WHEAT TOOK A SPURT.

COLD WEATHER CAUSES A JUMP IN MAY WEATHER.

FREE SELLING AT AN ADVANCE.

Which Caused a Reaction, and the Close Was at a Gain of a Cent Over Saturday—Provisions Ruled Dull and Higher—Oats in Good Demand—Corn Dull at an Advance.

CHICAGO, March 26.—Wheat went up with a spurt today because of the energy the temperature had shown in going down, and the result was an early gain of 1/8c for May. There was free selling at the advance, however, and after a nervous, unsettled session, May closed 1/8c from the top, but with a gain since Saturday of 1/2c. Corn and oats were a shade firmer, in sympathy, and made a gain of about 1/4c each. Provisions ruled dull, but firm, at somewhat higher than Saturday's closing.

The severely cold weather told with considerable effect upon the wheat market. All doubts about the growing wheat having been jointed were set at rest as soon as the market opened. In fact, from the lively leaps that portion of it that was exposed in the trading pit took at the start, the operators declared it double-jointed. The effect of the prevailing cold weather did not affect all of the wheat, however, as the shorts were rather inclined to make light of it, and refused to be frightened into covering. Others, however, were thoroughly alarmed, and bid from 5/8c to 3/4c for May, as compared with 1/2c sellers at the close of the market Saturday. It reacted to 5/8c and rose again, reaching 5/4c, all within the first hour. Trade during the time referred to was active, with orders from outside of the quarters in the South and Southwest where wheat was presumed to be most seriously frost-damaged. The actual extent of the injury done to wheat, it was generally conceded, could not be definitely ascertained until future warm weather should reveal it. In addition to the frost scare, the receipts were light. Chicago got 41 cars, Minneapolis 201, and Duluth 19. The receipts for the corresponding day of last year at the same places were respectively 538, 248 and 68 cars. The visible supply showed a smaller decrease than the average of the previous guesses. The decrease was 1,000,000 bu, leaving 72,162,000 bu still in the visible. There was a decrease on the corresponding week a year ago of 812,000 bu, and the total then was 78,308,000 bu.

It was said that the amount of wheat flour on hand in the country at the close of the week of 2,250,000 bushels; that and the impossibility of determining how much, if any, damage had been done to wheat, by the frost, made the market rather inclined to weakness in the last hour of the session. May sold off to 5/8c, but rested at 5/4c.

There was no life in corn except what was injected into it from the wheat pit. That was sufficient to add 1/4c to Saturday's closing value for a moment at the opening, but that advance was not sustained. It dropped off to about the previous trading day's closing prices, but firmed up once more at the moderate estimated receipts for tomorrow and a decrease in the visible. May opened at 37 1/2c, sold off to 37c and recovered again to 37 1/2c, closing at 37 1/2c.

Oats were in fair demand and offerings were only small. This, with the firmness of wheat and corn, caused higher prices in oats. May started 1/4c up from the last quotation Saturday, sold at 31 1/2c, and then, influenced by the increase of 200,000 bu shown in the visible supply of oats, declined to 30 1/2c (90%). It rallied again slightly, and when the session ended 30 1/2c was bid. The provision market was dull, but maintained an undertone of firmness, closing with 7 1/2c gain over Saturday's closing price for May pork and lard, and 5c higher for May ribs. Lard was influenced to some extent by the premium of 20c received the month brought over the May delivery. J. G. Slicer was a seller of pork to a moderate extent, and Sam Wolf was a buyer. Steady prices at the yards and the strength in the grain markets helped the prices.

Estimated receipts for tomorrow: Wheat, 32 cars; corn, 220 cars; oats, 168 cars; lard, 21,000 lbs.

The leading futures ranged as follows:
