Shutting the Germans. The allegation in a mendacious and periculous morning paper to the effect that the saloon keepers are to hold a mass meeting on Thursday evening, has been exploded by a German citizens. There is not a word of truth in the statement. The various German societies, however, will hold a grand reunion at that time and place, and this evening the preliminary committee meetings will be held. It is not a saloonkeepers' demonstration in any sense, and the lie flung by an unscrupulous paper was published for the apparent purpose of casting another slur at the Germans.

SOVEREIGN GRAND LODGE.

Interesting Matter Respecting the Odd Fellows this Week.

The Letter which Secured the Lodge to Minneapolis.

A Week of Banqueting, Junketing and Pleasure, as Well as Business.

The Odd Fellows will soon be among us in large numbers. It will be a memorable event, for which occasion an elaborate programme has been arranged.

It required no little work to secure the session in this city, and the influence which had more effect than all else was the letter addressed the sovereign lodge at the last session. It is especially commended for its novelty:

LETTER OF INVITATION. To the Sovereign Grand Lodge of Independent Order of Odd Fellows:

The grand representatives from Minnesota and in behalf of the Odd Fellows of the North Star state respectfully, cordially and earnestly invite the next annual session at the city of Minneapolis.

In extending this invitation we have no special promises to make—no clam bakes or cotton capostinas to offer. Situated between the old east and the new northwest, at the head of the Father of waters and being the entrepot of the Northern Pacific railway, the gateway of the Yellowstone park, with its marvelous scenery, to the Lake of the Woods with many smaller lakes, to the dalles of the St. Croix, and the valley of the Saskatchewan, to the define of the moose, the elk and the buffalo, of the bonanza farms and thriving cities, of bonanza farms and fine forests, of lake Minnetonka, Minnehaha falls, and the falls of St. Anthony, we wish to afford an extensive field to the people of "L'Ettoile du Nord" and the land of the Dakotas to entertain their guests. In the event of the acceptance of this invitation our guests will be entertained. "With cheer" brethren.

Fraternally, ED. A. STEVENS, W. G. DYE, C. W. SMITH, Grand Representatives of Minnesota.

THE BOARD OF TRADE.

They Accord Our St. Paul Neighbors One Point in One Score.

The Board Wants to Awaken the City from a Sort of Lethargy.

And Spends as Much Money as St. Paul Does in Advertising its Advantages.

The adjourned meeting of the board of trade yesterday proved quite lively and unusually interesting.

CITY STATISTICS. Messrs. Atwater, Pillsbury, Nelson, Nimocks and Steele, who were appointed a committee for the purpose of considering the matter of preparing statistics of the city for broadcast circulation, submitted the following report which was adopted:

We, the undersigned, committee, to whom was referred the matter of statistics of Minneapolis for general distribution, would report that they have had the subject under advisement, and further examination has strengthened their convictions of the paramount importance and necessity of the proposed plan. If the acknowledged supremacy, in all material and educational interests, which the city has attained in the Northwest, is to be maintained in the future, it can only be by the combined effort of our citizens, in impressing upon the world our own NATURAL ADVANTAGES.

The indomitable pluck and energy exhibited by our rival, in endeavoring to overtake us, by spending tens of thousands of dollars in advertising her advantages, commands our admiration and shames us by its contrast. Comparatively speaking, we have as yet made no headway in this direction, and our marvelous growth has been largely due to causes outside the direct efforts of our citizens to promote it. It is too much to expect this can be indefinitely continued.

Your committee recommend that a convenient and attractive hand book of advantages of the city and its surroundings be prepared for general free circulation, under the auspices of the board of trade. This to be in a convenient pocket form, illustrated with cuts of public buildings and works, on the subject of advertising. It is believed by the committee, after comparing with parties prepared to do such work, that 20,000 copies can be printed at an expense not exceeding \$750; cost of stereotyping, \$20. It is believed that an edition of not less than a large number of copies, and the ascendancy the city has attained in the Northwest, and when that question is presented to our citizens, we cannot believe the response will be other than prompt and emphatic.

The committee was continued with power to act.

ANOTHER INDUSTRY. Mayor Pillsbury addressed the board in the interest of a proposed match factory. He said in substance:

I have received a private letter which I consider an important communication from J. Lee Knight, president of the Electric Match Manufacturing company, of Topeka, Kansas, relative to the establishment of a match factory in this city. Mr. Knight's first visit to Minneapolis was on the occasion of the national encampment, and he was so favorably impressed by the city's natural advantages and resources that he became desirous of removing his factory here, and a natural supply of logs and planed Topeka for his business. The company has machinery and facilities complete for the manufacture of one hundred gross of matches per day, equaling an annual product of \$50,000. The company furthermore owns the patent for splint cutting machines.

The net manufacturing expense of the manufacture of matches, placing it at a very low estimate, is twenty per cent. It is proposed to add to the manufacture of boxes and packing cases, which will also employ a large number of people, and will add largely to the profits.

"A large majority of the work in the factory is done by boys and girls, and will give, consequently employment to those who cannot now get work. The company appreciate the advantages to be derived here in cheap power, and a natural supply of logs and planed. They estimate their present site at \$10,000, and ask that that amount be raised by Minneapolis stock holders, on a basis of \$15,000 to \$50,000 capital."

After a little discussion the matter was referred to a committee to recommend the proposition to our people for their consideration. The communication was referred to the committee on manufacturing.

RED WING.

[Special Telegram to the globe.] RED WING, Minn., Sept. 8.—The LaGrange mills, of this city, day passed into the hands of the Messrs. Busch Bros., bankers, here—consideration \$77,000. No further developments than already published in the GLOBE, respecting Mazyzeppa mills failure.

The Rabies of Inconistency.

One of the most rabid of the Blaine newspapers at the present time is the New York Irish World. Its unblinking inconsistency, and probably for like reasons, the Irish World of December 10, 1881, denounced James G. Blaine for "his funkiness to the English government," and is a man having "no conception of what is due to the honor of the United States," and declared that "he should never again be placed in a position where he can disgrace our government," and gave facts to justify its righteous condemnation of the dishonesty, the unpatriotic, time-serving spirit and "thunkism of James B. Blaine."

The following is the blistering arraignment of James G. Blaine, by the Irish World in 1881:

Broken in health and threatened with blindness, Mr. Boyton has at last been released from the hospital, here, perhaps to end his life, the latest victim of British tyranny. There is no more shameful chapter in the history of our international relations, than the one which records how this union of free men has been treated as a slave in a prison cell, week after week, without the government for which he risked his life interfering to secure for him even so much as a trial by jury. The Boyton case will ever remain a blot
