George W. Somerville, of Brown county, who is a candidate for the Second district congressional nomination against McCleary, was interviewed in Sleepy Eye by a Minneapolis Journal correspondent as to his position on the money question, and here is what he said:

"I thoroughly believe in the Republican national platform adopted in 1892, and am utterly and uncompromisingly opposed to the free and unlimited coinage of silver, at any ratio, under present conditions. I favor the use of gold, silver and paper to any extent that may be safe and expedient, the all desirable being the circulation of the mediums side by side, one on a parity with the other, and one exchangeable for the other, at the option of the holder. I do not favor monometallism, whether of gold or silver. There is a difference of opinion as to how this happy condition may be brought about, but I incline to the belief that the restoration of silver can best be accomplished by international agreement."

"Once and for all, I want it thoroughly understood that I am opposed to free silver coinage, and that I have an abiding faith that the Republican party is equal to the task of settling the question satisfactorily to all interested, and that is, the whole people."

He is Wonderful.
Remenyi, the great violinist, was at St. Peter last week and the Herald says:

In the hands of the ordinary performer a Stradivarius or a Cremona violin is also an ordinary thing. In the hands of an artist it is a thing of life and when it is controlled by genius, when struck by the weird musician, it is capable of swaying a multitude. It was so on Tuesday night when Remenyi moved his audience with pathos and all the fire of music. They dreamed as he dreamed, and they sat with him in the presence of the choir and listened to the chorus as it filled the vast cathedral. They heard the storm and as the sun broke through the clouds his music became as gentle as the pattering rain and as fresh as the carol of the birds. They were moved again by the sweet strains of Schubert's serenade and they listened with ecstasy to the Spanish dance which was not less fantastic than summer's heat and at the close they were borne out with the Ava Maria, which came like a benediction. The people of St. Peter expected much from Remenyi, the son of that land whose music is both wild and sweet, and they were not disappointed, but on the contrary they were charmed. He was supported also by a company of rare artists, these being Miss Pauline Stein, who has a pure and rich soprano voice, Miss Louise Roman, a pianist of exceptional merit, and Mr. Davis, baritone. One of the happiest numbers was the last on the program in which all appeared, the number being Ava Maria.
