The President Still Improves.

OFFICIAL BULLETIN.

Washington, August 1.—Executive Mansion, 8:30 a. m.—The President slept well, and this morning is cheerful. He expresses himself as feeling better than at any time since he was hurt. After the slight rise of yesterday his temperature again became normal early in the evening and so continues. He appears stronger, and has evidently made good progress on the road toward recovery during the last few days. His pulse is now 94; temperature, 8.4; respiration, 18.

Signed,

D. W. BLISS,
J. K. BARNES,
J. J. WOODWARD,
ROBERT REYBURN,
D. H. AGNEW.

LOCATION OF THE BALL ASCERTAINED.

Executive Mansion, 11:45 a. m.—The President is passing a quiet, comfortable day under the supervision of the attending surgeons. Professors Bell and Tainter this morning made another application to the President's body of the electrical apparatus known as the "induction balance," with a view of accurately completing the tests of Saturday, which were not entirely concluded, and ascertaining definitely and certainly, if possible, the location of the ball. Professors Bell and Tainter have been almost constantly engaged during the past two weeks in experiments with the "induction balance," and have made several improvements which add greatly to its efficiency. They tried this improved apparatus upon the President's body for the first time last Saturday, and although it indicated fairly the location of the ball, it was found afterwards to be slightly out of adjustment, and the experiment was not regarded as conclusive. The results of this morning's test, however, are entirely satisfactory, both to Professors Bell and Tainter and the attending surgeons, and it is unanimously agreed by them that the location of the ball has been ascertained with reasonable exactness and certainty, and that it lies, as heretofore stated, in the front wall of the abdomen, immediately over the groin and about five inches below and to the right of the navel.

BELL AND TAINTER AT WORK.

Experiments this morning were repeated several times and were made by Professors Bell and Tainter independently, so as to guard as far as possible against errors arising from faulty perception of a single individual or a person's mistaken judgment on the comparative intensity of sound. In every instance, however, when small disks were attached to the machine, they were placed in such a position on the patient's body as to indicate the location of the black and blue spots which appeared on the lower and right side of the abdomen. Soon after the President was shot the listener at the microphone says he perceived evidence of disturbance. It made no difference whether the experimenter could see the disks or not, or whether they were placed in that particular position he became instantly aware of the fact and announced it. The experiments were varied and continued until all were convinced that the bullet had been found or at least located.

OFFICIAL BULLETIN.

Executive Mansion, 12:30 p. m.—The President's wound continues to do well. At this morning's dressing it was found in all respects to be in a satisfactory condition. After the dressing was concluded his head and shoulders were raised in the same manner as yesterday. He took solid food for breakfast with more relish than he has heretofore shown. At present his pulse is 100; temperature, 91.4; respiration, 19.

Signed,

D. W. BLISS,
J. K. BARNES,
J. J. WOODWARD,
ROBERT REYBURN,
FRANK HAMILTON.

A REPORT.

Prof. Bell has made a report of some length to the physicians attending President Garfield, on the subject of his experiment and the location of the ball, it does not, however, contain any new matter.

A CUP OF COFFEE.

WASHINGTON, 11 p. m.—The President's case to-day has presented no feature of especial importance which has not been noticed in the official bulletin. His appetite is by far better than yesterday.

terday. He has partaken more freely of solid fare, and his bill of fare has been extended to embrace several things heretofore forbidden, including coffee, of which he drank half a cup to-day for the first time. The patient's wound discharged freely at the evening dressing, and its appearance was in every way satisfactory. The usual afternoon fever was light and passed off earlier than usual. His pulse is now below 100 and his temperature and respiration normal.

Foreign Intelligence.

CROPS IN ENGLAND.

LONDON, August 1.—The Standard, in an article on harvest, says: "The general opinion in Mark Lane is that there is an average wheat crop in England, and a great majority of the reports from different districts confirm that an estimate of the barley crops cannot fail to be an average one. The root crops are less promising than they have been at this period for many years. Potatoes, however, are as good as roots are bad. The prospects in Scotland are much less favorable than in England."

O'CONNOR TO START TO AMERICA.

Thos. H. O'Conner is expected to start ten days hence on an American lecturing tour in the interest of the Irish Land agitation.

McGRATH'S MEMORANDUM BOOK.

It is stated that the police are very reticent in regard to the memorandum book found in the possession of McGrath, one of the men indicted for attempting to blow up Liverpool Town Hall. It is believed the book contains copies of memorandums to steamers and articles to come by them to America, and in view of the discoveries of the infernal machines, it is inferred that the information which the Home Secretary obtained of the arrival of such machines were actually obtained from the perusal of McGrath's memorandum book.

PREPARING AN ANSWER.

LONDON, August 1.—This morning's Post says: "We learn from Constantinople that in a convention between the Grand Vizier and one of the Embassadors, the former states that the Porte was preparing a note on affairs which would be to a certain extent an answer to a dispatch from Earl Granville. The note will point to the danger to which Turkish provinces are exposed, and to the necessity of taking immediate steps for guaranteeing order. The Porte while declaring that it will not shrink from fulfilling its duty, protests beforehand against any wrong interpretation which France may give to measures which may be deemed necessary."

Mint Investigation.

SAN FRANCISCO, Aug. 1.—At the mint investigation to-day Thomas McAuley, assistant melter and refiner, was put on the stand by the complainants to prove that Mr. Dodge, the superintendent, knew that the bullion was unfit for coinage that was sent to the coiner. The witness testified such to be the fact, as he said the melter and refiner had often complained of the fact, but his testimony was not allowed, as it was not shown that the complaints were made to Dodge. The witness stated that the oftener bullion was remelted the more loss the government sustained from wasteage. F. B. Cicott, until lately coiner in the mint, testified that in some cases the bullion sent to his department for coinage was exceptionally bad, and the metal had to be rehandled, entailing additional expense. He called Dodge's attention to the badness of the metal, and accompanied him to the coiner's room and showed him the evils of using bad metal, but there was no remedy applied to do away with the evil. On account of inferior bullion the extra work will average one month in the year, and the expense amounts to over \$12,000 per annum. The witness considered Superintendent Dodge either wilfully negligent or ignorant.

Death of W. E. Fendall.

Santa Fe, Aug. 1.—The New Mexican's special to-day reports the death of W. E. Fendall, of Golden, N. M., which occurred at that place on the 27th ult. He was shot on July 17th by a miner named Jackson, the ball striking the floor and glancing up, striking him in the leg. Mortification set in and death ensued, though with proper medical attendance his life could have been saved. The coroner's verdict was, "death from pistol wound, said pistol being in the hands of John Jackson, who inflicted it with malice and against the peace." The affair seems to have been the result of an old grudge. The murderer has not been arrested, having skipped the country.

AN INTERVIEW REQUESTED.

Gen. Hatch to-day received a telegram from Gov. Terrasas, of Chihuahua, at El Paso, requesting an interview in reference to adopting some cooperative measures between the American and Mexican troops to crush out the Indians now raiding in Chihuahua and Southern New Mexico. It is probable the request will be granted.

A Jealous Demi Monde.

Denver August 1.—About four o'clock yesterday afternoon Maud Fay, an inmate of Jennie Hawley's bagnio, on the West Side, shot and dangerously wounded another inmate named Lina Spencer. The shooting was caused by jealousy over Larry Marooney, at present a prisoner in the county jail. Miss Fay produced a revolver from a visitor and induced Miss Spencer to accompany her into the back yard. They went into an outhouse and Miss Fay told her victim to say her prayers as she was going to kill her. She then fired a ball striking her victim in the bosom. She then went into the house and told what she had done. The wound is dangerous but not necessarily fatal. Miss Fay was arrested and she expressed sorrow that the shot did not have the desired effect, and said if she was released she would again attempt the murder of her rival.

Ex-Senator Howe's Wife Dead.

Washington, August 1.—The wife of ex-Senator Howe, of Wisconsin, died to-day at the residence of her son-in-law, Col. Enoch Toller, of this city.

Nana's Band in New Mexico.

Santa Fe, Aug. 1.—Charles R. Wade, who has just arrived from Old Mexico, informs the New Mexican that it is believed in Chihuahua that Nana's band have removed to New Mexico, and that it is the intention of the Indians to do all the injury possible and as quickly as they can. In Mexico about three weeks ago three Mexicans were killed who were travelling beyond Chihuahua and further south. The Mexicans were at the time of the massacre riding along in wagons. There were at least a dozen of them occupying four wagons. The Indians attacked the party two hours before sunset, and before the travellers were aware that there was danger they had effected the damage reported. The Mexicans had as the first warning of the onset the cries of the savages to notify them that in a moment or two they were to encounter the enemy and drive them or meet death. The men who were in the train appear to have all been aware they must fight to the end, for as soon as they discovered the Indians were on hand, and that it was a case of fight or die, they handled their guns like soldiers and killed two of the Indians. It was of no avail, however, as the first volley of the savages laid low three men. All the other volleys were harmless, and the fight ended by the retreat of the Apaches. The troops of Old Mexico are after the Indians in dead earnest, and are likely to kill or capture them.

A Defaulter Skips.

SAN FRANCISCO August 1.—William A. Stuart, defaulting County Clerk of San Francisco county, is said to have gone east on Friday last. The amount of shortage is not known. The public funds are untouched. His mode of procedure was to get "power of attorney" from his deputies which he had over a hundred, with salaries ranging from \$100 to \$150 per month, and draw their salaries or hypothecate the warrants. If the deputy got impudent for salary, Stuart would give him a duplicate warrant which in most cases were sold to brokers. One broker loses four thousand dollars.

Charged With Murder.

Denver, August 1.—Nathan Metzger was arrested here last night, charged with the murder of Charles Bounsell in North Park about three or four weeks ago. Metzger and Bounsell left Fort Collins with freight wagons and teams bound for Teller City. Several days were required for the trip, and during that time nothing was heard of them, but one day Metzger was seen to drive into Teller City with both teams and outfits. He sold the goods in the wagons at Teller City, and then drove to Laramie City, Wyoming, and sold both outfits for \$125. Bounsell has not been heard from since, and circumstances point to Metzger as his murderer.

Removal of Indians to Utah.

Omaha, August 1.—General Crook, commanding the department of the Platt, has had added to his jurisdiction the entire territory of the Utes, Unalutahs, White River and Uncompaghe Indians, who are being removed from Colorado, and their old reservation to their new reservation in eastern Utah, near the junction of the White and Grand Rivers. He will command all troops, who are to keep them in subjection and a new post is to be built near their reservation at once. General Crook will soon make all necessary arrangements for troops and supplies.

Magazine Exploded.

New York, August 1.—A Mazatlan Mexican special gives an account of an explosion in the government magazine there, caused by the guard smoking. The building was situated in the center of the business portion of town. The explosion completely razed the magazine and destroyed many houses in the immediate vicinity, besides doing considerable damage to a number of others and killing a large number of people. Immediately after the explosion the soldiers and citizens went to work to recover the bodies of those known to be buried in the ruins. Seventy bodies were recovered, among them Francisco Penn, District Judge.

Races.

SARATOGA, August 1.—Three-quarter dash; Hiawassa won; Turko, second; Roumer, third; time, 1:16.
Mile and five hundred yards—Valerio, first; Cinvello, second; time, 1:13.
Mile dash—Victim won; Fellow Play, second; Churchill, third; time, 1:41.
Three quarter dash—Knight Templar won; Baby, second; time, 1:16.
BARRIE, Ont., August 1.—Gandano defeated Trickett in a three mile scull race with Turn; time, 19:30.
In three miles, with double turn maulrauder and, Trickett won; Ellis and Wise, second; time, 21 minutes.

A Sheep Herder Killed.

Trinidad, August 1.—At Sam Brown's ranch yesterday Tom Daggart, foreman of Stevens' ranch shot and killed one of Brown's sheep herders and wounded another nearly to death. The injured Mexican managed to travel ten miles and reported the killing. A posse yesterday went in search of the murderer and met him on his way to give himself up. He says the shooting took place during a hand to hand struggle with the Mexican herders when all three were in a heap on the ground.

Has a Notion of Purchasing.

SAN FRANCISCO, August 1.—J. D. Walker, representing foreign capitalists, has made examination of the North Pacific Coast railroad with a view of purchasing the property for two and a half million dollars. The road runs from San Celetto along the northern coast the distance of some ninety miles, with a franchise for several hundred miles more.

Election in Kentucky.

Lexington, August 1.—In the election to-day the Democrats carried the city by an increased majority as far as heard from. Candidates for the legislature favor the return of Senator Beck.
