A fire broke out at the Groebner's Restaurant, which threatened to consume the building, but through the prompt action of the fire department and of Jos. F. Groebner this danger was eliminated. The fire started in the kitchen where a gasoline stove was burning. The wall paper caught fire from the heat and the flames rapidly spread over the whole room. A fire alarm was turned in, the department promptly responded. Jos. Groebner carried out the stove, thus avoiding an explosion of the gasoline tank. On the arrival of the department the flames were soon extinguished by chemicals and it was not found necessary to turn on the water. The damage amounted to about \$30.00. Had an explosion of the gasoline tank taken place, the whole building would have been an easy prey for the flames.

For a week the farmers have been reporting to this office from different portions of the country that grasshoppers were becoming much less or had disappeared entirely. It is now a settled fact that they arose and flew away during the several warm, sunny days when the wind was in the north-west. Their disappearance is almost as mysterious as their going thirty-five years ago, when after doing great damage in this state for several years, the great swarms of Rocky mountain locusts on an afternoon in the latter part of June arose from the ground with a mighty buzz and whir and sailed away, hardly a hopper being left behind. It is not known what became of them. There was no record that they ever lit and their flight on that sunny afternoon caused them to be completely disappear as though they had sailed away to the Planet Mars.—Fairmont Sentinel.

The B. & T. Club played a pick-up team last Sunday and beat them with the score of 6-3. The game was a fast one and no scores were made until the game was half over. There were players on the side of the pick-up who have some reputation as good players, but the B. & T. boys beat them in spite of that fact. Fourteen strike-outs were made by the pick-up team and only twelve for the other side. With the necessary practice, we expect the B. & T. Club to become one of the fast teams of this city.

Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.
