NOTE AND COMMENT.

a shelf in the bath room, and in some manner the cork became loosened, cmitting the terribly disagreeable odor. It so happened that the proprietor of the house went into the bath room. He retired precipitately and, rushing to a telephone, notified his plumbers to repair to his house immediately.

"Something or somebody has fallen into the sewer pipes and died," said he, "come quick or we'll all get the fever.', The plumbers came, marveled at the smell, and tore up nearly every pipe in the house, but failed to find the decomposed object they were after. After working steadily for four days the plumbers were finally forced to admit that they were baffled, and could do nothing with the case. Thereupon they left the house. Meanwhile the young lady had another attack of nervousness and took the innocent little bottle away from the bath room. The landlord was immediately satisfied that the plumbers had accomplished more than they thought, and paid their bill ungrudgingly.

THE GROCERS' TRUST.

Another Man Who Frowns on Combinations.

The cry of trust has again been raised in connection with the Minneapolis Retail Grocers' association. At the last meeting of the association the by-laws were so amended that the portion of stock held by any one grocer can, if he withdraws, be turned into a general fund from which the other grocers can draw it. That is part of the proceedure of other combinations. But the trouble in this case arises over the bread agreeent. At a recent meeting of the asso piation an agreement was signed be-tween the bakers and grocers, by virtue of which the bakers sell to the grocers sixteen loaves of bread for a dollar, and the grocers retail it for five cents a loaf. H. G. Roth, one of the largest grocers in the city, refuses to accept the agreement, and gives his reasons for so doing thus:

"I refused to sign this this agreement because I considered it a boycott, which I didn't believe in. I am selling bread costing me 3½ cents at 4 cents per loaf. The grocers demand that I sell it at 5 cents, and order my baker to charge me 5 cents per loat until I agree to sell it at 5 cents. My baker is willing and satisfied that I should sell the bread at 4 cents, but has found it policy to obey their commands. I am in sympathy with the baker, and he with me, but as a matter of policy he compiled with the demand of the Retail Grocers' associa-

ents a loaf for their bread, and many f them have had to sell for the same orice. Hence the combination. Mr. toth says he will continue the war un-I the association comes to terms. Rooms Fitted Up for Them to Do Committee Work in.

The ladies of the convention reception committee met yesterday afternoon at convention headquarters to begin plans for their part of the work of looking after the convention visitors. The ladies expected to find just an ordinary committee room with plain hard chairs and bare floor. The suit of J. R. Snow, of Boston, to recover \$2,800 from Z. Demeules was considered yesterday before Judge Smith and jury. In 1890, after the Democratic successes in this state, Snow was induced to send a consignment of lemons valued at \$4,000 to Demeules. He claims that he was induced to do so by the report of Dun and Bradstreet's agencies, and accounts which he had heard of this place through the election. Joe Jepson was also said to be one of the promoters of the scheme. However, when the returns came to be made, it was found that there was a shortage of some \$2,800, and suit was commenced for this amount. The jury found a verdict in favor of the plaintiff in the full amount, with interest.

The general opinion seems to be that the jury is about to take up the Peterson matter, although as far as known no witness has been called who could throw any light on the workings of the office. Proposition to Reduce Tariff, Chicago to Seaboard. CHICAGO, April 12.-When the freight representatives of the Central Traffic association met in regular session today they were confronted by a question that was not down on the docket for consideration at this meeting. This

consideration at this meeting. This was a proposition to reduce the rate on grain from Chicago to the seaboard. The opinion so generally expressed two months ago that, in view of the increased tonnage this year, it would be possible to maintain winter tariffs throughout the summer on east-bound traffic has already been controverted.

For several weeks it has been apparent that some of the roads were shading grain rates, and thereby securing an undue proportion of the business. The conservative lines hesitated to meet these secret cuts, hoping that the guilty ones might be reclaimed and demoralization averted; but this hope has been dashed to the ground by the action of the lake and rail lines in openly annoting a rate of 17% cents per 100 pounds on grain from Chicago to the seaboard. This is 2% cents below the agreed differential, and will force the all rail routes to make a similar reduction unless they are willing to turn over the whole business to the boat lines.

The matter was only informally discussed at today's session and then, with all the other subjects awaiting consideration, it was referred to one of the various committees to be reported upon tomorrow. The association will probable tomorrow. The association will probably be in session two more days, and there is little doubt that before the adjournment it will be voted to reduce the

An Extensive Fire LONDON, April 12 .- A dispatch from Tokio says that the conflagration that broke out there on Sunday last did enormous damage. The dispatch is vague as to which portion of the city was burned over, but states that 6,000 houses were destroyed. The loss of life was heavy. Up to the present it is known that fifty of the natives lost their lives, and a number are still missing.

Prince George's Visit. London, April 12.-It is announced that Prince George of Wales, only son of the Prince of Wales, will make a visit to Canada in 1893. After visiting Quebec and Montreal and other places in the dominion, he will visit Chicago
