

SAINT PAUL.

AMUSEMENT NOTES.

Robson and Crane in "The Henrietta" at the Grand. Laugh and the world laughs with you. That's why Robson and Crane are so popular. They make you laugh whether you want to or not, and one of the most enjoyable of all their funny productions is their presentation of Bronson Howard's comedy "The Henrietta." It was played yesterday and tonight to a large audience, who thoroughly enjoyed the feast of humor that was spread by the celebrated comedians. "The Henrietta" is made and lost in the great game of speculation. William H. Crane appears as Nicholas Vanalystine, the King of the street, who has amassed a colossal fortune. He has two sons, one of whom, Bertie, is a "lamb," totally ignorant of business; the other, Nicholas, Jr., a sharp fellow, but thoroughly unscrupulous. "The Henrietta," a railway and mining corporation, in which the Vanalystines are deeply interested, is an object of attack by rival operators. The older Nicholas at every turn, and he is unable to detect his powerful secret enemy. During his absence the grand old Bertie, left Nicholas, Sr., reproaching his son for his baseness, leaves the broker's office believing himself to be bankrupt, but Bertie, who has considerable money, left his father's gift, hands the broker a check which a few minutes before 3 o'clock runs "The Henrietta" up again, and restores the millions to the father who had been betrayed by his son. Nicholas, Jr., seeing he had lost, is overcome by the shock and falls dead. As a matter of course Robson and Crane are the soul of the play, and they are supported by an unusually fine company, each one of whom gives spice to their respective impersonations. In the part of wars, far-sighted speculator, Mr. Crane is perfectly at home. He looks the character, and acts it naturally. Mr. Robson seems to have been moulded into a great actor, and he looks, and both of them provoke mirth by every word and look. In addition to possessing a finely constructed plot and finished lines, the play is cut and sutured on the financial methods of this age. The stage-setting is magnificent, being the same that was used in the Eastern metropolitan theaters, where "The Henrietta" had such a great success last season. The same bill to-night and the remainder of the week.

AT THE PEOPLE'S.

"Rosedale" proved such a drawing card last week at the People's and so many expressed a desire that the play be continued another week that the management have decided to their request and postponed the production of the "Marble Feast" until next week. Prof. Brooke has arranged a programme of music, far-spectacular, which includes a medley overture by Dave Braham, an idyl from nature, "The Blacksmith in the Woods," a valse caprice, "The Festival of the Birds," a romance, "The First Heart Throb," the whole concluding with a grand medley march, entitled, "G. A. R.," containing a number of the old time war songs.

Olympic Theater.

The initial performance of Minnie Burroughs' Burlesque company was greeted by a fair-sized audience in numbers and a large one in enthusiasm, the efforts of almost every artist being appreciated and worthy the applause received. The performance opened with the whole company in a musical scene replete with songs and funny sayings, entitled "Rowing in the Starlight," followed by Mr. Fay in pleasing songs, Mallely, Riley and Miss Mallely, in a comedy sketch, in which good singing and dancing were the prominent features; Waldo Whipple in a bone solo, and Minnie and Charles Burroughs in an original sketch entitled "The Fox Chase." James Gray sang some very clever songs; and Deliauer, "the human frog," justly deserves the title, as the exhibition of his wonderful gifts by him has rarely been equaled in this city. The whole concluding with the romantic extravaganza, "The Outlaw of the Forest," replete with pretty girls in beautiful costumes, pleasing songs and dances, etc., the center of attraction being Miss Minnie Burroughs. The same bill the rest of the week.

McConnell, of the geological survey staff, has just returned from the geological exploration of the Yukon and Mackenzie rivers. The Yukon is described as a river of immense size and volume, 2,300 miles long and navigable for fully 3,000 miles. It runs through about 200 miles of gold range, and precious metal may easily be seen by the naked eye in the ledges of rock that bound either bank; but, so far, all mining for gold is done by placer miners washing out at bars on the river from \$30 to \$50 per day. But this can be carried on for only about two months in the year, owing to the high water, and secondly to frost, which comes early and stops all operations. Precious metals are abundant, and can be met with in many districts, especially in the rougher country, and on nearly all rivers which he traversed.

To sell goods when the price is marked so EXTREMELY LOW that the most skeptical person can see at a glance that they are sold at a price way below their actual value. At least that has been our experience since we started our

Genuine Mark-Down Closing-Out Sale

When we concluded to go out of business in this city we put a price on our goods that we thought was so very low that the people could see at once that it would be to their interest to buy them, and at the rate we are disposing of our stock it looks as if we had got the price just where we intended to get it,

Way Down to the Last Notch.

Our trade is increasing every day. Take yesterday, for instance, was one that merchants consider poor for business, but our trade was the largest of any Monday's trade we ever had. It is only more conclusive evidence that the people realize that we mean what we say when we advertise that we are going out of business, and they see at once upon an examination of goods and prices that we are actually selling all of our New, Neat and Desirable

CLOTHING, FURNISHINGS AND HATS,

For Men, for Boys, for Children, At 25, 33, and on some goods 50 per cent

Less than they can possibly be bought elsewhere. Therefore they know it is for their own interest to LAY OUT THEIR MONEY where there is an actual saving of that amount. And we would still say to the people of St. Paul and the Northwest that this is a SQUARE DEAL and a GENUINE CLOSING-OUT SALE, as you will see by calling and looking over our large and complete stock of Fall and Winter Goods and noting the new price, marked in plain red figures on the ticket.

Genuine Reduction Closing-Out Sale

We would again WARN THE PUBLIC against these DISREPUTABLE IMITATORS and "TWO-PRICE BUCCANERS," who are breaking their necks trying to devise some unreliable scheme to attract attention their way, and will soon come out with their glaring banners, offering their broken stock regardless of price or value. They will stop at nothing in order to get trade. Look out for these kind of people. They are dangerous. Remember that the only

ELMO RESIDENCE PARK LAKE ELMO, MINN.

ANNOUNCEMENT!

In response to many inquiries, the Elmo Park Company announces its purpose of first offering its lots in "Elmo Residence Park" for sale

ON MONDAY, OCTOBER 22, 1888,

At 10 a. m., at the office of the company, Room 252 Drake Block, St. Paul. Until that date no lots will be sold, or contracted to be sold, in order that all may have an equal chance for a first choice. The prices of these lots have been fixed, and a printed price-list, together with a lithograph copy of the plat, will, after a few days, be furnished on application.

For three years the Elmo Residence Park scheme has received the careful study of the ablest specialists in Landscape Art and Civil Engineering. Prof. H. W. S. Cleveland was given charge, and sent by the company to the East to visit all the prominent residence parks there for the purpose of securing every valuable feature for this park.

Benezette Williams, the Eminent Civil Engineer of Chicago, who designed and constructed the water and sewerage system of Pullman, Ill., which is renowned for its completeness, is perfecting the plans for a similar system for Elmo Residence Park, which will be pushed to completion in time to meet the demands of those building.

The Elmo Park Company has platted 330 of the 750 acres owned by it at Lake Elmo. About 150 acres bordering the lake are to be inclosed, and will be known as "Elmo Residence Park." It is believed that no residence park scheme of equal completeness in all its details has ever before been offered. About 180 acres north of the railroad are platted as the town site of Elmo. The Park now has within its limits the Elmo Park Hotel, completely equipped in every particular, with its Electric Light Plant, Steam Laundry, Stables, Capacious Cold Storage House, etc., besides the Finest and Largest Fleet of New Cedar Boats ever provided for a lakeside hotel.

The lots average about a Half-Acre in size, and it is the purpose of the company to furnish the residents within the Park with every convenience for home life which they would secure in the best part of the city. A strip about 100 feet wide along the lake front is reserved for the common benefit of all lot owners.

About thirty well-known gentlemen of St. Paul have applied for lots in the Park, and many signify their intention of building next spring. Some will build Summer Cottages, but more will build Permanent Homes. Such restrictions will be made in selling lots as will secure a fine class of residences. No other buildings will be allowed in the Park except in the stable quarters, where private stables may be built by those not desiring to use club stables.

The Elmo Park Hotel will hereafter be practically a Club House for the use of those residents of the Park who prefer to take their meals at the Hotel. It will continue, however, to invite such guests during the summer months as have patronized it so liberally for the past three summers, and assisted in making it a very delightful resort.
