

Of Interest To Our Out-of-Town Readers

14th ANNUAL CONCERT SECOND REGIMENT BAND M. N. C.

TURNER THEATRE Sunday Eve., March 30th

PROGRAM

- PART 1.
- (a) Choral "St. Bride's"..... Dr. Howard
 - (b) March "Nat. Spirit"..... F. W. Hager
 - Overture..... "La Giza Ladra"..... Rossini
 - Historical..... The Skibbereen Sheik..... G. L. Tracy
 - Cornet Solo..... Amaranth..... J. C. Heed
 - Characteristic March..... The Roaring Volcano..... E. T. Paul
- PART 2.
- March..... American Republic..... H. H. Thiele
 - Overture..... Morning, Noon and Night in Vienna..... Suppe
 - Baritone Solo..... German Air Varié..... J. Schvamm
 - Selection..... Ernani..... G. Verdi
 - March..... Gallant Fifth..... Fred Lax
- PART 3
- Humoristisches Terzett..... "Die Listige Vroni."

Feeding Dairy Cows.

Professor Haecker's New Bulletin Just Issued From University Farm.

While Minnesota has made remarkable progress in improving the quality of her dairy products, the advancement in milk production has not been so great. The average cow in this state produces about 175 pounds of butter a year. Common cows at the University Farm have produced, on an average, 222 pounds of butter. This increase has been brought about through proper attention to feed and care. Farmers, as a rule, give too little time to the study of feeding. In order to aid them in this study, Professor T. L. Haecker, chief of the division of dairy and animal husbandry of the agricultural college, has prepared a bulletin in which he simplified the rules, and so arranged the tables that any farmer may easily learn to calculate rations for the cows in his herd.

The author was among earliest workers on the problem of food requirements for milk production, and as a result of his scientific investigations worked out the Haecker feeding standard, a standard which is now accepted by investigators and teachers as the most accurate means of determining the needs of the cow. This standard is given, and so arranged, that the requirements of any cow, the quantity and richness of whose milk yield is known, may be determined by referring to the tables. The composition of all our common feed stuffs is given in amounts from one to ten pounds. Following these tables is a simple explanation of the method to follow in calculating rations. Examples are given of rations suited to cows giving varying quantities of milk of varying richness. A chapter is devoted to the care of the dairy herd. The importance of regularity, of kindness, of system, is considered. The care and feed of the dry cow, of the cow previous to calving, of the calf and of the fresh cow are all discussed in such a thorough and yet simple manner that they cannot fail to stimulate the dairyman to give these matters closer attention. Tables are given which show the cost of a pound of feed when a ton costs a given price. Similar tables are provided which enable the farmer to determine the cost of a pound at a given price per bushel. This bulletin is one of the regular Experiment Station series, at the same time the matter has been printed in a smaller form of convenient size to slip in the pocket and provided with a stout cover. This publication should be in the hands of every milk producer in the state. Copies may be secured by addressing Dairy and Animal Husbandry Division, University Farm, St. Paul.

FARCY OR GLANDERS.

Any Suspected Case Should Be Examined by Veterinarian.

Horse owners should understand that farcy is simply a special form of glanders; that exposure of a healthy horse to a case of farcy may result either in the ordinary form of glanders or in the farcy form, or that in-

Photo Minn. Agricultural College.

GLANDERS-FARCY.

A plain case; chronic type. Note the swelling and "farcy buds."

fection from an ordinary case of glanders may reappear in the farcy form. They are not two separate diseases as frequently understood. Any suspected case should be examined as soon as possible by a competent veterinarian, for such horses are constantly dangerous to persons who handle them as well as to other horses. Human glanders is a very fatal disease.—Dr. M. H. Reynolds, University Farm, St. Paul.

Lots for Sale.

The following lots will be sold cheap: Lot 11 Block 111, Lots 1 and 2 Block 155, and Lot 6 Block 1-6 all South of Center Street, New Ulm. Inquire of ALBERT STEINHAUSER, 461.

What Does the Test Mean?

By J. O. RANKIN, University Farm, St. Paul.

In a recent number we gave directions for making a germination test of seed corn. By this time our readers no doubt have the test under way, and the next question is one of interpreting the test or knowing just what ears to discard.

It is pretty generally agreed that it will not pay to plant any ears unless at least nine out of every ten kernels germinate strongly in the testing. If the test has been carefully conducted, there is a better chance for strong germination in the box than the seed is likely to find under field conditions where temperature and moisture and seed beds are not so thoroughly under control. The next question is what kernels in the test we regard as strong. The accompanying photograph will help to answer this question. The kernel on the right has germinated as it should and shows good development of both stem and root. The one in the mid-

Photo Minn. Agricultural College.
Kernels from the germination test.

dle has no stem and it should be regarded as strong in development. The one on the left cannot be regarded as strong, because no root has yet appeared. Of course, all three of the kernels shown here will sooner or later show both roots and stems, but only that which makes a prompt, vigorous start should be counted among the nine or ten strongly germinated kernels, which we demand of the ears which we intend to use for seed.

INCUBATOR AND BROODER

Necessities Where Fowls Are Raised in Large Numbers.

A good hen is a better hatcher than any incubator man has yet devised, but for raising fowls in large numbers an incubator is a necessity and a wise investment. Follow the directions that come with the incubator, always with the addition of common sense and judgment. The incubator should be disinfected between hatchings.

The brooder and pens should be perfectly clean when the chicks are put in, and supplied with plenty of fresh air. The brooder should supply an opportunity for the chicks to select their own temperature. They will do this when a day old. A chicken will never forget the place where it has found protection and comfort, and will return there naturally. It also instinctively seeks a higher plane, so the source of heat in a brooder should be above the level of the floor. A temperature of 100 degrees should be maintained. More chicks probably die from lack of heat, or the inability to get away from it, than from improper feeding.

The floor of the brooder should be kept covered with dry soil and fine litter.—Alice McFeely.

PURE SEED.

Red River Valley Farmers Should Secure Seed From Crookston.

The farmers of the Red River valley and Northwestern Minnesota may secure pure bred pedigreed seed wheat, oats and barley from the Northwest Experiment Station at Crookston for starting pure seed plots on their own farms. Send to the station for information regarding this pure seed work. Nothing will repay the farmer so well as to use the best seed possible and to improve his seed by selection from a pure seed plot. In three years' time it will be possible to have your farm sown to improved seed. The Northwest Experiment Station is ready to assist farmers in that part of the state to do this work.—C. G. Selvig, Superintendent, Northwest Experiment Station, Crookston, Minn.

For Sale.

The Puengel farm in the Town of Milford consisting of approximately 158 A. Also Lot 14 Block No. 1 North in New Ulm. Lot 4 Block No. 150 North in New Ulm. Lot 6 Block No. 128 South and Outlot No. 271. Inquire of ALBERT STEINHAUSER

Courtland

Mr. and Mrs. Lorenz Hunziker and son visited at Chaska over Easter.—Herman Herberich of New Ulm was a visitor here Sunday.

Mr. and Mrs. Aug. Boyer visited at New Ulm Sunday.

Henry Guemmer and Miss Lydia Fluegge visited at the Fluegge home in Brighton last Sunday.

Oscar Spelbrink of New Ulm was a business caller here Wednesday in the interests of the Fortschritt Publishing Co.

Mrs. Fred Precht and daughter of St. Clair visited here last week.

Mat. Engesser of St. Peter was a business caller here one day last week.

John Studtman was a business caller at Mankato last Wednesday.

Miss Martha Raedeke spent her Easter vacation at home with her folks at Carver.

H. F. Lange and M. A. Sobons were business callers at New Ulm Wednesday.

Mr. and Mrs. H. E. Stellmacher called on New Ulm friends Thursday.

Mrs. Wm. Hulke and children visited at Wood Lake over Easter.

Subscribe for the New Ulm Review and get all the news while it is new and best of all, get and read the truth.

A retraction, harmony and peace was promised, but instead another rotten lemon was handed out by the Journal. We wonder if the Journal really thinks that the Courtland people are so eager to read all such nonsense as it prints. Well, it's a good thing to boast one's self if no one else does it; that must be what the Journal thinks. We fail to see where they get their unreliable information and false stories. Now, why don't they admit that they were wrong? We also fail to see why they keep on airing the trial of a law suit all the time, when there is nothing to it. Why don't they talk harmony and peace rather than to drag the fire a burning when it is comfortable without? There was no one but the Journal that mixed themselves up in the Courtland trouble in the first place and it seems that they take an awful interest in such minor affairs. If they want to take such an active interest in our affairs why not move the Journal down here to Courtland so that they can post themselves better and more correctly on our affairs. Probably they could get more reasons then to get into trouble with Courtland. It is always advisable to let well enough alone, and Courtland will take care of its self.

HANSKA

Geo. Bjorneberg was a New Ulm caller Friday and Saturday.

Miss Inga Torgimsson who visited the past week at the home of Karl Stone in New Ulm returned Saturday.

Miss Anna Jacobson spent Friday and Saturday at the home of her brother in St. James.

Clyde and Tilden Thorndson, Ingeborg Ellen and Christ. Kjolstad returned home Saturday having completed the first year's work at the Minnesota Agricultural School.

Wm. Jahnke spent Saturday and Sunday in New Ulm.

Mrs. Emil Hage and baby, Helen, who have been visiting with Miss E. Anderson left Saturday for St. James to spend Easter with Mr. and Mrs. Lobben.

The Misses Hildegard Julius and Martha Winkelmann spent the week end at home in New Ulm.

Mrs. Elmer Oaren entertained at whist Thursday evening in honor of Miss Johanna Vik.

Geo. W. Chambard and A. R. Eggenberger were St. James business callers Thursday and Friday.

Many Children are Sickly.

Mother Gray's Sweet Powders for Children Break up Colds in 24 hours, relieve Feverishness, Headache, Stomach Troubles, Teething Disorders, and Destroy Worms. At all druggists, 25c. Sample mailed FREE. Address, Allen S. Olmsted, Le Roy, N. Y. Adv 11-14

Golden Gate.

Mrs. Chas. Robertson and daughter Ellen left Sunday for Eugene, Oregon where they will spend several months visiting relatives.

Miss Nellie Hanson spent the week end with Sleepy Eye friends.

Arthur Raymond, senior dental student at the University of Minnesota spent his Easter vacation with friends at this place.

Chas. Werring of Sleepy Eye transacted business here Wednesday.

Three children of John Steffel have been quite ill with scarlet fever but are somewhat better at this writing.

Born, to Mr. and Mrs. Frank Mathiowitz, a daughter, on Wednesday, Mar. 12.

Carl Case of Sleepy Eye is visiting at the Mike Kuelbs home this week.

Charles Palmer and family were guests of Sleepy Eye relatives on Easter Sunday.

Miss Alice Weiser spent her Easter vacation at the home of her parents in Vernon Centre.

Mr. and Mrs. Wm. Miller attended the funeral of Mrs. H. F. Koehne at Sleepy Eye Monday afternoon.

C. N. Robertson of Sleepy Eye was the guest of his father Chas. S. Robertson over Sunday.

Miss Verna Wooley spent Sunday with her mother in Sleepy Eye.

MANY A SUFFERING WOMAN

drags herself painfully through her daily tasks suffering from backache, headache, nervousness, and loss of sleep, not knowing her ills are due to kidney and bladder troubles. Foley Kidney Pills give quick relief from pain and misery, a prompt return to health and strength. No woman who suffers can afford to overlook Foley Kidney Pills. O. M. Olsen. Advt.

Cottonwood & Searies.

Raymond Dittich who is attending the St. Thomas College at St. Paul, spent his Easter vacation with his parents Mr. and Mrs. Anton Dittich.

Otto Groebner who is taking up medical studies at the University is spending his Easter vacation with his parents.

Raymond and Jeannette Dittich left for Lambertson last Saturday afternoon where they will visit with relatives for a few days.

All the farmers are cleaning seed wheat and are otherwise preparing for seeding.

Last Saturday Miss Mary Meidl and Otto Clobes went to the cities where they intended to get married. Only the closest relatives knew of it and the marriage was quite a surprise to the neighborhood. They intend to stay in the cities. Otto Clobes is a son of John Clobes in Lafayette township. He has lived with his father most of the time but during the last month has been helping Adolf Clobes who has a saw-mill in Home township. Mrs. Clobes is a daughter of Geo. Meidl in Brighton.

FOR RENT—The store building on the corner of Minnesota and First North Streets now occupied by Bastian, Marti & Brandle. For information apply to Somsen, Dempsey & Mueller. Advt if

News Items—Rt. 3.

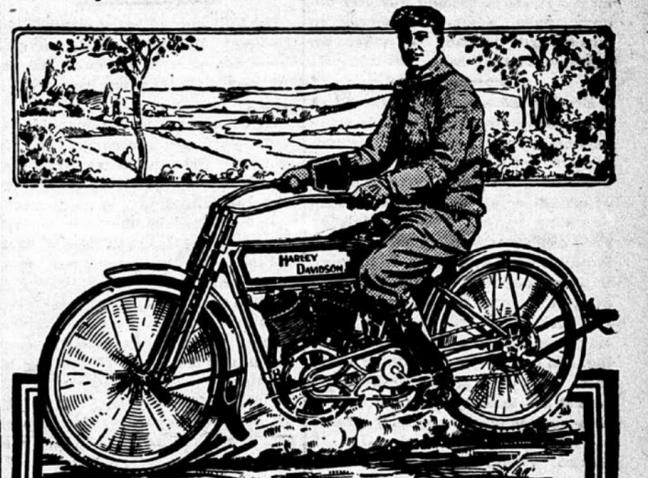

WANTED—Boy to learn printer's trade. One who can read both English and German. Must be bright and willing to work. Apply at Review office.

We have one or two slightly used pianos and a Williams Piano on our floor which we will sell at very low prices if taken at once.

Adv W. J. WINKELMANN

WANTED—a competent girl to do general housework. Only two in the family. Will pay good wages. Inquire at office of N. Henningsen. 12-14 Advt

The Greatest Harley-Davidson

Eight Honest Horsepower.

THE new Harley-Davidson Twin Cylinder does not have to be babied, nursed or coaxed into action—it is ALL THERE. It is instantaneously responsive to the throttle—off like a flash—picks up quickly—no hesitation—no sluggishness—no snorting or popping. This new

HARLEY-DAVIDSON

without question is the fastest machine on the road today.

Its exceptional speed has been obtained in a measure through the use of large intake and exhaust chambers and passages; and pistons, connecting rods and fly wheels individually and collectively in perfect balance. And this speed comes without sacrificing one atom of Harley-Davidson reliability or endurance. In fact the decreased vibration, due to more perfect balance of the vital parts has actually increased the life of the motor.

The Ful-Floting Seat which does away with all jolts and jars due to rough roads, and the Free-Wheel Control, a device which permits starting without the usual hard pedaling or running alongside are incorporated in all models.

Both of these features are patented and are to be found only on the Harley-Davidson.

Call for a demonstration or send for literature.

E. L. LARSON AUTO CO

NEW ULM, MINN.

College Heights.

Last Saturday our boys were very much surprised to see J. Wirth, who had been teaching school at Wood Lake, back to visit a day here. Sunday he left on the 3:40 for Nicol's to wield the rod there till the latter part of June.

About 20 students got permission to go home for confirmation on Palm Sunday.

J. W. Ulrich was in the dormitory the other day. He is gradually gaining in strength.

We'll have a new inspector after Easter, as H. C. Nitz wishes to resume his studies at Watertown.
