

SAINT PAUL.

IT IS OBSERVED

That the ball cranks are still here. That the boy now has his hair cut—or shaved. That the political situation is growing complicated. That the Y. M. C. A. building is still on the tapis. That the chamber of commerce still meets occasionally. That Gene Hay got some law from headquarter. That the river is higher than is usual at this time of the year. That the book beer sign has disappeared. That strawberry festivals are liquidating church debts again. That June has been a great month for weddings. That the theatrical business is to be lively next season. That the farmers will meet in two weeks. That the high bridge is becoming a popular promenade. That the street car company is pushing things in several parts of the city. That iron windows are filled with flowers. That everybody is sighing for an arctic blast. That one-legged beggars are getting numerous. That brown stone fronts are quite the thing. That the Wilburs will soon move on. That this weather is warm enough to suppress about everything but the Salvation Army. That Summit avenue never looked handsomer. That Jim Hill's big mansion is nearing completion. That William Henney Eustis hasn't "been kicked sixteen feet" for several days. That all who haven't had a vacation are sighing for one. That boating on the river is becoming popular. That there are several mashers driving hob-tail cars. That the collared dress is responsible for many colds. That the dazzling "blazer" has appeared. That there is a great deal of carriage riding after midnight. That local wheelman would like to get up a big meet. That this will be a big day at the lakes. That the twine trust is getting ready to get in its work on the Minnesota kruger. That St. Paulites are commencing to realize the importance of securing more manufacturing. That the Republican party is the farmer's worst enemy. That Bob Evans will talk the national platform into the Merriam convention of July 31. That the Northern Pacific offices haven't been moved to Chicago for a week or two. That Henry Villard is not being discussed to the extent he was a few months since. That Republican politicians are very leery of the independent movement among the farmers. That Gene Hay needs a great deal of advice from Washington for a legal officer of the government. That ladyward men are selling lots of window glass, now that the small boy has got on his base ball clothes. That George Lamo will like to take William F. Bickel's seat in the legislature.

ABOUT THE CITY.

Diphtheria. Soda water signs. July 4 in five days. Green apples are here. They are "little, but oh, my!" The street fakir is abroad. The trains are crowded going to the lakes. The school-ams are coming this week. Work is progressing rapidly on Tom Lowry's new arcade. The commission men are doing a large business in coal. Yesterday's rain cooled things off nicely. Riding on the electric line is a popular way of keeping cool. It is said that the St. Paul wholesalers are preparing for the largest business in their history the coming fall. The popularity of the falling around the court house lawn is being demonstrated as a losing game. A number of buses bank nightly on the enclosure of green grass that surrounds the capitol. The hot weather was hard on the hotel business last week. The very masculine girl is now having her clothes made with as many pockets as her brother's. This year's crop of flies are said by capitol officials to have more glue on their heels than any other year. The coal concert ground has largely patronized last week. The "kids" are still on deck, although they aren't making much noise.

GOT BACK ALIVE.

A Capital Quartette at the Lake-view Camp. An animated quartette from the state capitol accepted an invitation from Col. Bolester, of the Second regiment, M. N. G., and took a trip to Camp Lakeview, at Red Wing, last Thursday evening. The party was made up of Col. A. H. Bertram and Col. J. A. Lawrence, of the state duty commission; Matt Jensen, of the state treasury office, and B. F. Irvine. They went via the Burlington road, leaving at 7:30, and they arrived at camp, after crossing the lake by a ferry, about 10:30. They then called upon Col. Bolester at his quarters, and were cordially greeted. After dispatching a clerk to get the colonel's fine cigars and enjoying a delightful converse and listening to some of the colonel's provincial yarns, the deputies were conducted to sleeping quarters for the night. The party returned to St. Paul the following evening much refreshed, and declare that it was one of the pleasant little occurrences of a lifetime.

HEAT AND WHISKY

More Than Ordinary Human Beings Can Stand. Yesterday a drunken Swede was picked up in Swede hollow and locked up in the Margaret street station. Shortly after his arrival he died, probably from the heat and whisky. The man's name was Peterson, and the body was removed to the morgue. Capt. Hanft detailed a man to search the hollow for information concerning Peterson, but up to late last evening nothing had been developed.

ON THE DOWN GRADE.

Silly Girls Determined on a Short, but Merry Life. Officer Tom Galvin early Saturday morning picked up two young girls from Minneapolis, who had been out all night on a lark in St. Paul. They were held at the Central station until their friends were notified, who asked that they be sent home on a train. Officer McMahon placed the girls on a short line train, but later information from their friends was to the effect that they had not arrived. It is supposed that they got off at Hamline or Como. The girls are very young, but evidently determined to be bad.

ON JULY 4th

The steamer Mike Davis will leave the dock foot of Jackson street at 10 a. m., and 5 p. m. for Fort Snelling, Soldiers Home and Minnehaha Falls. Last boat leaves Soldiers Home at 6:30 p. m. Round trip, 50c. Also leaves at 8 p. m. for a Grand Dancing Excursion, good music furnished. Tickets, 50c.

POPE WAS NOT VICTOR.

The St. Louis Road Claims Its Position Was Sustained. A more careful analysis of the decision of the interstate commerce commission in the case of The Mankato Jobbers' Association against The Minneapolis & St. Louis Railroad Company, reveals that it was not in reality a victory for Gen. E. M. Pope, as has been supposed upon a cursory reading. It is, on the other hand, a vindication of the charges hitherto made by the Minneapolis & St. Louis road, and shipped to Mankato. The road has made switching charges of 10 per cent to Mankato, and that precisely what the commissioners directed shall be done. In shipping from Chicago to Mankato the freight must pass over a branch road from Waterville to the destination point. The syllabus gives some interesting points of information. It holds that transportation charges are to be relatively reasonable, as well as reasonable in themselves to prevent unjust discrimination. The generally recognized principle that cost of carriage is in inverse ratio to distance, and that therefore charges per ton should diminish with the distance is not a rule required by the statute, and is subject to qualifications. It is held that in view of the circumstances and conditions existing between the parties, the rate may be charged from Waterville to Mankato than from Waterville to Minneapolis, and that a difference of 10 per cent of the rate classes is reasonable, and should not be exceeded.

GOOD FOR ALL CROPS.

Farmers Do Not Grumble at the Hot Wave. The weather crop bulletin for the week shows that there was a pronounced increase in heat in Minnesota. The signal service reports show a weekly average for the state of 74 degrees, an increase of 9 degrees over the previous week. The minimum was 46, at Duluth on the 21st, and the maximum temperature was 94 degrees, at St. Vincent on the 29th, and the same at St. Paul and La Crosse on the 27th. The rainfall for the past seven days is reported as follows: Duluth, .02 inches; Fairmont, .15; Brainerd, .28; Farmington, .40; Rolling Green, .51; St. Paul, .71; Ortonville, .85; La Sueur, 1.50; La Crosse, 1.90; Red Wing, 2.94; Medford, 2.82; Roseau, 2.60; inches at Lac qui Parie, St. Charles, Jackson, Grand Meadow, Montevideo, Rochester and Granite Falls; and at Redwood Falls, 4.84. The count in the Red river valley received from a quarter to one inch. The sunshine reported is equally divided between "average" and "very much." The present hot spell following so much wet weather has been good for all crops and excellent for corn.

MAHOMET'S CHAUTAUQUA.

Mind and Body of Visitors to Be Invigorated. The programme is issued for the eighth annual Mahtomedi Chautauqua assembly, which meets July 1 to 19 inclusive. Independence day will be largely given up to sports. From 9 o'clock until noon, the X. C. A. members will give a series of contests in swimming, boat racing, tub races, calisthenics and base ball. In the evening they will give an exhibition of athletic sports in the amphitheater, the proceeds to be devoted to the purchase of boats for the club house. This will be followed by a pyrotechnic display. During the assembly Prof. R. L. Weston, superintendent of the Y. M. C. A. gymnasium, in St. Paul, will give the day classes in physical culture and swimming, and Mrs. C. L. Place, of the St. Paul training school, will conduct like classes for ladies. There will also be lectures, addresses, sermons and lectures, concerts by the Mendelssohn Male quartette and Christ church choir, of St. Paul.

EVERYBODY HAS A CHANCE

To Hear the Singing of Prof. Congdon's Pupils. Monday evening, July 7, a concert will be given in the People's church by pupils from the public schools under the direction of Prof. C. H. Congdon. One of the chief features of the programme is an exhibition to be given by the children in vocal culture and sight reading. This has attracted so much attention and elicited so many inquiries from members of the convention that it seems almost incredible that the children, who are the pupils of the church, should be so well trained. The church, therefore, has been secured for the evening preceding the opening of the convention, to enable the friends of public schools to enjoy the unique entertainment which has been prepared.

LITTLE KINZO

And Other Specialties at the Museum This Week. Little Kinzo, the tiny little Japanese juggler, will make the museum next week a very merry place; he, with his queer old-worldish entertainment and his Oriental antics. Little Kinzo has been easy to get up in this part of the country before. In his queer Japanese way he is one of the most amusing little persons that ever appeared upon the stage. He is part of the "Theatrical Midsummer potpourri of comic specialties. The electric girl, said to be a less routine person will also be in the potpourri. She exhibits in human life what has long been familiar in the animal kingdom. She is like the famous electrical fish, imbued with nature's own electricity. The theaters, with fun, and the circus hall, with its variety of entertainment will have their full share of entertainment next week.

Flying Leap From a Carriage.

A horse driven by Mrs. E. S. Warner became frightened at Seventh and Cedar streets yesterday and attempted to jump over the curb. The vehicle was sidled. Mrs. Warner, a lady and two children. Mrs. Warner became alarmed and sprang from the carriage, striking the sidewalk on the stones between the cable tracks, cutting an ugly scalp wound. She was picked up unconscious and taken home to 482 Broadway street. Her injury is not dangerous. The lady and children in the carriage were not injured.

Pop-Eyed Jim's Home.

"The Two Dams," of stolen Detectives Ahern and O'Connor, yesterday found a quantity of stolen articles in the room of Mrs. Robinson, the white wife of burglar James Robinson, alias "Pop-Eyed Jim." "Pop-Eyed Jim" has been tied to the grand jury for burglarizing the house of T. McGuire, on Rondot street. Among the articles were a gold watch and chain, taken from the residence of Adolph Olsen, 207 University avenue, some time ago.

Good for Property Owners.

The struck jury in Judge Wilkin's court returned a verdict in favor of Belwenger in the matter of his appeal from the award in the condemnation proceedings of the Belt Line railway for \$2,000. The damages assessed by the committee was \$600. Of about twenty appeals filed in the same matter taken to the district court, all have been decided in favor of the property owners, they receiving much higher awards than the sums fixed by the commissioners appointed to assess damages.

At the Astoria.

B. F. Ferriss is making this splendid hotel fully as popular as the Sherman under his management. Operated purely on the European plan, with a daily gala in connection, the house is daily gaining in the best class of patronage. Rooms on suite are very good parties by the month at very reasonable rates. Only a few left.

CREED IN HIS RACE.

Father Tolton, the Only Colored Priest in the Church of Rome. Born of Slave Parents, by Diligence He Mounts the Ladder of Fame. Speaks Several Languages, and His Future Exceedingly Promising. A Man of Fine Physique, Six Feet High and Straight as an Arrow.

From time to time the public has a new illustration of the fact that the race problem in the United States is becoming more easy of solution than was ad-

REV. A. TOLTON

mitted by the incredulous of a few years ago. The race problem is no longer a theory, but a condition. Twenty-five years ago people sought its solution with the aid of a spitting a board against the grain, but the colored man has found that it is possible to split the question with the grain, and has showed with examples of the folly of trying the cross-grained cut. The colored people found their way open to obtain an education, to acquire wealth, and to enter all the professions, and even politics. They have met with fair success in all these enterprises, and are being steadily introduced into the professions usually against the grain, but the colored man has found that it is possible to split the question with the grain, and has showed with examples of the folly of trying the cross-grained cut.
