A BILL is to be introduced in the next Pennsylvania legislature for the creation of forest reservations at the headwaters of the principal rivers.

A TELEPHONE line between Paris and Antwerp has been open to the public since June 1. A charge of half a crown is made for a five minute's conversation.

The search light to be placed on Mount Washington will be the most powerful in the world, and in clear weather will be seen from sections of all the New England states as well as from parts of New York and Canada.

CATERpillars from six inches to a foot long are common in the vicinity of the Darling river, Australia. The natives twist them together and boil them in kangaroo grease, which is said to make a palatable dish.

THOMAS A. EDISON is the patentee of 600 inventions, yet he and the balance of mankind are still chasing collar buttons and breaking their thumb nails in vain attempts to fix their cuffs in place. Mr. Edison's mission is not yet finished.

In Forsyth county, Georgia, is a carved or inclosed boulder of fine-grained granite about 2 feet long, 4 feet 6 inches high and 3 feet broad at its widest point. The figures are cut in the boulder from one-half to three-quarters of an inch deep.

The 15-inch aerial torpedo thrower, now introduced as a British service weapon for coast defense, resembles in appearance a powder gun, having the axis of its trunnions at or near the center of gravity of the barrel.

The newspapers of Philadelphia which regarded very complacently the Reading-Lackawanna coal combine are beginning to alter their tune. They have discovered that the price will rise \$1 per ton in that town as well as everywhere else.

The total newspaper and periodical circulation of the United States and Canada was placed in 1890 at 41,500,000. The \$800 preacher who occasionally unlimbers his jaw for the purpose of demolishing the press evidently has a weighty contract on hand.

REVOLUTIONS in Cuba are always too well advertised to insure their success. They manage things better in France. They send around no advance agent heralding when and where the great show will occur and inviting people to come and witness it. They have their revolutions, and when it is all over they publish an account of it.

GEN. JAMES SHIELDS, a hero of every American war he could get into, and a United States senator at different times from several states; is living in extreme poverty on a little farm in Ohio at the age of eighty-two. A motion to give him a liberal pension is one of the things nobody ought to object to.

A FAMOUS duchess in London recently went through the ordeal of having a dress made on her own figure. She stood for three hours while the dress-makers wrought fifty yards of rare old lace that could not be cut into a gown for a soiree, at the close of which every stitch had to be carefully cut and picked out before the lady could disrobe. The amount of torture that fair woman will undergo in the name of vanity would astonish the martyrs.

The learned doctors of Paris have come to the conclusion that the disease which has caused so much alarm during the past few weeks is not the true Asiatic cholera. Officially they declare that the disease should be styled epidemic cholerae. As yet no person in Paris or in the farming districts has contracted the disease. It remains stationary in the wealthy and aristocratic suburbs just outside the fortification.

The Empress Eugenie had a passion for pearls and was, in the days of her power, the possessor of a necklace whose largest stones were the size of a pigeon's egg. After the Franco-German war the empress sold the pearls to Mme. de Paena for 300,000 francs, which Mme. de Breton brought to London in a little handbag. Another famous collection of pearls was that which Mlle. Thiers accumulated in three years' search for perfect specimens. These were bequeathed to her sister, Mile. Dosne, and are valued at 400,000 francs.

WHAT WILL BE DONE?

Propositions to Settle the World's Fair Struggle in the House.

WASHINGTON, Aug. 1.—There has been no material change in the attitude of the respective sides in the house with regard to the world's fair appropriation. Members of the house opposed to the appropriation have been discussing propositions looking to a compromise of the difficulties. These include one postponing action on the appropriation until a fixed day in making a loan of \$500,000, to be regarded as a first lien on the receipts of the fair, and allowing the fair management to provide sufficient bullion for the coinage of the amount of money needed to complete all the work in connection with the fair. But the advocates of the appropriation decline at this time to look with favor on any of these propositions, and will insist that they make any pledges concerning their future action, other than to intimate very strongly that they will take the appropriation direct or nothing. They will not listen at this time to a proposition to postpone action on the appropriation, insisting that the house has already recorded its action in favor of it. They therefore see no reason why the matter should be delayed.

In the house to-morrow Representative Holman will call up his joint resolution to extend the appropriations carried by the sundry civil bill or the last fiscal year until August 4. As to-morrow is suspension day, the resolution, it is said, can be called up, notwithstanding the "regular order" is some other motion. This motion, it is understood, will be made by a majority of the world's fair people, who will insist that inasmuch as the sundry civil bill can be enacted into law almost as soon as the joint resolution can be, if the opponents of the fair appropriation will abide by the decision of a majority of the votes cast in favor of it, there is no necessity for the joint resolution extending the appropriation. Mr. Holman says he would not agree to an amendment to the resolution extending the appropriation until December. Such an amendment, if carried, will defeat the world's fair appropriation. The assurance will be made in answer to a suggestion of the world's fair people that he had such an amendment in view when he offered the resolution and which would appear in the reasons why Representative Hopkins Perkins objected to the consideration of the resolution yesterday. Mr. Holman says he expects to see matters reach a crisis Tuesday, although he did not indicate in just what form he thought it would appear.

Representative Holman to-night said he thought the proposition to let the question of the appropriation for the fair go over until December met with the most favor, and he was inclined to think it would be accepted by the friends of the fair. If this should be accepted Mr. Holman said the way was plain for the passage of the appropriation bill and the adjournment of congress. The amendment prohibiting any officer of the government or any person or corporation having contracts with the government from employing Pinkerton police or any other body of armed men, Mr. Holman said, might cause some trouble. He believed, however, that the senate would recede from its disagreement to the amendment.

Arbitration suggested.

BOISE CITY, Idaho, Aug. 1.—A movement is now on foot for some of the leading men to induce both parties in the Court d'Alene fight to submit the whole question to a commission of prominent citizens of Idaho for arbitration. It is admitted that the guilty of murder and arson should be sought out and punished, but there are weighty questions which it is thought can be reached and can be settled only by arbitration. This plan is quietly taking shape, and some definite proposition will no doubt be forthcoming in a few days.

Strikers Rearrested.

WALLACE, Idaho, Aug. 1.—Twenty-eight men from the Gern and Burke, who were paroled a few days ago, were rearrested to-night and brought to the Wallace military prison.

BOISE CITY, Idaho, Aug. 1.—Judge Beatty to-day fixed the bail for the nineteen prisoners from Wallace and Gardner, in jail charged with contempt of federal court, at \$200 each. None have furnished the required bonds yet.

The Charge on Which Court d'Alene Strikers Will Be Tried.

WADSWORTH, Idaho, Special.—A new plan of legal procedure against the prisoners will commence at Wallace to-morrow. United States Commissioner Hoffman of Court d'Alene will open court there and issue warrants of arrest as the cases are brought before him. The report that the United States has decided the union a conspiracy is given co or by some of the authorities. The charge of conspiracy will be entered against all union men, and a separate charge will be entered against those charged with complicity in the Mission affair.

Franklin's Trick.

Franklin wrote the following letter to a man to whom he was lending some money: "I send you herewith a bill for ten pounds; I do not pretend to give such a sum, I only lend it to you. When you shall return to your country, you cannot fail of getting into some kind of business, that will be in time enable you to pay all your debts. In that case, when you meet with an honest man in similar distress, you must pay me by lending this same to him, enjoying him to discharge the debt in a like operation when he shall be able, and shall meet with another opportunity. I hope it man then go through many hands, before it meets with a knave to stop its progress. This is a trick of mine for doing a deal of good with little money."

A Silent Sound.

"Has yer rung de bell for evenin' services?" asked Parson Whangdoodle Baxter of the sexton.

"Foah! God, I done forgot all about hit; I didn't touch de bell."

"Nebber mind, den, as long as nobody heered yer."

At the Grocer's.

"Give me half a pound of tea, please."

"Black or green, Miss?"

"Oh! it's all the same; the missus is blind."
