ELEVENTH PLACE FOR MINNESOTA

Gopher Rifle Shots Make Good Showing at Camp Perry, Ohio.

The close of the national team shoot at Camp Perry found Minnesota in eleventh place. This was in competition with forty-nine teams from all parts of the country.

After the skirmish Minnesota was in sixth place, but in the rapid fire and fixed distances our home team experienced a little hard luck.

The total scores made by the individuals of the team were as follows:

Lt. Lang	301
Sergt. Peterson	287
Capt. Clark	279
Lt. Leson	276
Sergt. Major Juni	276
Major Rescke	273
Capt. Falk	273
Musician Hall	273
Sergt. Simpson	273
Sergt. Lang	267
Private Britton	251
Sergt. Madsall	238

The position of the first fifteen teams was as follows: First, United States navy, 3,421; second, Massachusetts, 3,418; third, Ohio, 3,368; fourth, United States cavalry, 3,366; fifth, Washington, 3,361; sixth, United States naval academy, 3,347; seventh, Pennsylvania, 3,346; eighth, United States army, 3,339; ninth, New York, 3,322; tenth, New Jersey, 3,317; eleventh, Minnesota, 3,249; twelfth, Illinois, 3,242; thirteenth, Wisconsin, 3,218; fourteenth, United States marine corps, 3,184; fifteenth, District of Columbia, 3,178.

The United States naval academy team won the National Rifle trophy, the Massachusetts team will be awarded the Hilton trophy and the Ohio team will receive a bronze statue, "The Soldier of Marathon." The next three teams will receive cash prizes and a medal.

The conditions on the 1000-yard range during the close of the national match were distressing, the hot sun causing mist to rise from the damp green ground and form shifting mirages between the targets and the firing line. Some of the marksmen were almost exhausted by the strain and humidity and sought their quarters for rest before lunch.

Hundreds of spectators banked the ropes back of the firing line as the match drew to a close, and the range officers repeatedly had to warn them against noise that might confuse the contestants.

Midshipman Lee, nineteen years old, won the individual championship, defeating crack shots from all branches of the service. The title carries with it an autograph letter from President Roosevelt.

Sergt. Major Juni of this city won a silver medal and also a bronze medal. In the skirmish he made 76, at rapid fire 35, at 200 yards 43, at 600 yards 39, at 800 yards 49 and at 1000 yards 34.

James Klein, Northwestern station agent at Milroy, has been transferred to Sanborn.

THE BROWN COUNTY FAIR'S GREAT RACE PROGRAM.

Not since the year when the Brown County Agricultural Society first opened its driving park to the public has there been such a splendid prospect of fine races as is being offered for the Fair which opens on the 16th of this month.

Only two days of the Fair are to be devoted to racing, the 17th and 18th, but for the events of these two days as many as forty-five horses have been entered. The program for the first day or September 17th, with the list of horses and their owners is as follows:

Big Boy	C. W. Riesce of Marshall
Alice Medium	Wm. Duffy of Mankato
Subscription	John Fry of Brandon, Manitoba
Lee W	F. Mansfield of Arlington
Fred G	Thos. Graham of Rochester
Hibiscuss	J. E. Marshall of Stevens Point, Wis.
Dr. T	Frank Thornhill of Spring Valley
2:10 Trot or 2:17 Pace.

AN INSECT PLAGUE.

The Mosquitoes That Infest the Region of Lake Nyassa.

In his book "From the Cape to Cairo" E. S. Grogan writes: "The Kungu fly, which is peculiar to Lake Nyassa, resembles small May flies, and at certain seasons of the year they rise from the water in such stupendous clouds that they blot out the whole horizon. Seen in the distance they have exactly the appearance of a rain-storm coming across the lake. When they are blown landward they make every place uninhabitable by the stench which arises from the countless millions that lodge and die on every inch of sheltered ground. I myself have seen them lying a foot deep in a room, and I was told that they are often much worse. The natives sweep them up and make cakes of them.

"Biting and poisonous ants are another pest, but the mosquito is the great enemy of man. It was absolutely necessary to turn in half an hour before sunset and to make all the preparations for the night. I piled all my belongings round the edge of my net and kept a green wood fire burning at each end, and then I lay inside, smoked the native tobacco and prayed for morning. As soon as the sun went down the mosquitoes started operations.

"It was like having a tame whirlwind in one's tent. They could not possibly have been worse. Every night 200 or 300 contrived to enter my net—I have no idea how. The most pernicious and poisonous kind was a very small black mosquito that might possibly have penetrated the mesh. I used to turn out in the morning perfectly dazed from the amount of poison that had been injected during the night."

CUNNING OF MUSKRATS.

Foresight With Which These Animals Build Winter Homes.

In the month of March, before the rivers have opened, on the snow around the heads of the creeks and about the airholes in the thick ice may be seen the curious trail of the muskrat. It can readily be recognized by the firmly planted footmarks, heavily and slowly impressed, and the sharp after drag of the long, scaly, bladderlike tail. All through the cold winter months these heavily furred animals have lived warm and comfortable in their well constructed houses, rearing their third and last litter. One house erected about September seemed planned with almost human foresight. Here, with their long sharp teeth and strong, inch long claws, they had cut and cleared wide paths through all the marshes—paths so deep that three feet of ice did not close them, so wide that we have often paddled along them, marveling at the great floating masses of torn up aquatic vegetation. These paths were a hundred yards long and four feet wide and were cut through a mass of tangled cover high enough in most places to thoroughly conceal a duck hunter and his canoe. In the winter months the muskrats can easily dive from their houses into these under ice channels, and the whole marsh is before them to choose their meal from. The long yellow roots of the flag and the juicy tubers of the wild onion (the muskrat apple is the more poetic Ojibway) hang exposed before them or are readily torn out.—Bonnycastle Dale in Outing Magazine.

Thoughtful.

"Lady with a flashy paste necklace wants to know whether it's pure diamond or not," said the jeweler's shopman.
"Look like married woman?" inquired the jeweler.
"Yes, sir."
"Tell her it is. No use making trouble for poor husbands these hard times."—London Telegraph.
