# WHAT WILL YOU HAVE IN YOUR HOME?

There is a Very Great Difference Between  
*The* NEW EDISON

and a talking machine. All other devices for the reproduction of sound are commonly known as talking machines. The NEW EDISON stands alone in what it can do.

By hundreds of tests The NEW EDISON has demonstrated that you can place an Artist beside the instrument, have such artist sing or play in direct comparison with the THE NEW EDISON'S RE-CREATION of her performance, and it will be found impossible to distinguish one from the other.

No talking machine manufacturer would dare claim that his talking machine could meet this test. The NEW EDISON has successfully sustained this pitiless comparison hundreds of times before the most critical audiences.

Monday the G. A. Ottomeyer and W. E. Engelbert families took a trip to Fairmont. Mr. Ottomeyer was greatly impressed with the building activity and the general air of prosperity manifested in the County seat of Martin County. Just at present 52 blocks of creosote paving are being made and a \$40,000 park is being converted into a pleasure resort. This in addition to a large amount of building. When it is considered that Fairmont is only a trifle more than half as large as New Ulm, the activity there shown certainly is to Fairmont's credit. By comparison New Ulm's building activity is not anywhere in it with Fairmont's this year altho a great many homes are being built.

Mr. and Mrs. E. C. Gilmore returned home from Luverne, N. D. the last part of last week where they had been looking after their crops. Luverne is in Steele County and Mr. Gilmore says the farmers in that section are going to see very hard times this winter. The crops are so poor that the threshing bill takes practically all they get from the crop and in many places it is not thought worth while to thresh. The threshers do not charge by the bushel there this year but charge \$20 an hour and furnish their own food. Mr. Gilmore said his crop gave him enough for seed and to pay the threshing bill but no more.

Gustav A. Altenbern and his sister Elsie were called by telegram yesterday to Davis, Ill., where their mother is seriously ill. Mrs. Altenbern went there recently to visit with her friends and Gustav had only last week returned from the same place where he spent his vacation.

August started out to keep up with the record that July had established for hot weather and managed to do so for the first two weeks, thereby getting an average temperature of five degrees higher than the average for August 1915. The highest temperature recorded by the New Ulm weather man Alex L. Henle was 98 degrees on the 6th in comparison with 92 degrees on the 17th as the hottest for 1915. The minimum this year was 45 degrees on the 13th and again on the 27th. The 13th was a very cold, disagreeable day following a sudden change from extreme heat to a drizzling rain. Since the 27th the thermometer has again been climbing and Monday of this week aroused the fear that September might prove to be very hot. Last year's lowest temperature for August fell on the 30th and registered 38 degrees. No thunder storms, hail storms, or frost are reported but a precipitation of 1.63 inches is noted. The prevailing wind was south.
