The Young Ladies' Society of the Catholic church held a basket social at the Catholic school hall last Wednesday evening. It was a well attended affair and successful in every way.

Dr. J. L. Schoch contemplates the erection of another new residence on the corner of Broadway and Fifth South street. It probably will be a two-apartment building for renting purposes.

The interior arrangement of the county treasurer's office has been switched around in order to gain better light for those working on the books and to give more room for those waiting to transact business.

New fire extinguishers were given a trial near the city light plant last Sunday forenoon, the demonstration attracting quite a crowd. An oil-soaked barrel was used to show what the new chemical would do, but the apparatus will be given a further test by the department before a change from the present extinguishers is made.

H. R. Schwartz will build another new residence on either State or Washington streets in the course of the coming summer. Mr. Schwartz's plans include a private automobile garage connected with the house, this being the style of houses now being built in all larger cities. A driveway will lead up to the garage from the street and in case of bad weather the occupants of the machine can step right into the house without getting wet.

An action has been started by Messrs. Somsen and Arbes against F. A. Schrupp, to recover damages to the amount of \$200, said to have been sustained as the result of a boiler explosion in the basement of the Schrupp store. It seems that the proprietors of the building paid Mr. Schrupp for taking care of the heating plant (\$5.00 per month) and now expect him to make good the damages caused by his alleged carelessness. Papers were served on Mr. Schrupp shortly before he left for his new home in Brownston.

Rubber goods, used in such great quantity by the automobile tire manufacturers, are beginning to soar in price with all the other articles imported from Europe and South America. Just why the price of rubber should go up, is hard to understand in view of the fact that rubber is raised in great quantities on the American continent, but it seems the great demands made by the warring countries upon this sort of material have caused a shortage of supply. Ocean freight rates also have been greatly advanced and this is given as an additional reason for the raise. Local dealers say they expect that the recent advance of 10 per cent will be followed shortly by another of 10 or 15 per cent.

Inspectors of the state dairy and food department are said to be going about the state investigating the conditions under which cream for the market is being separated on the farms of the state. It is said that many cases have been found where farmers keep their separators in the stables and handle the milk where it absorbs the noxious odors common to barns. Where such conditions are found by the inspectors the offending farmer is hauled up before a justice and fined. He is also compelled to either provide for more sanitary conditions at his stables or quit selling cream. The inspectors are urging farmers to remove their separators to some other place than the barn, no matter how clean the latter is being kept.

Alb. Stork was in St. Paul and Minneapolis Saturday of last week.

Automobiles are again out in numbers and the professional men are once more answering calls from the country with greater speed. Owners of machines who have had their cars stored away for the winter are beginning to take invoice of the repairs necessary, preparatory to the season's use.

On account of the recent great increase in the cost of structural steel, an addition, that was to have been built to the State Hospital for the Insane at St. Peter, will have to be postponed. The legislature did not anticipate the advance in steel prices and if the addition is erected at all the plans will have to be altered considerably.

Hanska is about to lose its mayor and otherwise prominent citizen, Alfred B. Ouren, cashier of the Security State bank of Hanska, who has accepted the cashiership of the State Bank of Richville, Ottertail county. Mr. Ouren was born and raised in Hanska and although still a young man is regarded as one of that village's most progressive citizens.

Bergren and Mr. and Mrs. Aaron Johnson of Lafayette; Ben Swenson of St. Paul; Emil Hagberg of Lafayette and Victor Johnson of Clear Lake.

The price of binding twine sold from the prison plant at Stillwater will be about 50 per cent higher than last year, according to the statement made by a member of the State Board of Control. The advance is due to the high price of the raw material. Last year the state sold twine at 7 cents a pound and the prospects are that this year's prices will be about 10 or 11 cents. The price for the season will be announced by the board today, March 1st.

Mr. and Mrs. F. P. Zschunke returned from their trip to the East last Friday and report having had a splendid time. Mr. Zschunke states that the city of Detroit, where they visited for several days, is one of the liveliest as well as the cleanest of the Eastern cities. Wide streets and miles of clean pavement impress every visitor. The big Ford factory always is an interesting place to visit. The factory will be increased to employ ten thousand people within the year, every one of the workmen receiving \$5.00 or more per day. They also visited the Canadian town of Windsor, just across the river from Detroit. Every vehicle and every grip carried by passengers of the ferry is searched by the Canadian inspectors. That Canada is interested in the war was evidenced by the sentries on guard at every public building.

City Clerk Backer was in the Twin Cities several days of last week.

Mrs. Gilbert of Rochester is visiting with her mother, Mrs. F. A. Schnobrich.

Mrs. Martin Hose left for Minneapolis Tuesday morning expecting to be gone for a week or more.

The Rawson Variety store has added another clerk to its place, Miss Mary Witt being the new employe.
