SOCIETY LEAGUE BOWLING

Wednesday of last week the K. of C. took five out of six games from the C. O. F. thus putting them considerably in the lead. Burmeister was by far the best of the bowlers, getting two 200 counts and hitting the pins for a 551 total during the first 3 games.

Sunday the Young Men took two out of the three games from the St. Joseph's, winning both by narrow margins.

OPEN NOSTRILS! END A COLD OR CATARRH

How To Get Relief When Head and Nose are Stuffed Up.

Count fifty! Your cold in head or catarrh disappears. Your clogged nostrils will open, the air passages of your head will clear and you can breathe freely. No more snuffling, hawking, mucous discharge, dryness or headache; no struggling for breath at night.

Get a small bottle of Ely's Cream Balm from your druggist and apply a little of this fragrant antiseptic cream in your nostrils. It penetrates through every air passage of the head, soothing and healing the swollen or inflamed mucous membrane, giving you instant relief. Head colds and catarrh yield like magic. Don't stay stuff-up and miserable. Relief is sure.

JESS BECKER CLEARED

A family bible played an important part in clearing Jesse Becker of this city of the charge that he had failed to register for the draft while being subject to it, in June of last year. Yesterday rumor had it that Jesse had been arrested on this charge under order U. S. Marshal to Sheriff Julius. The fact is that the Sheriff's office demanded certainty of the young man's age, and proof of the fact that at the time of the draft he had not reached twenty-one. This was produced in the shape of the family bible, which showed that Mr. Becker had become of age after the time for registration under the draft law, and was therefore not subject to it. The family doctor also verified this record over the telephone, and the sheriff accepted the proofs so shown.

Early celery, pansies, cauliflower and cabbage may be sown soon.

NON-PARTISANS ARE PREPARING FOR THE FRAY

Pursuant to orders issued from the National Headquarters of the Non-Partisan League precinct meetings will be held at the usual voting places February 22nd at 2:00 P. M. for the purpose of electing one delegate from each voting precinct. Shortly thereafter these precinct delegates will be called together for the purpose of making their endorsements of candidates for legislative office. Each member is expected to bring his membership certificate. There will be no precinct delegate elected from incorporated villages or cities and retired farmers may vote in the nearest country precinct meeting.

A. C. Townley of the Non-Partisan League who is holding a series of meetings throughout the state, having spoken at Crookston, Thief River Falls, Perham and other points will speak in New Ulm, February 20, at 2:00 P. M. at Turner Hall; at Springfield, February 21, and at Mankato, February 22. A cordial invitation is extended to everyone to attend these meetings and a special invitation goes out to the business men and the ladies to be present.

The Non-Partisan meeting which was to have been held at Cambria last Saturday at the Woodmen hall had to be moved to the home of Dan Williams because some of the people of Cambria objected to holding the meeting at the hall. Between 50 and 100 were present to hear Benjamin Wilson, the speaker, state his views on economics and denounce the profiteers of the nation. Mr. Wilson is a speaker of national reputation as he has appeared on the platform in all but three states of the United States, in all of the Canadian provinces, in Great Britain and in Ireland. He comes from California and is at the present time employed by the Non-Partisan League as a lecturer.

During the past week the League had meetings at Mapleton, and St. Clair but at Garden City the hall was controlled by Mankato interests and could therefore, not be secured. At Madison Lake the manager of the hall wanted to know if that "Non-Partisan feller" was related to Teddy Roosevelt and when told that he was not, he said he didn't know Non-Partisan and he could not let him speak.

DRAINAGE OF SWAN LAKE

Carlos Avery, state game and fish commissioner, says that the drainage of lakes thruout Minnesota is rapidly ruining the feeding places for the wild water fowls, and it is also destroying resorts which should be open for public enjoyment.

He says that drainage properly conducted is a great aid to farmers. If drainage produces tillable land it is a good thing. If, however, the land is nothing but a swamp after drainage, it is not only useless to the farmers, but no fish or fowl will live and feed in it.

Swan Lake is one of the best hunting resorts in southern Minnesota and the sportsmen of this part of the state are opposed to its drainage. It has been under consideration for several years and farmers and the sportsmen are both eagerly awaiting the decision that will finally be reached in the premises. Surveyors are now at work at the lake and it will probably be decided some time next summer whether it should be lowered or not.

The farmers in the vicinity of the lake are in favor of lowering it as that would enable them to reclaim the land now under water. On the other hand the water is needed for bird life in this part of the state, and since the former benefits but comparatively few people and the latter a far larger number the authorities in charge of this matter are likely to reject the petition and thus preserve one of the best hunting grounds in the state.

—St. Peter Free Press.

BELOVED ACTRESS DIES.

Many of the readers of the Review will be interested in the following clipping from the Dramatic Mirror:

Ellen Bloom Marble, an actress for more than fifty years, died January 14th at the Staten Island hospital. She had been ill for several months. Mrs. Marble, who was sixty-nine years old, went on the stage when she was eighteen. After playing character parts in stock for ten years, she toured the country with her own company. She then married Dick Oglesby, a well-known actor and producer, and a cousin of former Governor Dick Oglesby, of Illinois. After his death she married William Marble, with whom she appeared until his death, six years ago. She continued in her stage work alone and last season played in stock at Norfolk, Va.

"Billy" and "Ella" Marble, as they were familiarly known here and on the stage, spent their summers for many years at Madelia. They had their own company and it was their invariable custom for many years to open their season there, always doing a good business. They were well-known in New Ulm, having visited here every year while they were playing in this part of the country and they are held in fond remembrance by the older theatre-goers of this city.

The Marbles were both players of great talent and were known all over the country among stage folk. They might have achieved much greater popular

acclaim had it not been for the fact that they preferred to head their own company and be thus independent, rather than to work under the direction of the great producers. Billy Marble in his day was one of the finest comedians in America. Both Mr. and Mrs. Marble were pleasant, unassuming people in their private life and made many friends here.

Pruning may be done in the orchard on warm days. Burn the prunings.

The florist business of the United States last year amounted to about \$100,000,000.

Be sure the garden tools are in shape for the campaign this year. Buy new tools now if they are needed. This is a good time also to purchase fertilizer for this year's use.

According to the bureau of crop estimates the cabbage acreage in one important state was 66,800, the yield per acre 7.5 tons, the total yield 502,700 tons and the farm value \$17,080,000.

MODERN - FIRE PROOF

YOU COOK YOUR FOOD—WHY NOT YOUR TOBACCO?

YOU know what broiling does to steak, baking to a potato—and toasting to bread. In each case flavor is brought out by cooking—by "toasting." So you can imagine how toasting improves the flavor of the Burley tobacco used in the Lucky Strike Cigarette.

A BILLION BUSHELS OF WHEAT

Recommended for 1918 by the United States Department of Agriculture

The Northwest is being relied upon to grow 20,000,000 acres as its war quota which should yield, at the rate of the 1915 crop, 350,000,000 bushels. 1915 yielded the greatest wheat crop ever produced. We can beat it if we try. Every man must beat his own record.

Our allies depend upon us for food as they have never depended before, and they ask for it with a right which they have never had before, for today they are doing the fighting, the suffering and dying—in our war.

"Remember that at all times victory for our nation demands that we raise and conserve all the wheat we possibly can. Any sacrifice we make for this is small beside the sacrifice of the boys whom we are attempting to feed with this wheat." —Herbert Hoover.

We must stimulate our food production, organize our food handling, eliminate all the waste possible.

Now is the opportunity for the American farmer to make money for himself and be a patriot at the same time. Safe farming is the best farming.

Select the variety which is best adapted to our soil and climate; cut out the mongrels and breed up this wheat to its highest milling and yielding properties. We are having the greatest success of all with

FIRST MARQUIS WHEAT

It contains plenty of gluten of the best quality for bread-making, maturing from five to ten days earlier than other wheats, avoiding danger from hot winds and drought, and, being earlier, is not so liable to rust. It does not shell out and waste so badly as Blue Stem, Red Fife and Velvet Chaff during harvest, even when over ripe.

The straw is shorter and stiffer, hence in a dry year suffers less from drought and in a wet year suffers less from lodging.

Unite upon Marquis and cut out all the others. Blue Stem and Fife are very good, but it is much better to grow the one best kind. Screen your seed and fan out all trash, immature kernels, weed seeds, etc., leaving the seed to be planted the heaviest you have, with an equal amount of plant food in each kernel which will cause it to mature at the same time, making less waste at harvest.

Treat Seed Wheat for Bunt or Stink-smut. In order that we may take no chances we must all treat our Seed Wheat with formaldehyde.

Obtain formaldehyde with full instructions from your druggist, and be sure that it is full strength. Mix one pint bottle in 30 gallons of water, in tubs, barrels, or other containers which will allow the trash, immature kernels, many weed seeds and damaged seeds to rise to the top and be skimmed off.

If you have any good Marquis Wheat for sale advise your mill or elevator or the Universities above mentioned and they will refer inquiries to you.

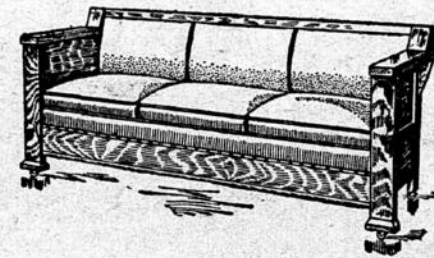

CROP IMPROVEMENT COMMITTEE.

This costs very little and is an absolute insurance against smut.

Secure Your Seed Wheat Now. A few germination tests must be made in each neighborhood to be sure that the wheat will grow vigorously and strong. We cannot afford to take any chances. If it does not test 90 to 95% strong you are in danger. Find some neighbor, if you can, who has good wheat enough to supply seed for you and sell the seed that you intended to sow. Ask your County Agricultural Agent, or the Agricultural Teacher in your High School to help you locate MARQUIS seed in your neighborhood, or ask your seed man to get it for you, but be sure he honestly tells you where it is grown. Do not get it too far away from home. If the seed man cannot supply you to your satisfaction, apply to your mill or elevator. All have agreed in this territory to locate proper seed wheat for their customers. If they cannot supply you, write to Professor Manley Champlin, State Experiment Station, Brookings, S. Dak., or Prof. C. P. Bull, Sec'y, Minnesota Crop Improvement Association, St. Anthony Park, Minn., or W. I. Oswald, U. S. Seed Bureau, 320 Flour Exchange, Minneapolis.

Don't Wait Until Too Late. Be careful that your variety is pure. Mixed varieties are very undesirable for sowing. Pure seed of a single variety is more desirable. Don't mix your lots.

FINE FURNITURE

Davenport, Special Price
\$37.50

See these splendid Davenports at our Special Price of \$37.50. They are beauties and there is sure to be one which will suit your taste and your home needs. Step in and see them. They are an ornament and at the same time are exceedingly useful.
