Cause of Appendicitis
When the bowels are constipated, the lower bowels or large intestines, become packed with refuse matter, that is made up largely of germs. These germs enter the vermiform appendix and set up inflammation, which is commonly known as appendicitis. Take Chamberlain's Tablets when needed and keep your bowels regular and you have little to fear from appendicitis.—Adv.
Aug.

A Full Measure of Service

THE First Quarterly Summary of Refinery Statistics issued by the Bureau of Mines (1922) states that 25% more gasoline was purchased by consumers in January, February and March, 1922, than in the corresponding period of 1921. Many well-informed marketers are predicting that there will be an insufficient supply of gasoline this summer in the Middle West.

The Standard Oil Company (Indiana) has increased its facilities so largely that it feels safe in stating that it will be able to render to the people of the 10 states it serves that degree of service which the public has come to expect from this organization.

The manufacturing facilities of the Standard Oil Company (Indiana) have a capacity of more than one billion gallons of gasoline per year. These facilities are being operated 24 hours every day that patrons may be certain of securing their requirements of petroleum products as they need them.

When the flood tide of demand occurs, car owners will realize that the Standard Oil Company (Indiana) has anticipated their needs fully and completely.

When a motorist fills his tank at a convenient service station in some remote corner of the Middle West, he may never stop to consider the vast and complicated machinery needful to put that gasoline where he wants it at the moment he needs it most. But he will appreciate that it is there.

He may never know that serving him involves experienced executives of trained initiative and resourcefulness; enormous expenditures for labor and raw material; great, modern refineries continuously operated; immense storage facilities; a magnificent distribution system; and the uniform effort of an organization of 25,000 men and women. All this is back of that small quantity of Red Crown gasoline which every summer tourist confidently expects to purchase and surely finds at all points in the territory served by the Standard Oil Company (Indiana).

This the Standard Oil Company (Indiana) considers genuine service.

What Water Does for Batteries

Not too much or too little—but just the right quantity of water ought to be kept in your battery all the time.

The water does two things: it keeps the battery solution over the tops of the plates so that the whole plate surface is used; and it gives proper strength of solution.

Don't hesitate to ask us for water service even if yours isn't a Willard Battery. The Willard Standards of Service are the same for every make.
