Another account from Paris states that Lord Normanby will only be absent for a few days.

Nine hundred political prisoners, recently arrested, had been sent to Cherbourg, preparatory to their transportation to Cayenne.

The funds had fluctuated, but closed firm on the 9th inst.

ENGLAND.
A dissolution of the English Cabinet is believed to be inevitable. After a Cabinet Council on the 8th, Lord John Russell proceeded to Windsor Castle to confer with the Queen. It was generally supposed that the whig government would fall thro' before the meeting of Parliament. The Times says that the attempt to strengthen the ministry by an alliance with the Peclites had signally failed, and the Prime Minister would be compelled to meet Parliament without any addition to his strength.

The Marquis of Lansdowne had tendered his resignation as President of the Council.

Baron Kinney, of the Hungarian committee, died in London, of a broken heart, caused by an article in the Daily News.

By the burning of the steamer Amazon 41 passengers and 61 of the crew perished; among whom were Elliot Warburton, another of the Crescent and the Cross; Capt. Symonds, the surgeon, and four chief officers. In 20 minutes after the fire commenced, the ship was completely gutted out. Many persons were suffocated in their berths.

A desperate rush was made for the boats, and two were swamped along side and all on board lost.—Two others containing 9 passengers and 37 seamen got clear of the wreck and were picked up by English and Dutch vessels, and landed respectively at Plymouth and Brest. The origin of the fire is unknown and loss is immense.

The British had also sustained a reverse at Logos, on the coast of Africa, in an attempt to chastise the native king for slave-dealing. The English force consisted of 260 men, and was compelled to retire with considerable loss.

PROSPECTUS OF THE

Farmer's Journal

The subscriber proposes to publish in the town of Bath, Beaufort county, N. C., a monthly paper under the above name. This paper will be devoted exclusively to the setting forth of the various popular improvements in Agriculture, Horticulture and the household arts. That there is a demand for such a paper in our State, and more especially in the eastern part, no one will deny.

As evidence of the good effects of such papers we have only to look at the rapid strides which have been made in farming in those States of our Union where they exist. But this great advancement made in the science of Agriculture in other States, is but little known to the farmers of North Carolina. There are several scientific as well as practical farmers among us; but for the want of a medium through which to communicate their agricultural knowledge, it is still confined to a small compass. Our good old State is far behind the age in agriculture as well as every other improvement; as a people we are greatly wanting in State pride, which is highly important to place us in that position which we ought to occupy. In New York, Maryland, Georgia and several other States annual Fairs are held for exhibiting the products of each, which clearly have a tendency to great improvement.

Nature has thrown no impediment in the way to prevent our agricultural advancement; but she has lavishly heaped upon us her inestimable gifts. We have among us a sufficiency of both organic and inorganic matter to enrich every acre of our worn-out land, and our soil and climate cannot be surpassed in adaptation to the production of the various plants.

All that is now needed to elevate our State to the position which she should occupy among her sisters, is energy and enterprise on the part of her citizens. There must be a stop put to this great tide of immigration from our State; for daily many of our most talented and energetic young men seek a new home in the West; they say that they cannot get their consent to remain among a people possessed of so little enterprise as we are.

The subscriber has not been engaged in farming many years; but he feels justified in saying that he began upon the right plan, that of deep plowing, heavy manuring, and thorough draining. He has visited some good farms in our State as well as in others, purely for agricultural instruction; and for some time past he has been engaged in useful agricultural reading, to prepare himself for the post which he now proposes to occupy.

The subscriber feels confident that this undertaking shall not fail from a want of energy on his part; he is resolved to use every effort to obtain a large subscription list, and for this purpose he will canvass several counties within the next two months.

He hopes that by showing such a determination to do something for the present degraded condition of the farmer, to be sustained and receive a liberal patronage from a generous public.

As soon as two thousand subscribers are obtained to the Journal, it will be issued forthwith; it will be of the usual size of such publications, and consist of thirty pages of closely printed matter.

Each number will contain one or more articles from the pen of the Editor, and several communications from our best farmers; and the remainder will be filled with articles selected from other Agricultural Journals, such as may be deemed by the Editor applicable to our climate and soil.

In conclusion the subscriber asks the aid of every man in the prosecution of this great work; for he is sure that there will be a good bargain made by the farmer. The advancement of farming should excite an interest in the breast of every man; for upon the success of the farmer greatly depends that of every trade and profession.

A DESIRABLE Residence & Farm TO RENT.

THE Residence and Farm belonging to Mrs. Elizabeth Bennett, lying about eight miles northwest from Tarboro', between Fishing and Swift Creeks, in the neighborhood of H. Blair Bryan and Patrick McDowell, Esqrs. and containing open land sufficient, it is supposed, for five or six hands, is now offered to rent for the year 1852, on private terms.

There are on the premises a good Dwelling house, Kitchen and Work house, Dairy, Smoke house, and Store house, besides every other necessary out-house, nearly all of which are good framed buildings. Also, a good Orchard of various kinds of fruit trees, and some eight thousand turpentine boxes.

The water is excellent, and it is confidently believed that the place is one among the healthiest in Edgecombe county.

Any person wishing to rent, can examine the premises and learn the price, by calling on Patrick McDowell, Esq., who lives about one mile from the place, and is authorized to rent it for the ensuing year.

PROSPECTUS OF THE SOUTHERNER.

The undersigned proposes to publish in the Town of Tarboro', from the 1st of January, 1852, "The Southerner"—a Democratic, Agricultural and Miscellaneous newspaper.

From the small number of Democratic papers in the State, we confidently ask the support of the party. Few political fields offer to the ready and willing workman in our cause, promise of a more abundant harvest, than North Carolina. Our party are becoming, day by day, more unanimous on the subject of slavery and its incidental doctrines, which our opponents so confidently thought would destroy our organization, while many of their own party are fast becoming dissatisfied with the cringing position, they would have us occupy in our National Union. To encourage and perfect this unanimity of our own party, and to show to the dissatisfied of our opponents, that such dissatisfaction springs from a true appreciation of Liberty, and a correct view of patriotism, is the peculiar and proper work of the Press. Support then, Democrats, as you ought and can, your party papers throughout the State.

"The Southerner" will be the exponent of Edgecombe—it will advocate her principles, cherish the progressive spirit of her people, and defend her reputation and good name. As such, we hope to embody in it, by the talents of our farmers and citizens generally, the practical rules and successful experience, which have increased so much her productive industry; and thereby make it, to the citizens of other counties, a neighborly and instructive messenger.

As a village paper, we hope to make "The Southerner," by the variety of its matter, interesting to all. Its columns will be open to a free and liberal discussion of all subjects—instructive or amusing.
