Students are flocking in. It is becoming general that this institution attracts students to merit and receive permanent and remunerative employment.

A short time afterwards two men called at the store of Mr. Hanson, in

NORCROSS, and represented themselves as being collectors for the cordage company.

The notes signed by Mr. Hanson they said were due, and he must settle. He did not have the money at the time, but agreed to meet them in this city at any time they might name.

They fixed yesterday as the day and the West hotel as the place. Mr. Hanson came to the city, drew \$400 out of the Metropolitan bank and went to the West, where he was met by the two bogus collectors.

They treated him, bought out of his pockets and invited him to dinner. Dinner, however, was not ready, and when it was Mr. Hanson did not eat any of it. He turned the money over to the men and asked for the notes.

They presented him with a number of notes which appeared to be the ones signed by Hanson. He turned them over to a wealthy friend, he said. It did not take Hanson very long to find out he had been swindled and that the notes he had received were forged.

The police were notified and are looking the matter up at the present time. Hanson thought the swindlers were employees of the cordage company, else they could not have known about the notes signed by Mr. Hanson and about the particulars pertaining to the time when they were due.

A visit was made to the office of the local branch of the company in the Boston block, where a manager declined to make any statement. He said, however, that he hoped the police would be able to catch the swindlers.

A letter from New Ulm states that two men answering to the description of the ones who fleeced Hanson, had played the same game on one of the farmers in that vicinity. The case of Hanson is being looked after by Inspector Harry McNeilly. The swindlers declined to start last night whether they had any clue to the swindlers or not.

WOMEN IN CONGRESS.

First Day of the Session Devoted to Woman's Work.

The much-discussed, widely advertised, anxiously awaited annual congress of the Woman's Council of Minneapolis, opened yesterday afternoon in the Hennepin Avenue M. E. church. It is not such a formidable gathering after the fashion of a convention, but it is quite important nevertheless. The women who compose this congress, as representatives of the fifty-seven women's clubs and societies of Minneapolis, are earnest women who are doing their share of the work that contributes to the advancement of the human race.

This congress serves to give an opportunity for summing up and epitomizing the work done by the clubs and societies in the past year, as well as for the interchange of ideas regarding the work being done along similar lines throughout the world.

The ladies were a bit tardy in beginning their work, but at 3:20 Mrs. T. B. Allen, president of the Woman's Council, called the council to order. Mrs. Charlotte O. Van Cleave offered prayer, the ladies joining in singing "The Lord's Prayer" and "The Lord's Prayer." The roll and the congress began. Mrs. E. S. Williams read the first paper, from the department of church work, on "Women in Mission Work."

Mrs. Williams traced the work of women as missionaries from the time of Ruth and Mary and Martha and Susanna, and down through the ages to the present. Wherever the church has been most successful she found it has been permeated by the spirit of mission. By the work of women and for women abroad began in 1860. Now more than fifty associations of women are working in the various denominations.

Dr. May G. Hood read a paper on "The Evolution of the Hospital." Her paper was an endorsement of the work of the hospital, and she had spent much of her time in healing the sick. As civilization has advanced hospitals have become more numerous and more important. Every precaution is taken to destroy the disease germ, and the women are doing their share of the work. They have a hospital of their own in Minneapolis, one of the best in the city, the Northwestern hospital for women and children.

Dr. Adele Hutchison read a pointed paper on "The Trained Nurse." She spoke of the psychology of the nurse, and of the need of scientific treatment of certain diseases. She is a nurse, and she knows how to keep clean. She also knows as much about scientific treatment of certain diseases as some doctors. She is a nurse, and she knows how to keep clean. She also knows as much about scientific treatment of certain diseases as some doctors.

Dr. Hutchison predicted that the time is coming when a nurse without a diploma from some good training school will be tolerated no more by the quack doctor. Mrs. H. L. Chase discussed in generalities "The Necessity for Public and Private Hospitals, with special reference to the city of Minneapolis on their management. She spoke enthusiastically of the benefits coming from contributions of flowers to hospitals.

Mrs. H. N. Shryock read a sketch of the life of Froebel, the father of the kindergarten idea, incidentally paying a high tribute to his work. His theories aim not merely at the development of the physical faculties, but the mental and moral side of the child.

Miss Francis Montgomery of the kindergarten association, read a paper on "Some Phases of Education." She dipped into the psychology of the kindergarten, and presented the only system that begins at the beginning and develops simultaneously the mental, physical and physical life. The children trained in the kindergarten has learned the necessity for self-government and self-control, and recognizes the existence of general laws and the necessity for concurrence in their observance.

Political-economics came last in the afternoon. Mrs. August DeWitt presented the ethical side of the single tax question, quoting from the Scriptures in support of the theory that the land is the property of God, and not of man forever. God's law, she argued, gave man an inherent right to the land. Under the present law lands were all restored to the people and divided every fifty years. Mrs. O. T. Erickson discussed the practical side of the question, and gave an outline of the single tax theory, and presented, clearly and succinctly, the arguments for single tax. This paper was new to the ladies.

In the evening Mrs. P. B. Warner presented her address as president of the woman's council. Mrs. Walker's paper was long and elaborate. It covered the ground of the woman's work in time to time by the newspapers of the work of the woman's council.

One of the interesting features of the evening session was a symposium on "American Women in Literature," in which Mrs. Leach, Mrs. Leitch, Mrs. Tucker, Miss Guphill, Mrs. Craigh, Mrs. Dutcher, Dr. Adele Hutchison, Mrs. Slater and Mrs. Manning participated. Criticisms were made on the work of some of the prominent women in American literature. The fact was also brought out that women are doing a large proportion of the best literary work in this country. Socio-economic questions were discussed under the head, "Some of the Causes of the Present Social Condition." The personal side of the question, Mrs. C. W. Keyes the social side and Miss

Presbyterian ministers adopted resolutions in memory of the late Dr. Campbell, and informally discussed the coming of B. Fay Mills.

Rev. J. F. McNamee on "The Influence of Romanism on Ireland." He attributed most of the ills from which Ireland suffers to Romish supremacy, and said: "Wherever Rome dominates her torch is blighting. With regard to Ireland and Catholicism the priest is behind every course and every step. The larger Ireland is in America, and the greater danger is for the American to be converted to the Romish religion. The Roman Catholics, the public schools are threatened and the restoration of temporal power is sought for from never before. Causalgia and the Stillwater-Paribault society are being set on foot to inaugurate a new era. No true Romanist can be a loyal American citizen."
