SEED OF KITCHENETTE SQUASH OFFERED GROWERS Limited quantities of the seed of the Kitchenette Hubbard squash have been placed with various Minnesota seed houses, in order that seed in large enough quantities to supply the possible demand may be grown for sale in 1923. The Kitchenette squash was developed by the section of vegetable gardening of the horticultural division at University Farm, and was named because of its uniform small size which makes it especially desirable for family use. W. T. Tapley, secretary of the Minnesota State Vegetable Growers association, and in charge of the section of vegetable gardening of the university, says every grower who desires to give the Kitchenette a trial can obtain a limited quantity of seed free of charge by writing to him at University Farm.

1500 MINNESOTA JUNIORS ATTEND SHORT COURSES Nearly 1500 Minnesota boys and girls will attend a university short course the present season, according to T. A. Erickson of University Farm, the Minnesota state leader. This estimate is made up of 550 who enrolled for the short courses at University Farm, Crookston and Morris last week, of 170 who attended the Todd county short course at Long Prairie, of 125 who registered for the course in Mil-le Lacs county at Milaca, and of 600 who are counted upon to attend short courses yet to be held in Steele, Wat-onwan, St. Louis and Kanabec counties. Enrollment at University Farm course, April 3 to 7, was not as large as customary owing to the fact that many juniors attended their own county short course instead.

FEW FROM THIS COUNTY Four Deserters Recorded in County During Late War Draft By glancing thru the columns of some of our exchanges we note that many of them are publishing lists of deserters and slackers for their respective counties. The Tribune has been informed that four men of Kandiyohi county have been classed as deserters but for various reasons we are not making public the names. Two of these men gave their addresses as Minneapolis, one from Atwater and one in Lake Lillian township. This number is indeed very small when compared with some of the lists which have been made public in some counties.

HEALTH TALKS (By Dr. Oscar R. Zahr) Curing Disease by Removing Cause Back of many illnesses suffered by your body lies a common cause—low resistance. When the delicate framework of the spinal column is structurally deranged, nerve impulses to vital organs are impeded. Vitality is decreased—resistance is cut down. Nature's protective forces are damaged. It is then the body suffers from organs that fail to function normally, and the lowered resistance predispose to germ invasion. The Osteopathic Physician restores normal position to the spinal segments. Once free the nerve impulses obtain functional control; blood channels supply nourishment, permitting Nature to restore the weakened part. When you think of osteopathy remember it cures disease by removing the cause.—Adv.

A FARMER CURED OF RHEUMATISM "A man living on a farm near here came in a short time ago completely doubled up with rheumatism. I handed him a bottle of Chamberlain's Liniment, and told him to use it freely," says C. P. Rayder, Patten Mills, N. Y. "A few days later he walked into the store as straight as a string and handed me a dollar, saying, give me another bottle of Chamberlain's Liniment; I want it in the house all the time for it cured me."—Adv.
