

**WILLIMANTIC STAR THREAD**

Is pre-eminently the best spool cotton for hand sewing or machine sewing. It is the strongest thread made; it is free from knots, kinks, flaws, or ravel; it is always uniform in quality, thickness and strength. It never breaks itself or breaks the needle; never puckers the seams or throws the tension out of order. It costs no more than poorer kinds of thread. Ask your dealer for it.

Send 2c. and receive 6 spools of thread (any color or number), together with 4 bobbins for your machine, (ready wound) and an instructive book on thread and sewing. Free. Be sure and give the name and number of your machine.

**MR. CARROLL'S GREAT IDEA.**  
It takes a man at his best when he is held up by a robber.  
Taylor Carroll is engaged in devising a formidable system of defense for lone pedestrians when they wander in dangerous places where police protection is ineffective and the risk of being "held up" is ever present. His plan is to convert the erect human body into a miniature revolving turret, armed at four points and capable of dealing death in front, rear or flank simultaneously or of sending four successive discharges in the same direction.

Mr. Carroll's design is still in its rudimentary stage, with numberless minor details to be elaborated, but his central idea is well developed. He says he has not yet prepared diagrams or experimental apparatus, but has merely outlined it mentally.  
"I would have a small storage battery worn in a belt," he said, "with small copper wires running from it up through the sleeves and connected with each hand on the great or middle finger with a copper ring the thumb can reach in the palm of the hand. When the thumb touched the ring, an electrical current would discharge four batteries loaded with ball behind and in front. This discharge could take place when the hands were being held under the threat of an armed robber."

"The ring should be placed beyond the reach of the thumb except in cases of emergency, so the thumb will never discharge the battery accidentally."  
Mr. Carroll is not a practical electrician or mechanic; being an actor by profession. He has not figured up the weight of the storage battery to be carried on the belt, nor is he adverse to considering the advisability of substituting a dry primary cell.

In his zeal for the application of scientific methods to the protection of the citizen the inventor has apparently left out of sight everything but the tactical advantage of the lonely pedestrian attacked in front by the bold marauder or clasped from behind by the lurking garrotter. Thus he has not yet figured out how a slim young man is to avoid assuming Falstaffian dimensions when he braces storage batteries and arsenals around his waist.

Nor does he forecast the possibly tragical consequences that might come day result from the clasp of a loving hand upon the thumb and palm that carried the potential copper apparatus he describes, making inadvertent electrical contact and producing a catastrophe when only endearment was intended.—Chicago Tribune.

**GENERAL GRANT'S FUNERAL.**  
The Procession in New York Was Eight Miles in Length.

The procession, eight miles long, wended up Broadway between lines of old soldiers—flags veiled, drums muffled and arms reversed. The Grant family, except Mrs. Grant, who was unable to be present, followed in four carriages, succeeded by the general's old staff, his cabinet officers and detachments from Grand Army posts. Members of the Aztec club, survivors of the Mexican war, formed a group. President Cleveland rode with Secretary Bayard, and they were followed by the vice-president and the cabinet, the supreme court justices, United States senators and a committee of the house. Governor Hill and his suit and a committee of the state legislature were of the cortege; also gentlemen who had occupied diplomatic and consular offices under Grant while president. Besides all these were official guests filling 150 carriages.

Over the ashes of the man who had said "Let us have peace" all bitter memories were forgotten. Speaker Carlisle and ex-Speaker Randall rode with Congressmen Hiscock and Reed, Senator Morrill with Senator Cockrell, Sherman with Ransom, Ingalls with Harris. Famous Confederates, distinguishable by their gray silk sashes, fraternized with Federal chieftains. Generals Joe Johnston and Buckner officiated with Sherman, Sheridan and Logan among the pallbearers. Three other gallant southerners, Wade Hampton, Fitzhugh Lee and Gordon, were also present at the funeral.—President E. Benjamin Andrews in Scribner's.

**Moving in the Bowery.**  
There was a moving in the Bowery a few days ago, and it was watched with interest by a score or so of passersby. A stout Italian bootblack was transferring his stand to some other part of the town. Just before the moving began the proprietor and his weakened little wife stood beside the stand. The little wife then put a dirty little pillow on her head and stooped a trifle. The husband thereupon picked up the stand with difficulty and balanced it on the little woman's head. Then he took the two chairs and placed them on the stand in such fashion as to secure them from falling. The little wife, having straightened up under her burden and made sure of its equilibrium, started down the Bowery, and the stout husband followed at ease, puffing a cigarette, while the spectators looked on amazed to discover the usefulness of a wife as a beast of burden.—New York Sun.

**Great Wear of Railroad Iron.**  
Taking the total length of the railways of the world at even 80,000 miles and allowing a daily average of 10 trains over each road, it is estimated that the total loss of iron by wear and tear each day of the year is not less than 600 tons. The iron thus lost goes back to the earth in the shape of fine powder, which is finally transformed into soluble iron salts.—St. Louis Republic.

George Eliot's portrait represents her as having a remarkably unprepossessing face, with heavy nose and chin and thick, badly shaped lips. She would be pronounced positively ugly.

In 1880 the amount of capital invested in cotton factories was \$308,000,000; ten years later it had risen to \$584,000,000.

**PRESERVE THE HAIR.**  
Some Useful Suggestions to Those Who Value What Is Invaluable.

Avoid tight-fitting hats and collars, also close fitting caps, unless these be of some porous material. The two former prevent a due supply of blood to the parts; hence the hair papillae are put, as it were, on short commons all the time the hats and collars are worn. The caps engender caloric, which sets up irritation and ultimately that most stubborn form of dandruff—namely, pityriasis (i. e., branny scales). Note that all the headgear which is not porous should be ventilated at top and sides to allow a free current of air.

Never sit or stand with the top of the head near a gas light or lamp light. The heat thrown out is apt to paralyze the scalp tissues and dries up the hair itself. Don't wash the head oftener than once a fortnight, when first rub in the yolk of an egg and thoroughly rinse out with warm water, into which has been thrown a pinch of borax. Dry carefully and apply a little pure olive oil.

Beware of the common practice of dipping the comb in water when arranging the hair. It promotes decomposition and rancidity of the natural oil, and so leads to "rotting."

If the hair be naturally dry, apply a little olive oil occasionally. If naturally oily, occasionally wash away the excess of sebaceous secretion by means of a lather or tepid water and soap bark (Quilaya saponaria).

Salt water is most injurious to the hair, for which reason when sea bathing wear an oil cap.

Always treat the scalp as if you loved it. Take to heart Dr. Godfrey's dictum that "every touch affecting so delicate a texture as the scalp should be soft and soothing, every application bland and mild." Don't use stiff bristled or wire brushes, and in all cases brush gently. Also, always brush out the hair before attempting to comb it, and use the comb as little as possible.

Have the ends of the hair clipped once a month, if only to prevent them from splitting. But don't close crop.—Philadelphia Times.

**SHE OUTTALKED DUMAS.**  
How a Clever Irish Girl Got Ahead of the Academician.

Dumas fils had curt manners. He was shy. Like most shy people, he vanquished this defect by going into the other extreme. He softened as he grew old and took a relative polish at the meetings of the academy. The tongue was always shrewd; it could be cruel. The code of social amenities was at the time I speak of a sealed book to him. I recollect a tilt between him and an Irish girl, brought up in Paris, who sat opposite to him at dinner. She was singularly plain. But her ugliness was most amusing, and she was a witty, good tempered being. The nose was short, funny, retrouse, the mouth wide and laughing and the tongue lipping, but, as the French say, bien pendue for repartee.

Dumas, after staring some time at her, put his forefinger to the tip of his semiquiline nose and pushed it up. He kept it so for some time, still staring. The pantomime was grossly impertinent. I thought—and so did every one else—that the poor girl would burst into tears. She laughed, not a bit hysterically, and feeling she was an object of general attention and of sympathy, made a funny remark on the grimace that M. Dumas was pleased to give himself. He began to rally her. She flung back retorts. I never heard such a mimic war of words before or since. It ended in a splendid victory, through good humor and wit, on the young lady's side. She spoke French to perfection. "M. Alphonse" was then on the stage. Mr. Ernest Pinard, who listened with rapture, cried, "Mademoiselle enfonce votre Alphonse!" Alphonse was the comic actress in that play.

Dumas retired from the combat nettled, but he did not long bear malice. He afterward said what a pity it was that la jeune Irlandaise etait dans le monde. She had the vis comica in a greater degree than any actress or actor he had ever seen, and proved that where l'ame est bien faite there cannot be ugliness.—Paris Letter in London Truth.

**Schiaparelli.**  
Schiaparelli, the astronomer who first discovered the so called "canals" of Mars, did so with a much smaller telescope than those in use in many other observatories at that time. And yet he is a very nearsighted man. Garrett F. Serviss of Brooklyn, in speaking of his first interview with the eminent Italian, said that Schiaparelli would hold a visitor's card within five or six inches of his eyes in order to decipher it. The singular part of this story is not that a man with such an infirmity should be able to outdo other astronomers, for keenness of vision depends rather upon the retina than the convexity of the lenses of the eye, and the eyepiece of a telescope can be focussed so as to suit the latter. But it does seem a little odd that the gifted scientist in question should habitually refrain from wearing eyeglasses. Possibly he has a theory as to the effect of their use upon his visual power.

**The Way to Eat Candy.**  
I think much of the outcry against candy is the result of wrong methods of use. It can often be safely taken at meal time with good results. Scientists say that the food value of sugar is very great. A pound of sugar contains much more energy and power to support animal life than a pound of meat. If candy is taken under such conditions that it will not derange the digestive apparatus, it is perfectly wise and rational to be a candy eater.—Annals of Hygiene.

**Mortgage Foreclosure Sale.**

Default having been made in the payment of \$400.00 principal, and \$22.50 interest, which is due and unpaid at this date, upon a certain mortgage duly executed and delivered by Andrew Nilsson, and Ida C. Nilsson, his wife Mortgagors, to C. H. Ross, Mortgagee, bearing date the first day of December 1891, and with a power of sale therein contained, duly recorded in the office of the Register of Deeds in and for the County of Brown and State of Minnesota, on the second day of December 1891, at 11 o'clock A. M. in Book V of Mortgages, page 149, which said mortgage together with the debt secured thereby, was duly assigned by said C. H. Ross, Mortgagee, to C. H. Chadbourn, by written assignment, dated the 9th day of February 1892, and recorded in the office of said Register of Deeds, on the 15th day of February 1892, at 10 o'clock P. M. in Book W of said mortgage records, on page 64; And Whereas said C. H. Chadbourn, the said assignee, and owner, and holder of said mortgage, has duly elected, and does hereby elect to declare the whole principal sum of said mortgage due and payable at the date of this notice, under the terms and conditions of said mortgage and the power of sale therein contained; and whereas there is actually due and claimed to be due and payable at the date of this notice the sum of six hundred dollars with interest thereon at the rate of eight per cent, per annum, from the first day of December 1891, and whereas the said power of sale has become operative, and no action or proceeding having been instituted, at law or otherwise to recover the debt secured by said mortgage, or any part thereof. Now Therefore, I, C. H. Chadbourn, by virtue of the power of the power of sale contained in said mortgage, and pursuant to the statute in such case made and provided, the said Mortgage will be foreclosed by a sale of the premises described in and conveyed by said mortgage, to-wit: Lots (10) fifteen (15), fourteen (14) and fifteen (15) of Section No. thirty-one (31) in Township No. one hundred eight (88) of Range No. thirty-one (31) containing one hundred and sixty acres of land, more or less, according to Government survey thereof, in Brown County and State of Minnesota, with the hereditaments and appurtenances which sale will be made by the sheriff of said Brown County, at the front door of the Court House, in the city of New Ulm in said County and State, on the 3rd day of March 1892, at ten o'clock A. M. of that day, at public vendue to the highest bidder for cash, to pay the debt of six hundred dollars, and interest, and the taxes, if any, on said premises, and fifty dollars, attorneys fees as stipulated in and by said mortgage, in case of foreclosure, and the disbursements allowed by law, subject to redemption at any time within one year from the day of sale as provided by law.

Dated January 8th A. D. 1892.  
C. H. Chadbourn, Assignee of Mortgagee.  
Frank L. Randall, Attorney for assignee of mortgage, Winona, Minn.

State of Minnesota, County of Brown, I ss, befor me, J. J. Conover, Special Term, December 31st, 1891.

In the Matter of the Estate of Joseph Hilbinger, Deceased.  
Letters of Administration with the will annexed on the estate of Joseph Hilbinger, deceased, late of the County of Brown, and State of Minnesota, being granted to Joseph A. Eckstein.

It is Ordered, That six months be and the same is hereby allowed from and after the date of this order, in which all persons having claims or demands against the said deceased are required to file the same in the Probate Court of said County, for examination and allowance, or be forever barred.  
Further Ordered, that the first Monday in July A. D. 1892, at 10 o'clock A. M., at a general term of said Probate Court, to be held at the Probate Office in the Court House in the City of New Ulm, in said County, be and the same hereby is appointed as the time and place when and where the said Probate Court will examine and adjust said claims and demands.  
And It is Further Ordered, that notice of such hearing be given to all creditors and persons interested in said estate by forthwith publishing this order once in each week for three successive weeks in the New Ulm Review, a weekly newspaper, printed and published at the city of New Ulm, in said county.

Dated at New Ulm, Minn., this 31st day of December A. D. 1891.

By the Court, Jonas Lundenschlager, Judge of Probate.
