James Rankin, general manager of the Knights of Labor co-operative farm in Crow Wing county, was in the city last week, and has placed the stock of the company on sale here. He reports the future prospects of the company as exceedingly bright.

Bi Lockout in Chicago.

According to the news from Chicago, there is likely to be a big lockout at the stock yards on the question of eight or ten hours per day. It is customary for the big packing houses to shut down for repairs in October, but this year the employers intend to remain closed until they can get the men to work ten hours per day. They claim that they cam ot do a profitable business with men working eight hours a day, when elsewhere men work ten hours at the same business. Accordingly 20,000 people will be deprived of employment, as the houses will simply remain closed until the men agree to work ten hours, and will employ none except on such agreement. packers also expect to evade any loss because the price of hogs is now high, and will be depressed by their action. One of the largest packers says of the case: Trouble is of course expected. It will be a long fight, but we can't run on eight hours with the other houses around us running on ten hours. So the trouble might as well

ten nours. So the trouble might as well come at once as to drag along until we are compelled to shut down by losses. It is likely that several of the houses will start up in a small way on the ten-hour schedule, and make the fight.

Cincinnati Industries. The Cincinnati Commercial prints several columns of industrial notes, giving the condition of various industries in that city. and the showing is decidedly favorable.

The summary is as follows: In the preparation of our industrial notes we have interviewed nearly three hundred of the leading industries of Cincinnati, and we are happy to be able to state that the great majority of them have reported a very gratifying improvement, not only in their respective lines of pro-duction, but in the various depart-ments of business and trade with which they

are more immediately connected. There is but one class of industries in the city that seems to have failed to feel the effects of the returning wave of prosperity that is evidently sweeping over the country. These are the industries more directly connected with the building interests, which received so fatal a building interests, which received so fatal a setback by the strikes and eight-hour agitations early in May last, and again by the combined strike and lockout of the bricklayers in August. The season was then too far advanced for a recovery of anything like the activity with which it had opened. While most of the important structures which were fairly under way in August will be carried up to inclosure hefore the winter sets in few up to inclosure before the winter sets in, few new enterprises have been inaugurated since

The workingmen have entered politics this seven in number, left Friday evening for the scene of action. This will be in many the scene of action. This will be in many the factor of action and their success has been somewhat astonishing. A list of names of men whom the Trades and Labor assembly desired to have elected to the legislature was made up and presented changes in the methods of the order—such as the abolishment of secrecy, etc.—will be discussed and action taken which will be of the utmost importance, politically. Liver Complaint

Is more surely and speedily cured by the use of Ayer's Sarsaparilla, than by any other remedy. ** I was a great sufferer from liver troubles, and never found anvthing that gave me permanent relief until I began taking Ayer's Sarsaparilla, two years ago. A few bottles of this medicine produced a radical cure.-Wm. E. Baker, 155 W. Brookline st., Boston, Mass.

A Remarkable Cure.

A Remarkable cure.

Ayer's Sarsaparilla has cured me of as bad a case of Abscess of the Liver as any human being could be afflicted with and live. I was confined to the house for two years, and, for the last three months of that time, was unable to leave my bed. Four physicians treated me without giving relief, and, in fact, nothing helped me, until I tried Ayer's Sarsaparilla. After using a quarter of a bottle of this medicine I began to feel better, and every additional dose seemed to bring new additional dose seemed to bring new health and strength. I used three bottles, and am now able to attend to my business. I walk to town—one mile distant—and return, without difficulty. Ayer's Sarsaparilla has accomplished all this for me.—W. S. Somewhat Remarkable Statements Made by Two St. Paul Ladies

Interviews With M ss Davison and Mrs. Kennedy That Will Be Read With Interest.

Certain Infallible Signs That Should Be Marked and Remarkbered.

I could not understand anything people said

"I live out in the country, at Morton, in Renville county, and out there I read in the papers about Dr. McCoy. 1 did not believe much in advertising, but I had tried other doctors without being helped, and I was SO DISCOURAGED

that I thought I would try one more chance that I thought I would try one more chance, though I did not believe in it. "Well, I went to St. Paul a month ago and have been stopping at Mr. Clark's, on the corner of Sperman street and West Seventh. I began Dr. McCoy's treatment at once, and now I am well. I can hear just as well as you can. It felt so funny when the buzzing stopped. The wagons on the street, the footfalls on the floor, the voices of my friends, everything seemed so dreadfully loud, for I had been unused to them for so long. My had been unused to them for so long. My head is clear, the pain is gone, my appetite is good, my hearing is all right and I am well. "People can say what they like about advertising, but I'm glad to

that I have been cured. I know what I suf-

fered, and I feel for others who may be affered, and I feel for others who may be al-flicted as I was."

Miss Davison is visiting in St. Paul at Mr. Martin D. Clark's, No. 297 West Seventh street. Her statement can be easily verified. Mr. Clark is a well-known property owner near the Seven corners, and he is conversant with these facts.

Unmistakable Signs.

When catarrh has existed in the head and the upper part of the throat for any length of time—the patient living in a district where people are subject to cararrhal affection—and the disease has been left uncured, the catarrh invariably, sometimes slowly, extends down the windpipe and into the bronchial tubes, which tubes convey the air to the different parts of the lungs. The tubes become affected from the swelling and the mucus arising from catarrh, and in some instances become plugged up so that the air cannot get in as freely as it should. Shortness of breath follows, and the patient breathes with labor and

and wheezing inside the chest. At this stage of the disease the breathing is usually mor rapid than when in health. The patient also

has hot flashes over his body.

The pain which accompanies this condition is of a dull character, felt in the chest, behind the breast bone or under the shoulder blade. The pain may come and go—last a few days and then be absent for several others. The cough that occurs in the first stages of bronchial catarrh is dry, comes on at inter-vals, is backing in character and usually most troublesome in the morning on arising or go-ing to bed at night, and it may be the first ace of the disease extending in th

by the cough; then there is a little tough, tenacious mucus, which the patient finds great difficulty in bringing up.

Sometimes there are fits of coughing induced by the tough mucus—so violent as to

cause vomiting. Later on the mucus that is raised is found to contain small particles of yellow matter, which indicates that the small tubes in the lungs are now affected. With this there are often streaks of blood mixed with the mucus. In some cases the patient becomes very pale, has fever, and expector-ates before any cough appears. In some cases small masses of cheesy sub-

stance are spit up, which, when pressed be-tween the fingers, emit a bad odor. In other cases particles of a hard, chalky nature are spit up. The raising of cheesy or chalky lumps indicates serious mischief at work in the lungs. Will Not Come Back.

Mr. Edward McGrath, No. 216 Fifth avenne north, Minneapolis, said: "I have had ca-

tarrh for five years. I have been used to working pretty regularly, and the drowsy, weary, dull feeling that the catarrh gave me was unbearable. Often dizzy spells came over me and I felt a kind of a buzzing or ringing in my ears, and there was a constant headache which made it hard for me to work, a pressure over my eyes and hot flashes like a fever in my head. As I grew weaker I was always catching cold. It onic catarrh I had when I went to s Dr. McCoy a little over a month ago. He told me that much of my suffering could have been saved if I had obtained proper treatment in the early stages of my disease. I went under his treatment. All the miserable symptoms of my disease left me. I began to get strong and vigorous again, and to-day I feel as weil as I ever did in my life. I have no fear that my trouble will come back to me."
