Scott's Emulsion

of Cod-liver Oil with Hypophosphites, can be taken as easily in summer as in winter. Unlike the plain oil it is palatable, and the hypophosphites that are in it aid in digestion and at the same time tone up the system.

For sickly, delicate children, and for those whose lungs are affected, it is a mistake to leave it off in the summer months. The dose may be reduced if necessary.

We recommend the small size especially for summer use, and for children, where a smaller dose is required. It should be kept in a cool place after it is once opened.
