## THE BETTER WAY TO HEALTH

Nerve fibers begin in the brain, pass through the spinal cord, and end in the various organs and tissue which they feed.

Cut a nerve trunk, and the part severed becomes dead. This is proof that some kind of power passes over that nerve and is necessary for the part fed to work properly. Chiropractors call that power NERVE FORCE.

When this nerve force is transmitted over the nerve unhindered there is perfect health in the organ supplied. Any obstruction to the passage of this nerve force results in disease in the organ supplied.

If you are sick, you may be sure there is an obstruction to the flow of the life-giving nerve force. And you may feel equally sure that your return to health will depend on just one thing, namely, removal of the obstruction, permitting a restoration of the normal flow of nerve force.

Let us explain to you how the misalignment of small bones of the spine may cause a mechanical obstruction to the flow of nerve current, and how we, as Chiropractors, remove this obstruction, allowing the natural life forces within you to restore you to health. You will then understand why Chiropractic is acknowledged to be the better way to health.

## How The Master Driver Became Master Tire Builder

IN 1903, driving the "999" racing car, Barney Oldfield started his career of victories that later earned him the title of "Master Driver of The World." To overcome the tire weaknesses that made racing difficult and dangerous, he studied tires—specified materials—supervised construction.

Today, Barney Oldfield is known as the "Master Tire Builder." Starting with the crude tires which carried the "999" one mile in sixty seconds, Oldfield gradually developed his famous Cords—a set of which covered 500 miles at eighty-eight miles an hour without a change.

In three years Oldfield tires have won every important race on American speedways. They are the only

American tires that have ever taken first place in the French Grand Prix. They have won for three consecutive years in the 500-mile Indianapolis Sweepstakes. So far in 1922, Oldfields have lowered four World's Records and seven track records.

The Wichita Test Run gave evidence of Oldfield superiority in touring—when a set of four Cords covered 34,525 miles over rutted, frozen, winter roads—a performance attested by the Mayor of Wichita.

See your dealer and get a set of these rugged tires that Barney Oldfield has developed and perfected through a lifetime of practical tire experience. Their performance will convince you that they are "The Most Trustworthy Tires Built."
