Brass Tacks about Threaded Rubber Insulation

The Willard Threaded Rubber Battery is the only battery with Threaded Rubber Insulation between the plates.

The Thread-Rubber Trade-Mark on the battery case is your insurance against all the bothersome, expensive wood-separator troubles.

Threaded Rubber Insulation outlasts the battery plates. It will not check, warp, crack or carbonize. It permits "bone-dry" shipment and stocking of batteries so that the battery reaches you in brand new condition.
