WILL PAY COUPONS. President Oakes Denies the Rumored Default of the N. P.

Bears Lying About the Road With More Than Usual Vigor.

The Debt of the Road Is Not Due Until September.

Chances Are That the Colorado Fight Will Be Amicably Settled.

New York, May 10.—"You may say that the coupons falling due in June will be paid," said President Thomas F. Oakes, of the Northern Pacific, today.

President Oakes spoke with considerable warmth. He said: "For another thing, the Northern Pacific has no such thing as a floating debt. It is a misnomer to call it a floating debt. It is a fixed charge. No part of it falls due in September. The amount is \$10,000,000. We propose to extend it for five years by an issue of collateral trust notes. Our plan for so doing is being considered when it will be laid before the stockholders and the public. We have ample time to carry out our plan, and we do so without interference in the form of pretended aid from persons who have sought to break down rather than build up our property. We are able to, and will so handle our affairs for the best interests of the property owners."

MAY SETTLE THE FIGHT. President Jeffrey of the Rio Grande, in Chicago, May 10.—President E. T. Jeffrey, of the Denver & Rio Grande, was in Chicago today, and though he himself declined to talk, it is asserted on all sides that he has come to Chicago for the purpose of settling the Colorado road fight.

Chances are that the Colorado fight will be amicably settled. President Jeffrey of the Rio Grande, in Chicago, May 10.—President E. T. Jeffrey, of the Denver & Rio Grande, was in Chicago today, and though he himself declined to talk, it is asserted on all sides that he has come to Chicago for the purpose of settling the Colorado road fight.

WANT LOWER RATES. Central Traffic Association Troubled With Resolutions. CHICAGO, May 10.—The general passenger agents of the Central Traffic Association were in session today, discussing matters of importance, as usual, a resolution was introduced tending to lower passenger rates to Chicago during the duration of the exposition. A very meeting of the Central Traffic Association in Chicago, the day before yesterday, somebody has introduced a resolution for an excursion rate from some place nobody ever heard of, to another which nobody ever heard of, making the tickets good for about six weeks, and good via Chicago, no matter whether the direct line be taken or not. It is 100 miles from Chicago. This shows the unrest prevailing among the passenger agents over the rates now in effect.

CANADIAN PACIFIC REPORT. The Road Earned Over \$21,000,000 During 1908. MONTREAL, May 10.—The annual meeting of the Canadian Pacific railroad was held today at the general office of the company in this city. A statement of the road's affairs submitted by the secretary for the past year is as follows: Gross earnings, \$21,469,381; working expenses, \$12,984,024; net earnings, \$8,485,357. Interest earned on deposits and loans, \$308,692. Total, \$8,794,049. Dividend on preferred stock, \$1,000,000. Dividend on common stock, \$1,000,000. Total, \$10,794,049. A clause embodied in the report regarding the issue of preferential stock to the amount of \$3,000,000, as well as the report itself, was generally adopted, and the meeting adjourned.

FAST RIDING. Mile in Thirty-Five Seconds on the New York Central. BUFFALO, May 10.—The new Columbia engine No. 999, of the New York Central, made the Buffalo express from Syracuse to Buffalo yesterday. East of Syracuse the train had lost twenty-five minutes on account of a foaming boiler, and it left Syracuse twenty-five minutes late, leaving Rochester at 4:15, or twenty-eight minutes late. Engineer Hogan set out to make up part of this time, and while it had not been intended to make any effort special time, he broke all known records in covering that section of the road. The sixty-minute run was traversed in 32:31, or twenty-eight minutes, between Grimsfield and the Forks, one mile was covered in 3:50.

IT'S A SECRET—that many women own their beauty to Dr. Pierce's Favorite Prescription. The reason is its purity, its form and face, as well as grace, radiance from within, and center in health.

GENUINE TRAGEDY. An Actor Blows His Brains Out on the Stage. VIENNA, May 10.—The theater at Lemberg, the capital of Austrian Galicia, was the scene last night of a most tragic occurrence, that caused consternation and horror among those who witnessed it. The theater was comfortably filled, but the play was proceeding satisfactorily when suddenly Herr Dalczuk, one of the actors, drew a revolver in full sight of the spectators, placed the weapon to his head and blew out his brains. Dalczuk's action was prompted by jealousy. In the play, a young actress of whom Dalczuk was deeply enamored, and who was generally supposed to have loved him, was betrayed by the actress. During the performance last night Dalczuk detected his sweetheart flirting with a man who occupied one of the stalls, and when the couple left the stage at the end of the act Dalczuk upranded the girl for her infidelity. She treated the matter lightly, and again when she went on stage instead of speaking his lines he walked close to the footlights, and, without a word, killed himself.

Accommodated a Prince. The day train to Chicago via "The Milwaukee" yesterday morning, which leaves the union depot at 7:50, was "royal" all the way. It had on board the Prince Roland Bonaparte and his party of seven. The prince is on his way around the world, having just arrived from San Francisco and will spend some time at the world's fair. A private parlor car was set aside by the Milwaukee people for the accommodation of the prince and party, and they were sent through in very sumptuous and elegant style.

President of Two Roads. New York, May 10.—George J. Gould has been elected president of the Missouri Pacific and St. Louis, Iron Mountain & Southern railroads.

Commencing April 23 the Chicago Great Western will sell round trip tickets to Chicago for \$18.50; single trip tickets for \$10. Hotel and boarding house accommodations secured in advance for visitors to the world's fair. City ticket office, 351 Robert street, corner Fifth

MAY CROP REPORT. Winter Wheat Shows a Reduction of 2.1 Points From the April Average. WASHINGTON, May 10.—The May returns of the department of agriculture on the condition of winter wheat show a reduction of 2.1 points from the April average, being 62.8 against 74.4 last month, and 81.0 in May, 1902. The averages of the principal winter wheat states are: Ohio, 58; Michigan, 71; Indiana, 70; Illinois, 62; Missouri, 72; Kansas, 51; the average for the United States is 64.2.

Many Fields Plowed Up in the Principal Producing States. WASHINGTON, May 10.—The May returns of the department of agriculture on the condition of winter wheat show a reduction of 2.1 points from the April average, being 62.8 against 74.4 last month, and 81.0 in May, 1902.

COMMANDER A. J. CRISS. What One of the Most Prominent of the Knights of Pythias Says of Paine's Celery Compound—It Made Him Well.

One of the best known members of the Knights of Pythias in Ohio, A. J. Criss, commander of the 8th regiment of uniformed knights, says of the remedy that makes people well: "I commenced using Paine's celery compound some time last spring. My trouble was catarrh of the head and stomach. I used two bottles and experienced almost immediate relief. I used many other remedies, but none of them did me any good. I have recommended the compound to a number of persons who are using it, and it will always be a pleasure to me to recommend it to the afflicted, as I am confident from my own experience that there is no medicine in existence that will build up the broken down system as quickly as Paine's celery compound."

TOO WARM FOR BULLS. Prices on Chicago Change Decline Because of the Brilliant Weather.

Wheat, Corn and Oats Close Considerably Lower Than on Tuesday.

Nobody but the Clique Knows Anything About Provisions' Course.

Wall Street Bears Succeeded in Establishing Considerably Lower Prices.

CHICAGO, May 10.—The brilliant weather throughout the West seemed to be the cause of a decline in prices on Chicago change today. Compared with last night prices show declines of 3/8c in wheat and corn, 1/2c in oats, 3/8c in pork, 5c in lard and 12 1/2c in ribs. There was a marked improvement in the pork outlook during the twenty-four hours. The rains in continental Europe appeared to have greatly relieved the situation there, and there had also been some rains in Kansas. All reports from the Northwest indicated a vast improvement in weather conditions there, with seedling going on rapidly and approaching completion. The Missouri report was also said to be better than expected yesterday, showing a condition of 75, instead of 70, as then reported. All this, taken in connection with the Wall street definitions, made the bull crowd nervous and hesitating, and there was free selling and not much demand. Longs made to unload and short sellers displayed more confidence than on Tuesday. But the bears did not have it all their own way. On the break shorts took profit, and the Michigan report was said to show 10 points decline during the last month, with a further decline of 10 points in the afternoon was expected to make a very unfavorable showing, as it would only deal with conditions up to May 1. The English crop was in jeopardy, as they had had no good rains since the beginning of the season. The market for the sensational higher Berlin and Paris cables, which showed advances of 2 1/2c, 3c, and 4c, was also active. The market for the sensational higher Berlin and Paris cables, which showed advances of 2 1/2c, 3c, and 4c, was also active.

ALBION'S FUTURE QUEEN. She Appears in Public With Prince George. LONDON, May 10.—The British Imperial institute was opened today with brilliant ceremony by her majesty, Queen Victoria. The sun shone brightly. It was what the British call "queen's weather," and the occasion was therefore most propitious for the homage of her majesty's subjects upon this, which, it is said, will be her last public appearance. An interesting feature of the ceremony was the presence of the Princess Victoria May, the betrothed of Prince George of Wales. The Duchess of Teck and the Princess May rode in the same carriage with the Prince of Wales and the Duke of York, and the Princess May was cordially and repeatedly cheered by the multitudes that thronged the route. The Princess May was evidently gratified by the demonstration and she smiled and bowed on every side in response to the applause. When the carriage reached the Imperial Institute, Prince George courteously gave his arm to the Princess May and escorted her into the building. The ceremony was a grand one, and the Princess May was cordially and repeatedly cheered by the multitudes that thronged the route.

ALBION'S FUTURE QUEEN. She Appears in Public With Prince George. LONDON, May 10.—The British Imperial institute was opened today with brilliant ceremony by her majesty, Queen Victoria. The sun shone brightly. It was what the British call "queen's weather," and the occasion was therefore most propitious for the homage of her majesty's subjects upon this, which, it is said, will be her last public appearance.

Duluth Wheat. Special to the Globe. May 10.—In spite of the fact that American markets elsewhere opened and ruled weak, Duluth wheat opened firm at 5 1/2c for July. It ruled irregular, going up 1/8c, sagging off again, and gaining lost ground and selling at the top figures at noon. July was active and there was a big demand. Cash was lively, too, there being a demand both for shipping and milling purposes. Cash opened 1/2c down, but its first trading in wheat to arrive was 1/2c off yesterday; but it recovered later and ruled firm throughout the session.

The firm market is attributable to the opening of navigation. Several boats of wheat will leave Duluth for Chicago before night, but the only shipments posted today were the Columbia, with 45,000 bu. of wheat, and the Hodze, with 25,000 bu. of wheat. The afternoon was dull, and a weak feeling prevailed. There was a steady decline, and a decline in the price of all the way from 1/2c to 3/8c, except for No. 3 and rejected, which closed unchanged, as follows: No. 1 hard, 73c; No. 1 northern, 70c; No. 2 northern, 65c; No. 3, 60c; rejected, 55c. May—No. 1 hard, 73c; No. 1 northern, 70c; No. 2 northern, 65c; No. 3, 60c; rejected, 55c.

ALBION'S FUTURE QUEEN. She Appears in Public With Prince George. LONDON, May 10.—The British Imperial institute was opened today with brilliant ceremony by her majesty, Queen Victoria. The sun shone brightly. It was what the British call "queen's weather," and the occasion was therefore most propitious for the homage of her majesty's subjects upon this, which, it is said, will be her last public appearance.
