COMPLETION OF ROAD CELEBRATED

Contractor McKusick Host To Hundreds at Atwater Saturday

The completion of the paved highway from Willmar to the east line of the county, a distance of eleven miles from where last year's paving terminus was made, was an occasion of a big jubilee to which Mr. and Mrs. John C. McKusick, the contractor and "chief assistant," had invited all their employees and many friends and public men in the county.

The affair was held at Atwater on Saturday evening. The spacious store room of Strong's Ford Service Station had been cleared for the occasion. Two long tables had been set the whole length of the room. The decorations were real yellow pumpkins and Halloween suggestions. The lights were covered with Japanese lanterns. The occasion was delightfully informal and jolly. A darky band from St. Paul produced the jazzy of jazz music and were placed in a real cornfield setting.

Before the banquet a reel of moving pictures were displayed showing the actual operation of all the different departments of Mr. McKusick's admirable organization, closing with the smiling portrait of the contractor and his "chief assistant."

The banquet After the bounteous and appetizing spread had been done ample justice, Mr. McKusick addressed his guests, taking the occasion to thank his crew, composed mostly of local boys, for their hearty co-operation which has made possible the successful finish of the contract. He thanked the Great Northern Railroad officials for their co-operation. He paid his respects to the County Commissioners, especially Wm. O. Johnson, the state inspectors and other friends who have made during his sojourn here. He called on Commissioner Johnson who responded briefly. Attorney Chas. A. Swenson spoke for the Atwater people and he in turn called on County Attorney Charles Johnson, who made an eloquent address felicitating the community on the completion of a good road between Willmar and Atwater. Mr. Webster, of the State Highway Department spoke briefly giving praise to Mr. McKusick for the efficiency of his work and stating the aims of purposes of the Department.

He stated that the work of engineers and inspectors was more important than most people not familiar with the work will admit, and that money expended for these purposes are not wasted. The Department, he said, aims to give 100 per cent value to the people in the expenditure of road money. At the close the tables were cleared away and those who cared to indulge tripped the light fantastic toe until a late hour when another luncheon was served.

Among those in attendance at Saturday's celebration were members of the county board, the city council of Willmar, Supt. and Mrs. Frogner of the Great Northern, and other citizens of Willmar, representative of material firms in the twin cities and prominent citizens of Kandiyohi and Atwater.

Marks an Epoch The opening of this stretch of paved road really marks an epoch in the history of the county. The road between Atwater and Willmar has always been a nightmare to motorists in periods of wet weather, and the pavement will hereafter at all times link the east and west parts of the county in any kind of weather.

The McKusick Contract Work on the McKusick contract started July 15. Working night and day, 24 hours a day, the eleven miles were completed Oct. 8 at three o'clock, twenty days before the time limit set, Nov. 1. Two hundred men, on the average, have been employed, many of them local people. The average wage was \$5.14 per day. Six hundred carloads of gravel, 500 carloads of sand, 150,000 sacks of cement are among the principal items of material used. The water was piped and pumped by a O. H. & E. Duplex pump, the longest distance being 28,000 ft., and the amount of forms used was 10,000 feet. Two 1442 Oshkosh pavers and 25 Ford dump trucks were used. The equipment included an electric light plant to facilitate night work. Among other work done was the opening of the new gravel pit near Hawick. 150 carloads of gravel were taken there, the balance from the New London pits. The total contract price was \$351,728.00.

The work of shouldering the pavement with six feet of earth road on either side is now in progress with crews of teams and steam shovels, and will continue until frost stops it, but this is not a part of the McKusick contract.
