If New Ulm could accommodate some fifty families with living quarters, there would be fifty more families in the city. Never before has there been such a demand for just a mere place to live modern or not modern as there is this fall. New families are moving to our town and many of the people who formerly rented residences find themselves out of luck. The city has grown to such an extent that new flats which would provide quarters for dozens of families would no doubt prove very popular.

For Your Protection

A new device which you will find installed in the Yard Goods Department.

On the various counters, you'll find a little black enameled iron stand, with two spaces on top. One of these spaces looks like a clock face and the other like a multiplication table.

This device is called a "Measuregraph"

and its purpose is to assist us in giving purchasers of yard goods the exact measurement and charging them the correct price on Every purchase.

With the aid of the "Measuregraph," our people can measure any number of yards or any fraction, exactly to the eighth of an inch. They can tell you the exact cost of, say, 1 1/8 yards of silk at \$2.65 a yard in an instant, and with absolute accuracy.

This means that you can be waited on more quickly than heretofore — a vital consideration in these busy times.

First in the installation of many conveniences for the shopping public, this store is also first to install the "Measuregraph."

To paraphrase a famous advertisement "We couldn't improve the fabrics, so we improve the selling methods."
