The organization, composed of native-born citizens, which had hitherto styled itself the Ninth Ward Republican club, joined hands and issues with the Swedish and Polish Republican clubs of the ward, at a recent meeting.

It now transpires that the Swedish element of the grand aggregation, including some of the other members, are sick of their bargain. Mr. Anderson, with Nelson-Tenney & Co., is said to be the prime mover in the revolt, and he and some of the others met last evening at Carpenter's hall, 2320 Central avenue, and aired their grievances. They claim that a certain few of the big club are trying to run things to suit themselves, and that the club, instead of being broad in its scope, under the management of the certain few, partakes too largely of the nature of ward politics, and will be used for the political aggrandizement of the leaders.

The committee on arrangements of the Ninth Ward Republican club proper met last evening at 500 Monroe street northeast and discussed arrangements for the rousing political demonstration in which the club proposes to hold on the evening of March 15, the next regular meeting. The speakers to be invited Sub-committee on discipline, Judge A. H. Young, C. T. Thayer, J. W. McManis, D. F. Simpson, W. A. Lancaster, Louis A. Reed, finance committee, J. O. P. Wheelwright, F. N. Thayer, secretary.

Wagoner Receives Nothing.

The Powers Dry Goods company and the Wyman-Partridge company have won the suit brought against them in the civil branch of the municipal court by August Wilson. The plaintiff alleged that the defendants had paid him a salary for appearing in their behalf in the lawsuit, which was a number of other cases of the same kind now pending, but the verdict yesterday may cause them to be dropped.

ANCIENTS' DENSE

DATED BEGINNING OF YEAR FROM OPENING OF SPRING, WHEN ALL THINGS IN NATURE Start Afresh—Some Other Things in Which the Ancients Have Given Us Points.

The ancients began their year with the advent of spring. How much more appropriate thus to begin the New Year with the new life of nature in the awakening spring. At this season all processes throughout the natural world start afresh.

The ancients also showed their sagacity and appreciation of the great changes and active processes of the spring time, by realizing that this is also the time for renewed life and energy in the human system. They well knew that the blood should be cleansed from impurities and the nerves reinvigorated at this season. Hence the establishment of the custom of taking a good spring medicine.

This most sensible and healthy custom is followed by almost everybody at the present day, few people of intelligence venturing to go through this trying time of change from winter to summer without taking a spring medicine.

The unanimity on this subject is a settled fact; the only question heretofore has been as to what is the best thing to take. The people are now fast becoming unanimous in their decision that as a spring tonic and restorative Dr. Green's Nervura blood and nerve remedy is pre-eminently the best.

Year after year Dr. Green's Nervura blood and nerve remedy has proved itself the surest, most positive and reliable medicine. Made from pure, vegetable medicines, it invariably cleanses, purifies and energizes the blood, making the blood rich and red, and at the same time, by its invigorating effects, giving strength, power, vitality and energy to the nerves.

In fact, Dr. Green's Nervura blood and nerve remedy has proved itself the most perfect of medicines and just what everybody needs for a spring remedy. Try it this spring.

Mr. Stoughton L. Farnham, of Manchester, N. H., says:

"Some time ago I was troubled with lassitude and a swelling of the legs. I did not have the ambition to do anything that demanded unusual physical exertion."

"I was recommended by a friend to try Dr. Green's Nervura blood and nerve remedy. I took two or three bottles, and I can now say that it did me good. I can now do any work as a tonic, as I know it helped me."

Remember Dr. Green's Nervura blood and nerve remedy is recommended by physicians in all cases of the well-known specialist in nervous and chronic diseases, Dr. Greene, of 35 West 14th St., New York City, who can be consulted free of charge, personally or by letter.

Salisbury's Views on Trade with the Colonies.

LONDON, March 10.—The Times says, regarding the Empire Trades League's memorial in favor of the insertion in that commercial treaty with Germany and Belgium which prevents the British colonies from levying a lighter duty on British than on foreign goods:

"Lord Salisbury has written to Col. Howard Vincent that he is in thorough accord with Mr. Chamberlain on the importance of securing the trade of the colonies for British producers. While England would never again agree to such incoherent stipulations, he has no objection to the insertion in the termination of these otherwise valuable offers, which would be a step in the direction of a more liberal trade within the empire as to fully compensate for the risk involved."

The council of the league has decided to submit Lord Salisbury's letter to the colonial governments, with a view of securing definite proposals.

Strong Sentiment Against Heavy Naval Appropriations.

WASHINGTON, March 9.—Another step was taken today by the house naval committee toward the completion of its appropriation bill. The items for the support of the marine corps, which are practically the same in amount as those carried by the last bill, were settled, and some minor details. There remain the questions of the number of new battleships, and the building of a dry dock at Algiers, near New Orleans, which may be considered tomorrow. Since the appearance of Chief Hitchborn, of the bureau of construction, before the committee last week, two or three members have predicted that the battleships would be reduced from six—the number recommended by the committee—to four—because, he asserted, the armor-plate plants now at work could not turn out enough armor to keep pace with the building of more than four ships. A difference of opinion exists in the committee on this point, because Secretary Herbert and the chief of ordnance of the navy expressed their views to the committee that armor plate could be produced for six or more ships.
