Table Linens worth \$1 reduced to 75c.

## EPWORTH ETHICS.

Eugene Hornbrook Again Honored With the League Presidency.

The Place of Next Meeting Left With the Cabinet Officers.

Hamline University Given a Rattling Send Off Gratis.

A Regulation Sunday Programme Prepared For Today.

The Epworth league convention met yesterday morning at the early hour of 8 o'clock with a good attendance. The session was held in Central Park church with President Hornbrook in the chair. Rev. W. S. Cochran, St. Paul, opened with prayer, which was followed by devotional exercises conducted by Miss Mattie H. Foss, of Chateaufort. William H. House, of Lakeland, discussed on the subject of "The Amen Corner," which was heartily enjoyed.

The afternoon session was opened with a song service under the direction of Mr. Willis, and then reports were received from two of the committees. The committee on credentials reported an attendance of 261 delegates, representing sixty-eight churches. The committee on nomination reported officers for the ensuing year as follows: President, E. G. Hornbrook, Winona; first vice president, Rev. J. F. Stout, Minneapolis; second vice president, F. M. Rule, Mankato; third vice president, Miss M. A. Anderson, St. Paul; fourth vice president, Rev. R. N. Aiston, Owatonna; secretary, F. H. Hanson, Winona; treasurer, Willard Secor, Winnebago City; superintendent of junior work, Miss Alice A. Brown, Red Wing. Both reports were adopted, the latter by a rising vote. A discussion arose as to the next place of meeting, and invitations were extended from Duluth, Wascena, Winona and Mankato, but no decision was made, the matter of selection being referred to the chairman.

A most complete and interesting paper was read by Miss Christie A. Williams, of Duluth, on the junior league. Having first sketched the organization and growth of this branch of the work, Miss Williams described it as the kindergarten of the church—the place where the preliminary instruction was imparted to the infantile minds. She urged a close interest among parents in the work of the junior league, and recommended that, while each organization should be thorough, it should be carried out on independent lines and according to the methods best suited to its peculiar conditions. An appeal on behalf of the Ashbury hospital was made by J. B. Hinzley, of Minneapolis, and a plea in a considerable sum being subscribed. About \$120 were contributed for carrying on the state work. The rest of the afternoon was devoted to routine work. The evening session opened with a song service as usual, after which Miss Isabel Del Pent received a beautiful section, "That Changed Voice."

The address of the evening was delivered by F. B. Colwell, of Hamline, on the league and "Higher Education." Higher education, as he thought, increased a man's power to work for Christ, and that he spoke fervently to the young people, urging them to secure the best education possible; urged it on them as a duty to their country, to their society and their church and their selves and their Master. Mr. Bacheler, of Hamline, then in the old-fashioned Methodist fashion, as he said, made the application. He laid before the assembled young people the advantages of Hamline college as an educational home—recommended it as a financial and spiritual and social basis and assured them that they could do no better anywhere than they could right there in Hamline. He urged the young people to come. Then slips of paper were distributed through the audience so that any one who chose might write his name and address on them and they might feel assured that they would hear from the President of Hamline in a letter of sympathetic advice. The meeting was closed with a hymn and prayer. The league meetings will be continued through the day long.

## TURNERIN PICNIC.

The West Side Turnerin will have a picnic on the grand jury.

## IN THE NICK O' TIME

Did the Troops Arrive to Save the Life of Agent Walker.

Bad Indians Were Then Engaged in Stirring Up the Bucks.

Worse Whisky Was Also Getting in Some Effective Licks.

Deputy Marshal Sheehan Returns and Tells the Whole Story.

Col. T. D. Sheehan, deputy United States marshal, arrived in the city yesterday from the scene of the trouble among the Leech Lake Indians, and after receiving instructions from United States District Attorney Hay and Marshal Donahoe, left for the scene again last night, armed with warrants for the arrest of a number of Indians who are implicated in the uprising which resulted in endangering the life of Dr. Walker, the superintendent of the reservation. He has also a warrant for the arrest of Dr. Walker on the charge of shooting an Indian. He will also doctor be kept there until he is proceeded against by the proper authorities for the shooting and wounding of one of their number, and the concession of the soldiers, where he was placed by Col. Sheehan. The Indians desired that the doctor be kept there until he is proceeded against by the proper authorities for the shooting and wounding of one of their number, and the concession of the soldiers, where he was placed by Col. Sheehan. The Indians desired that the doctor be kept there until he is proceeded against by the proper authorities for the shooting and wounding of one of their number, and the concession of the soldiers, where he was placed by Col. Sheehan.

## ELEVATOR RECEIPTS.

Representatives of Dealers Therein Express Disappointment After Investigation.

Minneapolis Warehousemen Are Found to Be Operating Independent of State Law.

Messrs. Fish & McLeod are the Chicago representatives of the famous and wealthy Bank of Nova Scotia. It is well known that this bank deals largely in the warehouse receipts that are given when wheat is placed in elevators. These gentlemen have been spending several days in Minneapolis looking over the methods of the elevator companies and the manner of doing business, with a view to determining whether or not the same is practical, and that the future investments of the bank in the securities that the wheat men have to offer are safe. To their surprise, it was found that only a few of the many warehouses employ elevators, and that the majority of the warehouses were conducting business under the laws of the state and have licenses from the state, under the state license law. They are conducting private elevators according to the laws of the state, and the gentlemen making the investigation is related, are not a little disappointed. The state has made a code of stringent laws regulating the conduct of public elevators, and the system of grading must be according to the prescribed conditions of the state, and the public elevators and warehouses comparatively little chances are taken; but in all private institutions where it is allowed the chances are greatly enhanced. The private warehouses are conducted according to the laws of the state, and the gentlemen making the investigation is related, are not a little disappointed. The state has made a code of stringent laws regulating the conduct of public elevators, and the system of grading must be according to the prescribed conditions of the state, and the public elevators and warehouses comparatively little chances are taken; but in all private institutions where it is allowed the chances are greatly enhanced. The private warehouses are conducted according to the laws of the state, and the gentlemen making the investigation is related, are not a little disappointed.

## KNIFE AND BULLET.

Two Assaults Have Cases Continued in Court.

The examination of James Murray, who stabbed Michael Costello on Commercial street a week ago, was continued for one week in the police court yesterday. William Harkins, who was with Murray at the time, was remanded to await the hearing. Costello's case was continued for one week, and will be in court yesterday.

Fred Eschle, who shot Frank Bellinger in the foot on the upper deck Friday night, was arraigned in the police court yesterday. Owing to Bellinger's wound keeping him in the hospital, the case was continued for one week. William Hazey, the negro who was with Eschle when the shot was fired, will be kept in custody until the case is tried.

## FRUITLESS INVESTIGATION.

CHICAGO, June 17.—The federal grand jury adjourned today and was discharged. The investigation into the affairs of the railroad companies regarding alleged violations of the interstate commerce laws apparently came to naught in so far as is shown by the returns of the grand jury.

## FOUND BY PROSPECTORS.

Petrified Dwarf Dug up in Colorado Gulch.

GLENWOOD SPRINGS, Colo., June 17.—While prospecting yesterday in Dry Gulch, two and one-half miles from this city, unearthing in the petrified and almost perfect form of a man. The features, which were well preserved, were pronounced by some persons who viewed it to be those of an Indian, while others insisted that from the broad, flat nose, seven inches; width of face on cheek bones, four inches; chest, thirty-three inches; hips, thirty-one inches; height, five feet and six inches. The man was certainly a dwarf, as the total height of the petrification is but four feet two inches. He was not a child, for the muscular development precludes such a conclusion.

## PROPOSED REDUCTION.

GALVESTON, Tex., June 17.—General Passenger Agent Keenan, of the Santa Fe, today addressed a telegraphic proposition to passenger agents of all Texas lines to reduce the present world's fair rates to one and one-third round trip fare to Mississippi and Arkansas river gateways added to the Chicago arbitrary rate—making a sweeping reduction. Responses are expected by Monday and the rate probably will be inaugurated Tuesday. If other Texas roads object a general rate war is predicted.

## HOW'S THIS!

We offer One Hundred Dollars Reward for information that will lead to the capture of the man who can not be cured by Hall's Catarrh Cure. F. J. CLENNY & CO., Props., Toledo, O. ## BUILDING IS BOOMING

The Net Work of This Year Far in Excess of Ninety-One or Two.

Total Cost of Building Considerably Beyond the Inspector's Figures.

The Government Building Will Reach Above Two Floors This Year.

Work on the Hill Colleges and Upon Other Projected Structures.

The building season, which has just fairly opened, promises to be the best experienced in St. Paul for many years. The total amount of building permits issued during the past month exceeds that of the corresponding period of 1892 by about 25 per cent. The amount of money expended for buildings in this city cannot be ascertained from the records in the office of the building inspector, as it can in other cities. In St. Paul the inspector's fee is regulated by the cost of the building for which the permit is issued, and there is a natural tendency on the part of the builders to give figures considerably below the actual amount they intend to expend. In Minneapolis a uniform fee is charged for building permits, and, as it costs no more to take out a license for a \$100,000 building than for a \$25 shed, there is a natural exaggeration in the amount of building as shown by the official records. This shows why the building statistics of Minneapolis exceed those of St. Paul.

The most important structure under way in St. Paul just at present is the government building, which is being pushed forward by the city. The structure is being pushed forward by the city. The structure is being pushed forward by the city. The structure is being pushed forward by the city.

Next to the postoffice, probably the most important construction work under way in the Hill section at the west end of Grand avenue. This institution is to comprise seven buildings, six of which are already in process of construction. The south dormitory and the class buildings are now under roof, and the administration building will be under cover within a fortnight. The north dormitory is up in the second story, and the other structures are being pushed rapidly.

Work has just been begun on a five-story brick and stone building on Watouska street, between Sixth and Seventh. This structure is being put up by the Boston & Northwestern Real Estate company, and will be occupied by the Globe Printing Co. The building is a beautiful residence to be built by William F. Graves, of Graves & Vinton, on Summit avenue, east of Dayton street. The house will be of frame, 50x50 feet, three stories high, and of the colonial style of architecture. Work on the building will be started this or next week. Mr. Johnston has also made plans for several other fine residences—one for Mrs. S. S. Welch, corner Dayton avenue and Court street; one for Dr. B. H. Ogden, on Holly avenue near Kent street, and one for J. A. Shaub, on Lincoln avenue near Dayton street.

P. J. Bowlin's handsome new residence on Summit avenue has just been completed, and E. N. Saunderson's house, on the same street, is nearing completion.

The interior finish is now being put in the Park church, corner Mackubin street and Holly avenue, and this beautiful edifice will be entirely completed in about a month.

William Kingsley, the architect, has just finished plans for three splendid new detached houses. One is to be built by H. J. Conrad at the corner of Portland avenue and Dale street. It will be composed of six three-story houses of pressed brick and brown stone, and will cost \$33,000. The contracts will probably be let this week, and work will be begun at once. The other two buildings for which Mr. Kingsley has made plans will be located near the corner of Tenth and Olive streets, and will cost \$15,000 and \$18,000. The builder's name cannot be divulged at present, but the work will be under way within a few weeks.

C. R. Dewey has made plans for a store building to be erected on Sixth street opposite Schuneman & Evans'. It is to be a three-story building of brick, stone and copper, and will cost \$8,000. Work will be started on the structure by July 1. Mr. Dewey has also finished plans for a \$2,000 residence to be built by Dr. Hubbell at Hazel Park.

Work on the big Bersford and Dickerman business buildings, on opposite corners of Sixth and Minnesota streets, will soon begin. The Dyer block on Fifth street is nearing completion and work continues rapidly on the Lowry building on St. Peter street.

The architects of the city are all busy making plans for buildings which will be started within a month or two, but they are not at liberty to divulge particulars in many cases just at present. Cass Gilbert says this is the best season he has ever had, and many other architects talk likewise.

Transcontinental Rates Tumble. New York, June 17.—Transcontinental freight rates took another tumble yesterday. The Canada Pacific railway again carried out its principle of insisting on a differential of 10 per cent below the rates by any other line between New York and Eastern cities and San Francisco. It made a reduction of 10 per cent below the last class rates announced by the Southern Pacific. The Southern Pacific issued a tariff, which was the result of a meeting of the rates of the Canada Pacific, thus wiping out the differential, which it claims the latter company is not entitled to.

DR. HURD, 24 East Third Street, ST. PAUL. PATENT SYSTEM OF EXTRACTING TEETH WITHOUT PAIN.
