McClung, McMurrin, & Curry

Represent, as owners, nearly one thousand acres of land along the line of the St. Paul & Northern P. the railroad and Manitoba railroad, covering all the stations on both lines between the cities and in the immediate proximity to the most marked improvements now being made in local cities.

These are the most desirable and profitable real estate investments in the Northwest, and a large part of St. Paul. Two railroads compete for the travel from this choice spot of nature and from the stations of both lines communication can be had with either city in any fifteen minutes of the day.

Regarding the former property, the nearness of the city park, the Hamline university and the magnificent territory surrounding, with its hundreds of beautiful homes, make this property a delight to the eye of any one who will look a few years ahead. It is easy to see that in less than a decade Hamline will be the splendid center of as densely a populated city as the heart of St. Paul now is; that Snelling avenue will be a business thoroughfare lined with business blocks and the present fair grounds the spot on which will be held first an annual thirty-days' exhibit of the products of the whole Northwest, and a little later a world's exposition.

The entrance of the Chicago, Burlington & Northern railroad means a new era in the railroad development of the Northwest. This road, backed by one of the richest corporations in the United States, will throw its business and improvements in the twin cities and along the railroad belt now traversed by the St. Paul & Northern Pacific and Manitoba lines, which will add increase to the intrinsic worth of the property which we offer from 100 to 500 per cent. in a short time.

These are Solid, Substantial, Tangible Facts!

Now, if ever, is the time to buy. By purchasing from us you buy direct from the owners and save commission, and we sell in any quantity from a single lot to one or two hundred thousand dollars' worth. We offer the most liberal inducements and terms and extraordinary facilities, often giving five years' time and no money down to parties who will erect their own houses.
