANY

Farmer Owned. Farmer Controlled. Shall we control our Financial Institutions and conserve our own money for our own industrial needs? Big Business and Great Companies became so because those with the courage of their convictions made the investment to give them their start. From this they have grown to enormous proportions. Vast fortunes have been accumulated in this way, and great aggregations of capital thus gathered have been used to control the price of Products, to shape the course of Commerce, and to influence Legislative Bodies to the end that still greater fortunes may be made. Why not take a lesson from the book of big business and do for ourselves what they have done for themselves. We can if we will. Our Salesmen are in your vicinity. Give them a hearing. We are sure you will be interested. Or write us for full particulars. We will be glad to send you full information as to why the organization of the Equity Life Insurance Company is of so much importance to the work of Co-operation, and as to the value and security of its capital stock as an investment.
