They Submit to Another Defeat From the Prohibitionists—Score 20 to 13.

Special to the Globe.

DUBUQUE, Ia., April 5.—Phyle went down in the ninth under the terrific cannoning of Raymond's men. Baxendale, who undertook to pitch for Dubuque, was as wild as a hawk, and after St. Paul had pilled up nine runs, Dick Smith, of Cincinnati, went into the box. St. Paul had hard hitting after that, while Glascock's error in the seventh let in three runs.

Dubuque never looked dangerous until Bears' three-bagger in the ninth had been reinforced by Jimmy Long's home run. A base on balls, Shugart's error and five hits completed Mr. Phyle's undoing. The 2,000 spectators were frantic with delight and drowned the umpire's voice with their cheers. Burns hit to short and Spies a fly to right, but Comiskey's hopes revived when Kraus managed to get hit with the ball. At this crisis Mulane stepped into Phyle's place and singled to left. O'Rourke was overdue, but instead of the much wanted hit he sent a grounder to the pitcher and the tragedy was consummated. Score:

Score table for Dubuque vs St. Paul. Dubuque 0, St. Paul 10.

MILLERS LOSE AGAIN.

Hawkeyes Make the Score 20 to 13.

Special to the Globe.

DES MOINES, Ia., April 5.—The Minneapolis base ball players tackled the Des Moines aggregation again this afternoon, and the Prohibitionists have still another feather in their cap. They were again defeated by the Minneapolis players by the score of 20 to 13, in the presence of fully 1,500 enthusiastic admirers. Jim Duryea was in the box for Minneapolis, and the Des Moines players were in the box. This is the simple story of the game.

A total of twenty-one hits was made off Duryea, but it is fair to say that, in a regular league game, many of these hits would have been quick. McCredie, of Des Moines, made a home run that Dan Lally should have got, and would, had he been in condition. Another change was made in the batting order today. Schriver went to third base, Carney to right field and Moran caught.

One feature of the game was the way Minneapolis base ball players tackled the Des Moines aggregation again this afternoon, and the Prohibitionists have still another feather in their cap. They were again defeated by the Minneapolis players by the score of 20 to 13, in the presence of fully 1,500 enthusiastic admirers. Thirteen Inning Tie. LOUISVILLE, Ky., April 5.—Louisville, 8; Detroit, 8. Thirteen innings. Game called on account of darkness.

KNOCKOUT BLOW FATAL.

Factory Hands Indulge in a Deadly Prize Fight.

HAVERHILL, Mass., April 5.—Arthur Bradley and Richard Ingram, two factory hands, employed in this city, last night engaged in a prize fight, and the result was a fatal one. The fight was a very close one, and it was not until the twelfth round that the fatal blow was struck. The man named McIntosh was the second for Ingram, and a friend named Donovan seconded Bradley, while James Gilligan, a local sport, was timekeeper, and Thomas Gibney referee. The knockout blow was landed in the vein under the right jaw, after thirty minutes' fighting. All efforts to restore incipient consciousness failed, and he was carried to his brother's house, where he died at midnight.

A DIVING HORSE.

An Equine Lofly Tumbler Makes a Sensation in Seattle.

They have a strange attraction at one of the popular pleasure resorts in Seattle. A horse leaps thirty feet down into the deep water of Lake Washington and swims to the shore. Thousands of people congregate to witness the wonderful and amusing performance.

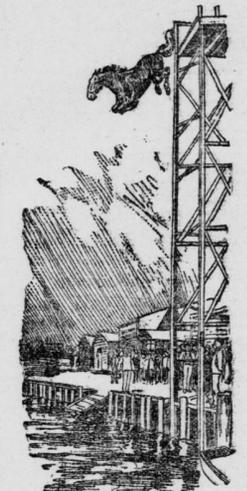

A big platform is constructed on the edge of the water, which is just wide enough for the horse and two men. As the horse ascends the platform he seems to be in his delight, and, standing at the top, he tosses his head around to look at the crowd with a very proud air, and one can almost

For Children's Skin CUTICURA SOAP

Purest and sweetest for toilet, bath, and nursery. For distressing facial eruptions, irritations of the scalp, dry, thin, and falling hair, red, rough hands, chafing, inflammation, and itchy baby rashes and blemishes, it is wonderful.

Imagine him saying in his egotism: "Look at me! I am the only horse in the world that can perform such a feat!" Every one holds his breath at the word "Go!" is said until he reaches the water.

THE HORSE DIVER MAKES HIS 80 FOOT LEAP.

Down, down he goes, and when he rises to the surface a cheer from the crowd goes up, and he at once begins to swim toward the shore, and as he reaches it he leaps up among the crowd, a glossy, black, beautiful animal. His master, who is waiting for him, grasps his bridle and immediately starts him off on a run and keeps him moving until he is thoroughly dry.

When the water is very cold, he often shows signs of weakening and needs a great deal of urging before he will make the leap. At such a time one cannot help but feel it is a cruel sport. The cold water somewhat bewilders him, and he does not seem to know in which

A NOVELTY IN BICYCLE HOSE.

direction he shall swim and often finds himself under the dock. At such times a man rows out in a boat and leads him to shore.

The National Capital. The City of Washington is an object of perennial interest to all patriotic Americans. Not alone because it is the great throbbing heart of the mightiest and grandest Republic the earth has ever known, but also on account of its material magnificence. All Americans take pride in its beautiful avenues, majestic architecture, stately homes and well-stored galleries and museums as things of grandeur and beauty in themselves, apart from the historic interest with which they are invested.

It is a hope and aspiration of all "young America" at least, at some time or other to visit the Capital of this country.

The Baltimore & Ohio R. R. offers unexcelled facilities in aid of this desire. All its through trains between New York, Philadelphia, Cincinnati, Baltimore on the east, and Pittsburgh, Cincinnati, St. Louis and Chicago on the west, pass through Washington. Its fast express trains are vestibuled from end to end and heated with steam. Pullman's latest and best productions in the way of sumptuous Drawing Room Sleeping Cars are attached to all its through trains.

The present management of the B. & O. has made vast improvements in the past two years, and the road is today one of the foremost passenger-carrying lines in the country. Through tickets via B. & O. R. R. can be procured at all principal ticket offices throughout the United States.

ON OLYMPIA'S FIELD

MODERN ATHLETES TODAY WILL STRIVE WHERE ANCIENTS WON RENOWN.

THE STADIUM RESTORED.

IN IT AMERICANS WILL CONTEST WITH GREEKS FOR SUPREMACY.

PRINCE UNVEILS A STATUE

To One Whose Generosity Rendered a Revival of the Games a Possibility.

ATHENS, April 5.—Tomorrow is the day set for the opening of the contests in the new Hellenic games, and today, as a preliminary ceremony, a statue was unveiled by the Crown Prince Constantine of Greece. M. Averof, the wealthy Greek, of Alexandria, who has alone contributed a million drachmas towards the expense of the restoration of the Stadium as nearly as possible to its original condition.

The games are to be under the direction of the Athenian Olympic games committee, of which the Crown Prince Constantine is the chairman. The United States contributes two teams to the competition, one from Princeton and one from the Boston Athletic association. The Boston Athletic club team is made up of Thomas E. Burke, who will be entered to compete at 100, 400 and 800 metres, which is practically 110, 440 and 880 yards. He has a record of 10-1-5 seconds for 100 yards, 23-2-5 seconds for 220, 33-2-5 seconds for 300, and 49 seconds for the quarter-mile.

Arthur Blake will be entered in the 1,000 and 1,500 metre runs, and also the twenty-five-mile run from Marathon to Athens. He has a mile indoor record of 4:29-4-5, made when he won the indoor championship of the N. E. A. A. U. C. two years ago. Elly H. Clark is a student at Harvard. His records are as follows: High jump, 5 feet 10-5-10 inches; putting sixteen-pound shot, 39 feet; broad jump, 21 feet 10 inches; 120-yard hurdles, 17-2-5 seconds, and throwing the hammer, 123 feet.

P. P. Curtis is the fourth member of the team. The Princeton team will be captained by Robert Garrett, who is entered for the shot-put, throwing the discus, broad jump and horizontal bar vault. Garrett put the shot 39 feet 6 inches at the indoor meet of the Boston A. A. this last winter.

A. C. Tyler will enter the pole vault competition. His record made in New York, May 25 last, was 11 feet, 2-3/4 inches, equal to that of O. T. Bucholz, of the University of Pennsylvania. F. A. Lane is entered for the 100 metres and a long 100-yard run, having done the dash in 10 seconds flat.

H. B. Jamison, who will compete in the 400-metre race, is the fourth man of the team. Jamison has a record of 53 seconds for the 400-yard dash. Following is the programme of the games:

Athletic Sports—Pole vault, 100, 400, 500 and 1,500 metres; hurdle race, 110 metres; running broad and high jumps; pole vault; putting the shot and throwing the discus; long distance run from Athens to Marathon, a distance of 42 kilometres. Gymnastic Sports—Individual exhibitions, exhibitions on the rings, parallel bars, horse leaping and team work. Fencing and Wrestling—Work with the foils, saber and swords; amateur, civil and military wrestling, Greek and Roman methods. Shooting—Shooting with army rifles, carbines and pistols. National Sports—Yachting, race for steam yachts over a 10-mile course; races for sailing vessels; rowing of one-oared skiffs, two and four-oared yaws, with outriggers; swimming, 100, 500 and 1,000 metres; game of water polo. Bicycling—Races for 2,000 and 10,000 metres and 100 kilometres; also a race for two hours. Athletic Games—Lawn tennis, single and double and cricket.

The weather is rainy today and there is some doubt felt whether the games will commence tomorrow.

LONDON, April 5.—A dispatch to the Times from Athens says that Premier M. Delanyanis and all of the ministers were present at the unveiling of the statue of M. Averof.

The Times also has a long letter from Athens describing the history of the present movement for the revival of the Hellenic games, which says: "The success of the festival is now assured. It has been wisely determined to avoid all needless expenditures on temporary decorations and not to attempt any fete on a large scale for the amusement of visitors. The Grecian finances are not in a condition for a lavish display. Of all the capitals of Europe, Athens least needs embellishment, which would only detract from the enjoyment of her unique charms."

An editorial in the Times highly approves of the movement, and regrets that Oxford and Cambridge are not better represented.

Costmakers Will Also Strike. CINCINNATI, O., April 5.—The strike of the clothing cutters' union has lasted two months without result. The Costmakers' Protective association today resolved to join the strike tomorrow unless the manufacturers recognize both unions. President Belcher, of the United Garment Workers of America, is still here. Both the manufacturers and cutters will now await the result of the costmakers' efforts to

ELOQUENT BISHOP O'GORMAN.

He Preaches the Easter Sermon at the Baltimore Cathedral.

BALTIMORE, Md., April 5.—The Easter sermon at the cathedral was preached by Rev. Thomas O'Gorman, D. D., bishop-elect of the diocese of Sioux Falls, S. D. Cardinal Gibbons was present. Taking the resurrection as his theme, Dr. O'Gorman said that criticism is powerless in the presence of the universal social fact of the recognition of the resurrection. He reviewed the early days of Christianity and martyrdom under the Roman yoke.

"This present Christian civilization," said he, "is the most cultured society that ever existed in the world, and it is an impregnable proof of the restoration of the faith, even as the great American republic, in all its power, evidences its founder's life and work in that it presents historical knowledge of the past."

The bishop-elect referred to Sir Isaac Newton, Dante, Michael Angelo and the great Gothic cathedral architects as having been those who were inspired by their belief in Christianity and the resurrection. The science of today utterly fails to disprove the history and resurrection of Christ. Luther was not a man of his time, but a man of the English people seeded from the true church, yet the followers of both movements cling to faith in Christ, a faith that must abide.

There are errors and divisions among the disciples of Jesus, but in love for Him there is unity, and this makes us hope that, sooner or later, all who have strayed from the fold will be brought back.

LOST HIS BRIDE BY A NOSE.

David Finkelstein Sues on Queer Grounds.

NEW YORK, April 5.—"Achoo," sneezed David Finkelstein. The wedding bonds were broken.

The wedding bonds were broken, the cause of all the trouble. Now there is legal difficulty. Early in February pretty Ida Eisenbroch, an English girl, married young Finkelstein, and she learned to love him. But a knowledge of his heart did not include inside information as to David's nose, which in truth had been supplied with a rubber stopper in place of the one nature had originally put there.

And so they were married two days ago, after a month's courtship. Finkelstein caught cold in his head, and his wife was waiting at the home of the bride's parents. Finkelstein held his sneeze as long as he could and then succumbed to the sneeze his nose fell to the floor.

His father-in-law saw the daughter had been deceived and promptly kicked Finkelstein out of the house. Finkelstein has since been in the hands of a physician, and now his wife has brought suit for the annulment of the marriage and Finkelstein has rejoined by suing his father-in-law for \$5,000.

HABITS OF THE SHAD.

Interesting Facts About Its Incoming From the Sea.

The shad spends part of its life at sea and part of it in fresh water. At the approach of the spawning season it comes in from the sea and seeks the fresh water streams to spawn; at the close of this season it goes to sea again, there to remain until the spawning season again returns. It is not known absolutely whether the shad remains in deep water in the ocean off the approach of the river, whence it came, or whether in winter it goes South into warmer waters, but it is commonly believed that when the shad returns from whatever point at sea it may to fresh water come, it returns to the river in the early part of the season with theroe much advanced. These may be simply individual cases of early maturity in shad belonging to the river. The shad, however, has been caught here in the bay as late as August, but generally the shad come in with theroe in the condition that might be expected in the fall. When they were going and when they were going to get there, and fishermen incline to think of the early shad with the advantage. It is one that from some cause, perhaps stress of weather, has overrun its river.

That the shad does not always seek its own river is plainly shown in the Pacific coast, where the shad is not native, but was introduced chiefly in the Sacramento river; but they have since been introduced to the coast as far north as Southern Alaska. There is, however, along the Pacific coast a cold current which the shad does not seek to pass; it is found in the bays and estuaries, and can be taken in the year round, and the national barrier that prevents its making an offing has doubtless led to its general movement along the coast.

Maple Leaf Route Speeds the Quickest

The Chicago Great Western Railway (Maple Leaf Route) makes by far the quickest time to and from Kansas City and points between. Regularly equipped express leaves at 7:30 daily. You going?

His Only Infirmity.

Manager—You claim, sir, to have every qualification of a first-class actor? Hamlet de Montmorency—Well, perhaps I might mention the fact that I am a slightly deaf—the result of so much applause, you know.

The hardy Norseman of old drank Beck Beer. It increased his strength and fearlessness. Ham's Beck Beer is a muscle maker. Telephone 955-3 for a case.

FINANCES IMPROVE

HENRY CLEWS VIEWS THE SITUATION MORE HOPEFULLY THAN FOR MONTHS.

RAILWAY EARNINGS INCREASE

FEELING IN WALL STREET BETTER—MONEY PLENTIFUL AND IN DEMAND.

RECONSTRUCTION OF THE N. P.

Considered Virtually an Accomplished Fact—No Sudden Activity Predicted.

NEW YORK, April 5.—In his weekly review of the financial conditions in Wall street, Henry Clews says:

As indicated last week, April opens with a better feeling in the Wall street market. The currency sent into the country for the usual April settlements is returning; and, as the banks now see nothing to prevent a steady and comparatively easy course of the money market until the fall crop movement sets in, there is more disposition to make time loans, and at rates satisfactory to the stock holders. A slight flurry has been caused by the close approach of the rates of foreign exchange to the point admitting of exports of gold; but that is a movement only natural to the season; and if it should cause some withdrawals of legal tenders from the banks to procure gold from the treasury, the present conditions of the reserves and the influx of money from the interior may be trusted to prevent any appreciable scarcity of loanable funds. The discount market may quite possibly exhibit some appearance of closeness for some weeks or even months to come; for, in certain industries, there is an overproduction and a carrying of large stocks of goods which induces caution towards paper coming from those specific sources. This, however, is by no means a general feature in relation to the mercantile paper; it rather concerns industrial than mercantile credits; and this feeling among the banks is perhaps interpreted for much more than it really means and, for that reason, may be expected to soon abate. So long, however, as it continues, it will be a factor favoring a preference to accept stock collateral and will therefore tend to keep down the rate in "call" money. To this extent, the prospect as to the supply of money for stock advances purposes is favorable, within the range of the next few months.

We cannot but repeat the opinion previously expressed in this column, that the feeling at present prevailing at this center is not a fair reflection of the tone of business in the country at large. For the moment, this city, as the chief center of industrial capital, has certain adverse circumstances to contend against; and although those conditions may act for prudence and caution, yet there is no reason to anticipate really serious consequences from a temporary contraction of credit. The former has been a condition of affairs expected to work out their own remedy through enforcing a better adjustment between demand and supply in certain industrial staples. The former has been a condition of affairs viewed with a discriminating judgment, but better for all parties. It leads to needless distrust when inferences against the whole business of the country are drawn from conditions which apply only in a restricted locality and to a few interests—though the interests may be important ones. Such misjudgments, however, cannot long prevail; and no serious mistake will be made if a favorable recovery from the exaggerated pessimism which just now prevails to some extent in this city.

Even pessimism, however, has its extensions; for it sometimes helps to compel desirable results not otherwise procurable. This sort of a remedial adjustment of the situation of stubborn obstacles to contentment of insolventcies among the railroads. The Northern Pacific reconstruction may now be regarded as a virtually accomplished fact. The settlement of the long-pending dispute between the government and the subsidized Pacific lines also appears to be in a fair way towards adjustment. These long-pending arrangements have long been a depressing effect upon railroad investments, not only in this country, but still more in Europe. They have also had the effect of keeping stagnant a large mass of securities which had previously been actively dealt in at the stock exchange; and this must be regarded as one of the chief causes of the protracted depression in the market for securities. The prospective improvement of the situation, in respect of these settlements may therefore be regarded as a hopeful feature in approaching conditions.

Taking a broad outlook on the questions and dislocations that have been so deeply unsettling confidence, we see on all sides the evidences of a steady and cautious approach towards a remedial adjustment. There is a more intelligent comprehension of the situation, its causes and its remedies, among the people at large than existed but a few months ago.

Mrs. Winslow's Soothing Syrup

Is an OLD and WELL-TRIED REMEDY, and for over FIFTY YEARS has been used by millions of mothers for their CHILDREN. It soothes the child, softens the gums, reduces inflammation, always all pain, cures wind colic, is very pleasant to the taste, and is the best remedy for diarrhoea. Sold by druggists everywhere at the price of TWENTY-FIVE CENTS A BOTTLE. Be sure and ask for MRS. WINSLOW'S SOOTHING SYRUP and take no other kind, as mothers will find it the Best Medicine to use during the teething period.

He Would Make the Boy, and the Boy Would Make the Man.

He does not believe in cold formality, or, at any rate, he didn't a short time ago; but, of course, his views may have changed, says the Chicago Post. He liked Bohemianism, he said, and even went so far as to inculcate a little of it into his boy. He wished the latter to regard him as a companion, rather than a father, and a disciplinarian, so he taught him to call him "Henry," instead of either "papa" or "father."

A TRUE BOHEMIAN.

For a time the plan seemed to work first-rate, but it is barely possible that he may regret it now. The boy was such an apt pupil that it only took him a very short time to master the theory of true Bohemianism, and he showed his proficiency a few nights ago. The father was in the parlor entertaining some visitors, and the boy was up stairs amusing himself by letting the water run into a stationary washstand. He put in the plug and turned on the water full head, expecting it to run out the escape pipe at the top of the basin, but the escape pipe had gone out of active business for some unknown reason, and before the boy realized that anything was wrong the water was running over onto a father and a disciplinarian, so he taught him to call him "Henry," instead of either "papa" or "father."

He would make the boy, and the boy would make the man. He does not believe in cold formality, or, at any rate, he didn't a short time ago; but, of course, his views may have changed, says the Chicago Post. He liked Bohemianism, he said, and even went so far as to inculcate a little of it into his boy. He wished the latter to regard him as a companion, rather than a father, and a disciplinarian, so he taught him to call him "Henry," instead of either "papa" or "father."

It's Treatment and Cure.

CONSUMPTION.

NATURE'S GREATEST REMEDY FOR AN IMPROVED CONDITION OF THE SYSTEM—KICKAPOO INDIAN SAGWA. USED FOR GENERATIONS BY THE INDIANS. THEIR ROBUST CONDITION A NEVER-FAILING ENDORSEMENT FOR THEIR WONDERFUL MEDICINE.

CONSUMPTION has been declared by the leading physicians of the day to be due largely to a condition of the system whereby it becomes impossible to obtain perfect nourishment from food. As soon as the system refuses to receive the necessary life-sustaining elements the patient begins to "lose flesh," and at the same time all of the life-giving organs of the body become weaker and weaker, and gradually failing to perform their natural functions, death is the result.

Sufferers from this most dreaded disease should experience any accompanying symptoms, such as a general feeling of lassitude, sallow complexion, decrease in weight, sleeplessness, night sweats, nervousness and susceptibility to colds, immediately take Kickapoo Indian Sagwa. This now famous medicine has been for centuries regularly used by the Indians. Their freedom from this, as well as all similar diseases, is ample proof of its great merits. When it is remembered that this is skillfully compounded of roots, barks, gums and herbs of the forest, and contains no poisonous ingredients whatever, it will be seen that no harm can possibly attend its use; and the rapid manner in which it accomplishes its wonderful results will prove to the sufferer that he has found at last that which will give to him a new lease of life.

Kickapoo Indian Sagwa accomplishes its good work by invigorating the stomach, purifying the blood and building up the entire system, so that the great organs of the body can perform their work in perfect harmony, and a speedy return to health in every instance will result. Kickapoo Indian Sagwa is for sale by all druggists at \$1 a bottle, or six bottles for \$5.

THE ELECTRIC SUCKER.

Account of a Wonderful Fish Found in the Nile.

In an article in Ueber Land und Meer on "Electrical Phenomena in the Animal World," Dr. Frolich tells about a sucker first found in the Nile and which was known to the ancient Egyptians as the "sucker thunder-god," being worshipped as such in a suckerkod temple in the city of the thunder-sucker, or Orryrynchos. The reason they called it "thunder-sucker" is that it was known to the English-speaking people as the electric cat (fish), to the Germans as the Zitterwelsch, or the shad-that-makes-one-tremble. It grows to a length of about a foot, of which the head and nose take up a quarter, and at the deepest part measures more than a quarter of its length.

Just why the modern scientific men did not know of this fish before a question a layman finds is hard to answer except that the sucker is a bottom fish. The old Egyptians probably learned of the animal after a Nile flood, when some philosopher was meditating over a mud puddle left by the receding water. He saw a funny fish struggling in the water, and, out of curiosity, he reached for the fish and touched it. There were any number of disciples of the philosopher hard by who probably saw the philosopher actually kill a horse of the Indian diel when he got hold of a galvanic battery. Thereafter the fish was worshipped, having a name which associated it with the "thunder-god of the skies," although the ancients knew nothing of electricity according to the learned of today.

A peculiar thing about the various electrical fish is that should one swim, even at a considerable distance from a human bath, the bath would know of its proximity by an electrical sensation, while many of them have batteries actually fit to kill a horse of contact. These fish are far ahead of the human battery in the matter of weapons, for they stun their prey at a great distance in the water.

British Recruits.

Nearly one-third (35,000 out of 100,000) of the men who wanted to enter the British army last year were rejected on account of defective eyesight, bad teeth or flat feet.

CHINESE BONDS IN DEMAND.

THEY AID IN STEADYING THE MONEY MARKET.

LONDON, April 5.—The fact of the Chinese loan being subscribed several times over caused a slight hardening of the money market. The fact that the Chinese government dividends will cause further easiness of the money market. The stock exchange has been closed since Thursday. Foreign securities were dull on the French market, but the Spanish and Italian were improved. Mines were very quiet. Charters were flat on the Atlantic rigging. Grand Trunks showed a smart decline, but recovered somewhat on Thursday. Americans were in fair request and show a general advance, ranging from 1/8 to 1/4.

MR. AND MRS. PAGET IN NEW YORK

Ex-Secretary Whitney Welcomes His Daughter and Son-in-Law.

NEW YORK, April 5.—Almeric Hugh Paget, son of Lord Alfred Paget, and his wife, who was Miss Pauline Whitney, have arrived from England on the steamer the Majestic. Their wedding, on Nov. 12, 1885, in St. Thomas' church, was the most brilliant social function of that year in this city. Ex-Secretary William C. Whitney was on the pier to meet his daughter and son-in-law, and the greetings were hearty.

Mr. Paget was bronzed and in the best of health, and his wife was as beautiful as ever. Mrs. Paget was delighted to see her father and son-in-law, and she was very glad to see her daughter and son-in-law. Mr. Paget was a member of the British army, and he was a very brave man. He was a very good officer, and he was a very good man. He was a very good man, and he was a very good officer. He was a very good man, and he was a very good officer.

It's Treatment and Cure.
