The crop that has been raised in the Red River Valley this year will bring more money into the farmers' pockets, than any other crop in its history. Everything that has been produced on the farm brings good prices. Millions and millions of dollars have been paid to the farmers of the Northwest for farm produce during the past month and the coffers of the country banks are bursting with money. Prosperity has struck the country, the farming community, and that is the right spot where it should strike. When the farmers prosper, other lines of business will prosper also. In our opinion the Red River Valley is now on the eve of a development that will be a record breaker.

The suit brought by the government for the dissolution of the steel trust has caused a great deal of excitement throughout the country, especially in financial circles. It is the most important case since that against the Standard Oil company. The Sheaf publishes as a special feature this week several articles about the great case and who wish to be informed about it should read them.

The Turks have always proved themselves great warriors and latest dispatches from the seat of war in Tripoli shows that they are living up to their reputations. The Italians appear to be hard pressed.
