FED ON HORSE MEAT.

Residents of Los Angeles Ate Broncho Steaks Instead of Beef.

Something of a sensation has been caused in the residence parts of town remote from the markets and where traveling venders of toothsome steaks and roasts are regularly patronized, says a Los Angeles dispatch to the San Francisco Chronicle, by the discovery of the board of health that much of the alleged beef which has been sold for an indefinite period is nothing else than the remainders of Southern California bronchos after the period of usefulness of those equine friends of man is past. Health Officer Steddom today laid the matter before the board of health and along and earnest discussion followed the recital of the sensation by the health officers. Dr. Steddom todd bear his color is also a matter of conjecture, and long and earnest discussion followed the recital of the sensation by the health officers. "WORN OUT." A COMMON EXPRESSION USED BY

AMERICAN WOMEN. Many do not Realize the Full Significance

When a woman is nervous and irritable, head and back ache, feels tired all the time, loses sleep and appetite,

trouble is imminent, and she cannot act too promptly if she values her future comfort and happiness.

The experience and testimony of some of the most noted women of America, go to prove beyond a question that Lydia E. Pinknam's Vegetable Compound will correct all such trouble at once by removing the cause and restoring the organs to a healthy and normal condition. If in doubt, write Mrs. Pinkham, at Lynn, Mass., as thousands of women do. Here is a lady who says:-

"Let me add my name to your list of testimonials. For years I suffered with such a weakness of the back I could not stand straight. I had terrible pains in my womb. The doctor said an operation must be performed, as there was no other way to be cured. I was afraid to have the operation performed, and kept trying the medi-cines that I saw

advertised. At last I tried yours. 4 After taking three bottles I felt like a new wo-

to every woman, and cannot praise it enough, for it saved me from the surgeon's knife."-MRS. MARK BUCH,

Sweetness and Light.

ONE OF EGYPT'S MYSTERIES.

Lake, Part of Which is Fresh and th Other Part Very Salt. Other Part Very Sait.

During the reign of Said Pasha a causeway was built across the lake of Marcotis, with the result that the western portion of the lake became highly impregnated with salt, while the eastern part remained as formerly, only slightly brackish. Scientists are not satisfied isided as to the source of the immense quantity of salt contained in the lake, and some have conjectured an underground passage from the sea. However, there is no visible channel by which the sea water might enter, and, as one can ride all around it, it is, to all intents and purposes, a lake

origin, it fades as the salt becomes dry, but while damp the effect of the imprisoned color is indescribably lovely.

To get an entirely different phase of the sight one must ride over the causeway. Here one has the ice field on the right, and on the left the rippling blue Mareotis. About half way across, where the lake is deceased and the salt crust has

the lake is deeper and the salt crust has not formed, the scenery changes. The water has the still and heavy look of the Dead sea, but, unlike the latter, which looks like molten brass, this milky lake, with the clouds and the blue sky re-flected in it, might be likened to a vast opal, and the setting sun, throwing a fiery ball into its depths, completes the similitude

Coughing Leads to Consumption.

Kemp's Balsam will stop the cough at once. Go to your druggist to-day and get a sample bottle free. Large bottles, 50 cents and \$1.00. Go at once; delays are dangerous.

—Excitement was intense at Vancouver recently among mining men, owing to the fact that fabulously rich quartz had been found on Texada island. On the abandoned Lorndale claim, Texada island is some forty miles from Vancouver, and it is but recently that gold was known to exist there in paying quantities. The quartz in question was free milling, and there were chuncks of gold sticking out all over thet evidence.

A Mine on Fire for Twelve Years. A question referred to Attorney-Gen-eral Monett of Ohio by Mine Inspector eral Monett of Ohio by Mine Inspector Haseltine discloses a remarkable situation. Twelve years ago, during the great miners' strike, mine 139, at New Straitsville, owned by John Elliott of Zanesville and operated by the Great Vein Coal company, was fired. It was afterward abandoned. Recently the discovery was made that the coal has been burning all these years, and threatens, unless extinguished, not only to communicate to other mines, but to let many unless extinguished, not only to communicate to other mines, but to let many houses drop through the roof. As real estate is already low enough in that vicinity, the land owners object to the threatened collapse. Elliott, the owner of the mine, will be asked to put out the fire, and in case of refusal will be prosecuted.

Pianos that Catch Cold. Half the pianos of this country catch winter colds exactly as we do. They get hoarse, or have a cough, or a stiff note, or some similar complaint which cannot be cured by home remedies, but which requires tedious and expensive doctoring.

In order to prevent these avoidable ailments a piano should be kept in a modture is even, say 60 or 70 degrees, the year round—not cold one day and hot the next. The instrument should not, howtoo near the source of heat. It should be kept closed, and covered with a felt cloth when not in use, particularly in frosty weather. Always place the piano against an inside wall, and a little-out from it.—An-

Tastes in Complexions. What constitutes beauty of complexion? What constitutes beauty of complexion of the negro a beautiful complexion consists in ebony blackness. The Tartar and Mongolian races of the polar regions of America see beauty only in yellow skins. The Indians admire a brown complexion. Numbers of barbarous people conceal the natural tint of their skins under a staining of many colors others are conceal the natural tint of their skins under a staining of many colors; others are indelibly marked with a general tattooing. The Greenlanders paint their faces with yellow and white. The Decanaises stain themselves yellow and redden their hands and feet. Of course, the white people of America and Europe find the greatest beauty in the white skins brightened with a touch of rose color.

A comparative anatomist says that the little toe has got to go; that it is a useless appendage, already showing signs of degeneration or withering away, says the Boston Journal. It is proved that the Boston Journal. It is proved that the horse, in the course of several centuries, has dropped four toes and now travels on one, and some think that man's pedal extremities are bound to follow a similar line of evolution. In the horse it is the middle digit which has survived as the fittest. In man it will be the first or

—A dispatch from Rossland, B. C., states that the latest dividend of the Le Roi paid yesterday, makes a total of \$250,000 paid to date. With the advent of the Red Mountain road the shipments will be increased and it is expected that soon \$50,000 a month will be paid. Ore soon \$50,000 a month will be paid. Ore running \$48 per ton has been struck in the Jumbo mine. In the Slocan country the Ruth mine has been sold to an English party for \$166,000, and the Payne group to Salt Lake and Montana parties for \$125,000. The Sapphire group has been bonded to Nelson people for \$15,000. Half of the St. Keverne has been bonded to California parties for has been bonded to California parties for \$10,000.

The Wyoming Press has the following good story: "One day this week as George W. Cooper and a young man named Nieberger were on the road with their team from Coe & Coe's camp to Piedment a hig mountain lion jumped their team from Coe & Coe's camp to Piedmont, a big mountain lion jumped at the team and lit on the double trees. Neither of the men had a weapon save a pocket knife, but Cooper sprang upon the beast and seized it by the back of the neck while Neiberger, equally the beast and seized it by the back of the neck, while Neiberger, equally plucky caught the animal by the tail. After a lively tussle they got the brute down and with the pocket knife man-aged to cut the lion about the neck so badly that it bled to death. There were three other lions seen at the same time, but they ran away."

-The ancient Egyptians at their grand festivals and parties of pleasure, always had a coffin placed on the table at meals, containing a mummy or a skeleton of painted wood, which was presented to each guest with this admonition: "Look upon this and enjoy yourself; for such will you become when divested of your mortal garb."

LOVE AMONG THE THORNS. he wears a mannish collar, and she squanders every dollar On dresses, trim and tight and tailormade; Since the time when first I knew her have her eyes been growing bluer; And I'd woo her, but the truth is—I'm afraid! afraid!
For you see she's full of notions, such as silly Swedish motions
For developing her muscles like a lad's;
And so, naturally, I fear to come uncom-

fortably near to A girl with forty an de siecle fads. Only lately 'twas her hobby in a legislative lobby
To rob the stately senators of peace;
Then she went to seven lectures on Italian
architectures.

architectures,
With now and then a reference to Greece.
But she soon adopted bowling, balls of
lignum vitae rolling
At triangular assemblages of pins;
Then she lectured like a parson to the men
lu jall for arson,
As a penauce for imaginary sins.

I'm confident I love her, but the little stars I'm confident I love her, but the above her above her above her are not quite so unattainable as she;
For she frequently has stated that she's now emancipated,
And matrimony's galling to the free.
It has passed the point of joking, and become a thing provoking,
From whim to whim unceasingly she gads;
And though all my life I tarry, I declare I'll never marry
A girl with forty fin de sleele fads!
—Munsey's.

## OWN DECEASE.

Although undoubtedly I had been very ill, I am by no means certain of my facts at about this time; so whether I was the victim of a little too much indugence in the flowing bowl, or of a lively imagination, or of a hypnotic trance, I really cannot say, any way, one morning I seemed to be conscious that I was talking with a demon, who sat by my bedside. He was a very pleasant sort of a fellow and not bad looking, but somiehow I knew he was a demon.

heard you people seldom perform services for nothing. What recompense do you require?"
"None. The penalty you will pay will

be sufficient reward for me.
"What penalty?" "What penalty?"

"To see yourself as others see you, and hear what they say of you."

My friend then dematerialized himself into thin air, and the next moment I was gliding noiselessly down the stairs. I should explain to you that I am an arrhen with the stairs but the stairs. I should explain to you that I am an orphan, without parents, but a member of a large family; sisters, brothers, cousins and all the rest of it. I happen to have more money than any of the others, and have hitherto been much sought after on account of many excellent personal qualities. I am not married. Well, the fact is, I am of a rather retiring disposition, and but having yet come across position, and not having yet come across a girl who would help me out with the preliminaries, I had not found courage to take the fatal plunge. My eldest sis-ter, Priscilla, had therefore been keeping

table; but, of course, no one saw me. I which led me to take courage to woo, had forgotten for the moment that I and, by and by, wed her.—Spare Mowas a dematerialized spirit. Soon, how-ever, the door opened, and the important individual entered the apartment. I was my eldest brother Tom. Now I be gan to understand He was my executor and residuary legatee. He represented me, the late Crawley Slowquicker, Esq., decrased, hence all the court and defer-ence paid to him. This was absurd, you know, for a bigger fool never lived. Well, he made straight for my chair, and sat down where I was sitting! This was stepping into my shoes with a ven-geance—actually usuroing the same place occupied by my disembodied spirit. Tom was a bulky fellow, and I felt the affront Besides, wishing better to watch the pro-

ceedings, I got up quickly and sat be-hind my chair. Two things especially attracted my at-Two things especially attracted my attention, and somewhat shocked me. In the first place, Priscilla's presiding seemed much more lavish than under my regime, and in the second I was struck by the happiness and gayety of the whole company. This was calculated to take my fattity down a few page for I had company. This was calculated to take my fatuity down a few pegs, for I had fondly imagined that my death would plunge my entire family in the uttermost depths of despair. But it hadn't.

"I never like going into black," Priscilla was saying in her even tones to Aunt Gwen, "it's so very unlucky." "I don't mind the change at all," said

Aunt Gwen;" the color just suits me, you know. But I really can't tell what orders to give, not knowing how I am orders to give, not knowing how I am provided for."

"That's as good as asking," said Tom, with one of his horrible laughs which I used to consider hearty. "A nod's as good as a wink to a blind horse. I suppose the regular thing is to read the will after the funeral; but as it's all among ouselves it does not matter, and I'll read it to all directly after breakfast."

it to all directly after breakfast."

Then they started talking about their late relation, Crawley Slowquicker, and the things I heard about myself positively astonished me.

They were all sadly deficient in the bump of reverence, and I found that not one of them entertained that respect and affection for me of which I had imagined they were all possessed. Now I fully realized the truth of my friend the demon's words. It was a dreadful penalty to pay, a sad mortification to hear what pay, a sad mortification to hear what said of me, and to see myself as "Well, of course," my cousin Vernon "Well, of course, my country in a said, responding to some remark in a "Of course,"

said, responding to some remark in a virtuously deprecatory tone. "Of course, de mortuis nil nisi bonum, and all that sort of thing, you know; but I can't help saying that Crawley was always mean—horribly mean!"

Confound the fellow! And this was a man to whom I had left £500, forgiving him all the money he owed me, which was as good as double the legacy!

"No, no; not mean," Tom answered, and I blessed him for those words, but he spoiled it all by adding, "A bit careful, you know." ful, you know."
"Ah, I should think so," says Priscilla.
"You will hardly believe it, but it's a fact he never allowed me money enough to keep house decently."

Of course, this was not true, as you may imagine. She was always wanting more money, and yet it never succeeded in purchasing anything remarkable. And this was my sister Pris, whom I had always thought so affectionate, so en-

These three were my principal legatees. If I had only known sooner! But how was that possible? I knew what I would do. I had made poor ghost, a dematerialized spirit, and that old idiot, Sharpitlaw, was so wed-ded to routine and old-fashioned custom that he would certainly regard a post-humous testament as informal, and as I was invisible he would treat my signature as null and decidedly void. When next I turned toward my amiable and disinterested family circle, I perceived that the breakfast things had been removed, and Tom Slowquicker sat in the armchair with my will spread

"There's someone missing," he said, looking around him, magisterially; "who Only my sister Minnie," Vernon re

marked, casually, "I went to her this morning, but she's so upset about his death that she feels quite ill, and could not come down to breakfast." "Don't be absurd," said Priscilla: to meet in this city on January 12, today agreed upon asking boards of trade or similar commercial bodies in cities of word." Then, sotto voce to her brother: "And that's what has upset to the conference." ber. I expect. She is afraid she has spoiled her chances of a legacy."

Oh, that spiteful Priscilla! If I could on Cow creek, Wyo., in only alter my will! But it was too late, for here was my executor standing, or rather sitting, in my place. At least there was one thing I could do; I would find my friend, the demon, and see if ar-"And that's what has upset to the conference.

ness of my unworthy self, which I had given her once long ago. And this was the girl who never spoke save to ridicule and poke fun at me, whose dislike for me was almost proverbial in the family: and yet the girl whose love—with usual human perversity—I would have given all the world to win.

Ah, this knowledge of her heart's secret was sweet to me! It gave me coursely all of a charity. Why shouldn't it happen to girls-and boys-In the days when fairles flew-

\*Verses acknowledging some flowers, sent him in gratitude for a reading he had given in aid of a charity.

self visible for a few moments, I should only succeed in terrifying my poor love out of her senses.

Alas! was this the realization of a hereafter? the punishment of early vanities and sins? To see things just as they are, and yet to be so miserably impotent after? the punishment of early vanities and sins? To see things just as they are, and yet to be so miserably impotent put away:
As I accompanied the mourners down to let them take the nubbins from your hands it might not hurt them, but if the how I knew he was a demon.

"Would you like to hear what they are saying about you and go to your own funeral?" he asked, pleasantly.

"People generally do attend that ceremony personally." I suggested; then, after a moment's reflection, I asked:

"Am I dead, then?"

"Of course. Did you not know it?"

"If I did it must have escaped my memory," I replied, imperturbably.

"Well, you are dead, but I will give you the remarkable power of going among your family in the spirit and invisible to them."

"That's very kind of you, but I've heard you people seldom perform services for nothing. What recompense do you heard was a demon.

As I accompanied the mourners down the steps, I suddenly perceived my friend the demon by my side. Vainly I sought to coach, but could find no room. I turned to him somewhat angrily, and remarked:

"I say, you promised I should go to may own funeral, but I don't seem to may own funeral, but I don't seem to may own funeral, but I don't seem to my own funeral, but I don't seem to him or my own funeral, but I don't seem to my own funeral, but I don't seem to my own funeral, but I don't seem to have been considered in the arrangement at all."

"You forget that corporeally you hold the place of honor at the head of the procession, but I know it will work because I have seen it tried in Iowa and Missouri. Why, a dog is one of the best cream raisers yet, if you only give head of the procession, but I we have been dyning off for the last few years! It is all caused by

Crimson Clover for Horses. The division of botany of the United States department of agriculture has investigated the cause of death of horses that have been allowed to feed on overripe crimson clover (trifolium incarnatum), a forage plant that has been boomed by the agricultural press of many of the Northern states. The calvx of this clover is densely beset with stiff "Earth to earth—"

A few lumps were thrown, and fell upon the lid with a grewsome rattle, and—

II.

I awoke with a start, and my eyes met those of my brother Tom, who asked, cheerily, "Well, how do you do now, old fellow?" But I turned from him—for I could not help thinking of him as I had ter. Priscilla, had therefore been keeping house for me.

I easily passed through the closed parlor door without opening it, which was very convenient, and found myself, unseen by them, in the midst of relatives from different parts of the country. They were waiting breakfast for some important person who had not yet made his appearance. I was foolish enough to think it might be myself and sat down to my customary seat at the foot of the table; but, of course, no one saw me. I hours following the appearance of the first symptoms. No bad effects are observed when the clover is eafen before the seed matures. The fatal effects have

mainly occurred when the plants were allowed to ripen and the straw and refuse, after threshing, had been fed to the horses. From all of which we con-clude that crimson clover is an excellent crop to plow under, or to allow to ma-ture and be used to reduce the surplus horse stock of the country.

Storing Onions. Onions have to be handled very fully in order to keep well. In the first place it is utterly useless to try to winter He considers the group of that inness the considers the group of that it is utterly useless to try to winter mines the ridge northwest of the town of Silver Peak, Ney, as embracing one of the most promising gold districts in the most promising gold districts in the West. The mines of this group extend along the line of outcrop for between three and four miles. They have never been opened up systematically, and very been opened up systematically, and very large in say in a kiln, in moderate heat

> good seed put in rich, thoroughly pre-pared soil as early as it can be made so; with vegetables hastened to early maturity by frequent cultivation with best tools, put on the market in a clean, liberal package and in attractive form, I find I can sell at fair prices even in close, hard times like this year has been. Some markets call for certain vegetables more than others. Find out what your market demands, and rather make a specialty of a few things. With me, pie-plant, asparagus, early cabbage and early tomatoes have been leaders in vegetables, and raspberries in small fruits. I do not go much on home-made tools for any purpose, rather relying on men who make a specialty of different machinery and garden tools. Our modern implements are especially adapted for their several uses. They are light, durable and a thing of beauty compared to the general run of home-made tools.

> for use during winter and early spring are yet more or less a terra incognita an unsolved problem, for the great mass of gardeners. Some suggestions have al-

The chickens will clean them of The chickens will clean them of Pound the shells fine by using the thimble of an old wagon hub. Set the big end down on an iron bottom bored full of 14-inch holes, with the un-Indianapolis, Ind., Dec. 5.—The executive committee in charge of the arrangements for the currency reform convention to meet in this city on January 12, today

losing altogether or nearly so the value of the corn stalks. This is now generally recognized as being too wasteful of valuable feed to be profitable. But some Western farmers think that growing rye to feed down is less wasteful than is to feed down is less wasteful than is corn for the same purpose. The rye straw as feed is undoubtedly not so valuable as the corn stalks, and where there is no market for the rye straw the grain crop may be grown for the purpose of tramping it down by hogs and pigs. A correspondent of the Prairie Farmer writes that he has found rye thus fed especially valuable for sows with young pigs. The little pigs pick up the rye grains scattered by the old sow as she crunches the rye heads. It is an excellent early feed, the rye coming to head before the Indian corn is anywhere near earing, and at a time when old corn in many farmer's cribs is exhausted. Besides, the rye is pound for pound worth more for growing animals than is the Indian corn, as rye ranks next to wheat in nitrogenous food nutrition.

Deafness Cannot be Cured in nitrogenous food nutrition. Oats for Feeding. There is reason for the fact that in proportion to its weight oats sell bigher than any other grain. They are worth more pound for pound than corn, not only because they are more nitrogenous than corn and their nutriment is there-

fore more easily digested, but because also the hull of the oats gently excites

the lining of the stomach, and thus aids digestion of all food in it. When both

proteids and carbon go into the stomach the carbon is better digested, because the system gets the nutrition it needs, and

system gets the nutrition it needs, and all parts operate more vigorously. With oats, oil meal and cotton seed meal and wheat bran or middlings, much straw can be fed and give good returns. Try to feed straw alone, and most animals

Seasonable Poultry Notes.

I have made the mistake of having the

poultry house too much crowded for best results during the winter, says E. T. Per-

kins in the Prairie Farmer. The best laying flocks that come tuder my obser-vation are those that have the run of

the barn floor, which is covered quite thickly with chaff. I would not bave hens

ween them, I should take hens.

Kill the First Weeds.

this autumn have caused a heavy growth of weeds all over this section. Many farm-

ers made the mistake of letting them ripen seed before cutting them, thereby

eeding the ground with noxious weeds for many years to come. About four years ago I noticed a few stocks of mul-

lein growing in our pasture. Thinking they would do no harm, they were left to grow. This fall the entire pasture

was overrun with them, and the grass with them, and the grass killed out in many places. This is the result of letting those first plants mature seeds four years ago. Will have to clean them out with hoes at a cost of several

Kruger's Great Strength.

Poultney Bigelow tells this interesting incedete of President Kruger in Har-

ancedote of President Kruger in Harper's Magazine for December: "He once
saw a Kaffir struggling in the river,
while other Kaffirs stood on shore as
spectators. At once he jumped in for
the purpose of saving his life. But the
black man lost his head and grappled
Kruger with such violence as to render
it more than probable that both would
drown together. Kruger was a splendid
swimmer, and was able to remain a very
long time under water. On this occa-

long time under water. On this occa-sion he could only rid himself of the frantic black by total immersion, and so

he remained under water for a period of time which thoroughly alarmed those who witnessed the performance, but at last he emerged upon the surface—without the Kaffir."

Bryan Man Buncoed.

A McKinley man in Cleveland wagered with a Bryan friend \$100 to a cent that New York would give over 150,000 plurality for the Republican candidate. A condition of this apparently great odds was that if the McKinley man won he should receive an additional cent for every vote in the plurality above 150,000. McKinley's plurality in New York

Gladness Comes With a better understanding of the transient nature of the many physical ills, which vanish before proper efforts—gentle efforts—pleasant efforts— rightly directed. There is comfort in he knowledge, that so many forms of sickness are not due to any actual dis-ease, but simply to a constipated condition of the system, which the pleasant family laxative, Syrup of Figs. Tromptly removes. That is why it is the only remedy with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact, that it is the one remedy which promotes internal cleanliness without debilitating the

organs on which it acts. It is therefore all important, in order to get its beneficial effects, to note when you purchase, that you have the genuine article, which is manufactured by the California Fig Syrup Co. only and sold by all reputable druggists. If in the enjoyment of good health. and the system is regular, laxatives or other remedies are then not needed. If afflicted with any actual disease, one may be commended to the most skillful physicians, but if in need of a laxative, one should have the best, and with the
