TO-DAY'S WEATHER. WASHINGTON, Sept. 17.—For Wisconsin: Rain, followed by clear, with a light breeze; variable winds. For Minnesota and Dakota: Slightly warmer; fair; easterly to southerly winds. For Iowa: Slightly warmer; fair; clearing in extreme eastern portion; easterly to southerly winds.

It seems perfectly clear that when the government, this instrumentality created and maintained by the people to do their bidding, turns upon and, through an utter perversion of its powers, exerts from their labor and capital tribute largely in excess of public necessities, the creature has rebelled against the creator and the masters are robbed by their servants.—President CLEVELAND'S Letter of Acceptance.

CONSPIRACIES TO ROB THE PEOPLE are not private affairs. MR. BLAINE is mistaken. PUBLIC OPINION is a "public trust," and that is the kind of "trust" Mr. CLEVELAND believes in.

The vote in Maine shows that the tariff issue is strong enough to pull every Democrat to the polls.

Like his "dollar a day" speech, it is possible that Candidate HARRISON'S pro-Chinese record is only a joke.

In the matter of "Trusts" Candidate HARRISON wishes MR. BLAINE would use discretion temper frankness.

JACK DEMPSEY says he will give JAKE KILBURN a "rattler," but then JAKE may give JACK a "stunner."

BECAUSE MR. HARRISON believes that a dollar a day is enough pay for a workman who he believes in a tariff.

JOHN CHIXAMAN need not expect to come in with Gen. HARRISON'S consent. The fact is, the general will not be there to give it.

THE TIMES laments the lack of "entree" in Kansas City. Our scholarly contemporary should immigrate to St. Paul. Here we have oceans of it.

TEX LOKS into the new Panama canal will be opened by 1890, says De Lessaps. A few weeks more and then the French will have the key to the Pacific ocean.

THE SAVING in the cost of clothing, sugar and coffee, for example, results from the tariff reform would pay off every Democratic tariff reformer in two years.

MINNESOTA has a special interest in the defeat of the Republican tariff bill. This fall, every mortgage upon her farms would be indefinitely prolonged by the success of the tariff principle.

AS EVIDENCE of the sweeping character of the political revolution going on among the German-Americans of Iowa, there is not a German newspaper in the state that supports HARRISON for president.

MEMPHIS and New Orleans have responded with magnificent generosity to Jacksonville's appeal for relief. They have seen the desolation of plague-ridden cities, and the pestilence walking at noonday.

THE death of Prof. Proctor has thrown New York into the convulsions of a yellow fever excitement. It is not, perhaps, surprising, as he is wholly unaccountable. Yellow fever cannot become epidemic in a northern latitude.

It is intimated that Republican papers have refrained from criticizing Judge THURMAN, speaks out of the mouth of his party. Let them sail right in and make mince meat of the old Roman if they can. He is not pleading the baby act.

MR. SPOONER, of Wisconsin, thinks "the bloody shirt" is the better issue for the Republican party. It only requires mendacity to wave the bloody shirt, while on the tariff question the Republicans must try to make "the worse appear the better party."

years ago. The Republicans were encouraged by the certainty of electing their candidates; the Democrats were working, as usual, with the certainty of defeat. The Republicans worked to show that there was a political tidal wave. The Democrats worked to show that there was not; and the Democrats won the point. If the Maine election shows anything, it shows a Republican defeat.

HE CAN BE TRUSTED. "He can be trusted to do right." Such is the voluntary tribute the Hon. EUGENE RICE pays to the one, EUGENE M. WILSON, in a recent article. It is the highest tribute that one person can pay another. The man who can be trusted to do right is the man, at all times and under all circumstances, to fail in a public station. Every man can do right, and everybody does do right at times. But it isn't every man who can be trusted to do right under every circumstance.

THE REPUBLICAN LEAGUE is having a hard time in "frying the fat" out of the adherents of the grand old party. Its latest exploit is a circular calling for \$1 subscriptions "to carry on the campaign against the free trade Democracy." "It is necessary," it says, "to raise a large sum of money, and to do it we must have the aid of every citizen."

HE CAN BE TRUSTED TO DO RIGHT. The New York Times publishes a comparison of the difference in the prices in New York and London of men's clothing, which every working-man and wage earner in the United States should read and ponder. The injustice of the outrageous system which makes this robbery of America possible is plain to the eye of the public. Here is the comparative list:

For instance, a broadcloth dress suit which costs \$50 in New York costs only \$22 in London. A spring serge overcoat which costs \$30 in New York costs but \$13 in London. A winter beaver overcoat which costs \$35 in New York costs but \$17 in London.

Suppose we analyze the remarkable facts presented in the foregoing, and inquire why there is such a difference in the prices of the two cities?

The answer is, our high protective tariff. No one will dispute that, with the tariff removed, the same goods could be purchased as cheaply in New York or St. Paul as in London; that is, as cheaply, with the freight added. The man, therefore, who pays \$140 for clothes in St. Paul, really pays the worth of clothes, on which he pays \$70 taxes.

And where do these taxes go? If the goods are manufactured in this country not one cent reaches the treasury. It is simply \$70 taken by law from the man who buys \$140 worth of clothes, and given to the man who grows wool and the man who makes cloth.

If the goods are made abroad, \$70 goes to a treasury which does not need it, and which can raise all the revenue it requires on whisky, tobacco and articles of luxury. In either case the purchaser of the clothes gets absolutely nothing for \$70 of the \$140 which he spends.

On buying the clothes, he had to pay \$70 to the clothing manufacturer, and stand such extortion? In result there is not a particle of difference between the direct tax in the one case and the incidental tax which the tariff imposes, and which not only thus unnecessarily and exorbitantly taxes the clothing of the people, but nearly every other article of merchandise.

How long will the people of a country which claims to be free submit to this legalized robbery, which those who uphold it, and profit by it, call a "protective" tariff?

Wool. In the campaign of 1884, GEORGE W. BOND, of Boston, an authority on wool in the United States, addressed a letter to Mr. GARLAND, president of the wool grower's association, which letter was then, and is now, regarded as a most valuable contribution to tariff literature.

Mr. BOND'S words are clear and to the point. He is a Republican and a protectionist; but, notwithstanding that, he declares that our fine wools have always been higher in price, all other things being equal, when we were able to freely import the wools of other countries at a low duty, or no duty at all.

It is intimated that our manufacturers can turn out woolen goods only by using foreign wools, with a low tariff, or none at all, they get that part of their raw material which comes from abroad so cheaply that they can undersell the foreign manufacturer in this market, instead of being undersold by him.

There is no occasion for congress to remain in session any longer. Everything has been done that is going to be done. The lower house has cleared up its calendar and is patiently awaiting the action of the senate on a number of important bills that have been sent to that body, and upon which there is no likelihood that the senate will take action.

adds that much to the load which the Republican party has to carry through the campaign.
