TEHERAN, May 1.-It is officially anhounced that the shah is dead. The assas-sin fired point blank at his heart. Quiet prevails here and no disorder is apprehended as a result of the murder.

Nazir-Ed-Din, shah of Persia, was born April 24, 1829, and succeeded to the throne on Sept. 10, 1848, on the death of his father. He was crowned at Teheran Oct. 20, 1848, and his valiahd, or heir apparent, is his old-est son, Muzaf Er Ed Din, who was born March 25, 1853, and who has four sons and

Immediately after the shah was shot he was carried to his carriage and conveyed to the palace in this city. There he was attended by Dr. Tholegan, his chief physician, and other physicians who were hastily sent for, but in spite of their combined efforts majesty expired soon after his arrival at the palace, or about 4 o'clock this after-

is said to be Sayyid, from Kerman, or from province of that name. It is believed that the murderer has accomplices. The heir apparent, Muzaf Er Ed Din, was immeadvised of the assassination of his father, and will leave Tabriz, where he was sojourning, for Teheran as soon as possible.

STILLWATER NEWS.

Greater Flood in the St. Croix Is Threatened.

The Inverness left yesterday with a halfraft of lumber for Keokuk, and a half-raft of raft of lumber for Keokuk, and a half-raft of logs for the Gem City Lumber company, Quincy. The R. J. Wheeler and bow boat left with a log raft for Burlington. The Cyclone will leave with a raft this morning.

A report gained credence here Thursday evening that the upper dam on lower Tamarack had gone out, but inquiry proved the rumor unfounded. Some days ago a heavy ice gorge lodged in the gate and when it went out carried some of the timbers with it, leavout carried some of the timbers with it, leaving an ugly hole in the gate, through which the water poured in torrents. A hastily constructed dam further up the stream pre-vented great damage, and by this time the

injured gate has been fully repaired. The amount of logs in the stream is estimated at 25,000,000 feet. The water in Lake St. Croix is rising rapid ly at this point, and if the rise continues the lake will soon reach the high point of two weeks ago. The upper country is flooded and chances are that the lake will go still higher

before it begins to recede.

BIG INSURGENT VICTORY.

A New Story of the Battle in Santiago de Cuba.

KEY WEST, Fla., May 1 .- A notable victory has been won by the insurgents, commanded by Gen. Garcia, in the province of Santiago de Cuba. Garcia's forces fell upon the Spanish column commanded by Gen. Munoz and almost annihilated it. The battle occurred near Sanda, on the banks of the river Cauto. Gen. Garcia was moving west with 1,500 men, intending to cross the river. Munoz, who was at Manzanillo, decided to prevent Garcia crossing. led 2,500 Spanish soldiers out of Manzanillo ordered gunboats to proceed up the river to co-operate. Garcia heard of Munoz's movements and effected a junction with the columns of Rabi and Roliabeus, thereby increasing the forces under his command to nearly 3,500. The Spaniards were taken by surprise and many of them rushed into the river and were drowned. The fire of the insurgents also did great execution. When the annihilation of Munoz's column seemed certain, the gunboats appeared and saved the remnants. Over 300 of Munoz's men were killed by insurgent bul-lets or drowned, and about 400 were wounded. The Spaniards retreated down the river to Manzanillo, protected by the gunboats. The insurgent loss was small. Gen. Garcia then crossed the Cauto, and is now proceeding west.

DULLNESS IN FINANCIAL WORLD

Has Taken the Place This Week o the Firmness and Activity of Last.

NEW, YORK, May 1 .- Bradstreet's will say: There is relatively less improvement in gen eral trade this week, the present partaking look ahead with confidence to the autumn and in such departments as agricultural implements, building materials and hardware there is reported a moderate revival in de mand. There is an unexpectedly small number of strikes at this season. In fron ar steel there are advances in prices for sp grades of pig fron, due to the output of Lake Superior ores, required for the production having been practically taken up by few interests. The so-called steel trust is reported extending its territory. Higher quotations are announced for cotton, coffee, petroleum and anthracite coal, while print cloths and lumber practically remain unchanged.

BULL MOVEMENT CHECKED.

Speculative Week Has Been One of Reaction.

NEW YORK, May 1.—Bradstreet's Financial Review will say: Dullness and reactionary tendencies have this week taken the place of tendencies have this week taken the place of more active trading and advancing prices. The influences which were responsible for the change were chiefly the check which events in the Transvaal have given to the bullish speculation at London and the advance of exchange rates here and the fear of gold exports it produced. Another circumstance of some weight was reported from the Northwest, indicating that the wheat acrease may be restricted and the tonnage of the age may be restricted and the tonnage of the age may be restricted and the tonnage of the age may be restricted and the tonnage of the age may be restricted and the tonnage of the age may be restricted and the tonnage of the age may be restricted and the tonnage of the age may be restricted and the tonnage of the age may be restricted and the tonnage of the age may be restricted and the tonnage of the age of a representative to Bothman on their arrival here Monday evening. London was not a large seller of our market and "Americans" were only slightly depressed by the news of the death sen-tence imposed on the leaders of the Johan-nesburg emute. The foreign quotations for our securities showed, indeed, tendency to appreciate when the communication of the sentence was announced, and the London market was released from the tension which they had created. The situation in exchange, resulting in the shipment of \$1,450,000 gold, was also provocative of speculative hesitation and had considerable effect in checking support and depriving the market of buying power so that the "street," on the whole, seemed inclined to await reaction, if not to work actively for it.

BUSINESS BETTER.

But Is Not Yet as Good as It Ought to Be.

NEW YORK, May 1.-R. G. Dun & Co.'s weekly review of trade will say: As the season advances there is more business, but advices indicate that, on the whole, the prevalent feeling is that the gain is less than there ent feeling is that the gain is less than there was reason to expect. While retail trade has been active enough to materially lessen stocks and obligations, and thus to prevent a great many threatened embarrassments, it has not yet brought much new business to mills or factories. Evidence of inadequate consumption appears in the fact that the general range of prices for commodities, farm and mine, as well as manufactured products, is nearly 1 per cent lower than it was April 1, and the lowest ever known, the decline since October, 1892, being 16.73. Large purchases of lake ore by the principal consumers, contracts securing control of low phosphorous ore, and low rail rates to Chicago for Connellsville coke, are the main features for Connellsville coke, are the main features in the iron industry, but the revival of demand is yet deferred. Higher prices for nails have caused active buying for the week, but large consumers decline to contract as yet for bars, and the rod combination has fallen through. Middlemen still sell steel billets at through. Middlemen still sell steel billets at \$19 at Pittsburg, against \$20 asked by the pool, but the stock available is said to be only \$0,000 tons. Structural prospects are good, but in other branches the demand is less active, and Bessemer pig is weak, at \$13 at Pittsburg. The anthracite coal concerns have advanced the price 25c per ton. Failures for the week have been 238 in the United States, against 231 last year, and 31 in Canada, against 24 last year. ada, against 24 last year.

Children Cry for Pitcher's Castoria. LOCAL STEAMSHIP AGENTS.

These Days. these days of anti-rate cutting associa tions the agents of transportation companies spend a good share of their time in getting evidence against their competitors in cases of violation of agreement. The recent decision of the supreme court in the interstate commerce law has remedied the situation among the railroads immediately, but the steamship lines still have to depend upon their own associations to maintain rates and prevent any crooked work. The steamship associations, however, are a little more severe in handling ecreant agents than were the railroad com-canies, and disqualification usually follows in

ases where a steamship agent is found guilty of sharp practices.

The steamship agents of the Twin Cities have kicked up a great disturbance in the steamship world during the past three months. The casual reader has no idea whatever of the fierce competition which exists among these local agents, and of the methods to which they will resort to get business by fair means or foul. A very interesting case in point oc-curred in Minneapelis this week, and will probably result in a lively scrap between rival companies in New York today. The evidence has been taken in the form of affidavits, and is already on its way to the steamship confer-ence, held in New York this week, for the purpose of securing the disqualification of the offending agent.

The case is but a fair sample of what is going on here all the time, and, in brief, it is

The Appleton, Minn., agent of the C. H. Bothman Steamship agency, of Minneapolis, issued an order on the local office last Monday for two round-trip tickets from Minne for two round-trip tickets from Minneapolis to Bremen, Germany, for the use of Mr. and Mrs. Adolphe Shulz, who were to present the order to Bothman on their arrival here Monday evening. They were met by a representative By a mere chance Mr. Shulz happened into Bothman's office, and a few questions exposed the deal. He had Bothman's order in his pockthe deal. He had Bothman's order in his pocket, and was furnished the passage originally desired, simply ignoring the tickets purchased at the rival agency. These documents, however, were taken into possession by Bothman at once, together with affidavits by Mr. and Mrs. Shulz for the principal part of the evidence, which is now on its way to the steamship conference. Both local agencies have wired their respective companies in New York to meet the travelers and see them. New York to meet the travelers and see the safely aboard their respective ships.

SMALL STRIKES IN THIS COUNTRY.

Chicago, Milwaukee and Toronto the Scene of Minor Troubles With Labor.

LONDON, May 1.-Advices from cities and towns throughout Europe show that while there have been socialist and labor meetings incident to May day, there has been little that the day would be characterized by widespread disturbance. There has been no disorder, except at Vienna and at Bilbao. In Vienna, all work was suspended and meetings were held, which adopted resolutions in favor of universal suffrage. In the afternoon enormous crowds proceeded to the Prater, where the cafes and restaurants were crammed full of people. The numbers were estimated at over 90,000 people. All was quiet till a dispute arose between some Bohemian workmen and the landlord of a restaurant. A fierce fight ensued with the mounted and foot police. Numbers of the people were seriously wounded and many of the police were badly injured. Troops were summ two squadrons of lancers, with drawn sabers, galloped to the Prater, followed by four battalions of infantry, who hastened to the scene at a double quick, with fixed bayonets. Intense excitement was caused by the rioting and by vague fears of a widespread outbreak Fifty arrests were made, and the ninety per sons injured were taken to the hospital. Order was restored in the city by 8 o'clock in the evening. At Bilbao, in Spain, 1,500 miners from the Gallerta and Arboleda districts struck and became riotous, so that the gendarmes were obliged to fire upon them.

RIOT AT CHATELET. BRUSSELS, May 1.—A May day riot oc-curred today at Chatelet, in the province of Hainault. Some 4,000 socialists came into collision with the police, who drew their swords and used them freely, but were compelled to retreat before the riotous mob. Several shots were fired, but no one was hit. Finally the gendarmes were summoned and they quelled the riot.

A congressman is a public servant in the | lated by the nerves, and when these vital tisfull sense of the word.

He is responsible to his constituents, to his party, to himself-the honorable office is full of hard, thankless work, and heavy responsibility. Congressman William W. Grout is grateful

to the friend who directed him to Paine's

Washington, D. C., Feb. 28, 1896.

I found relief in Paine's celery compound for insomnia. Its action on the circulation and digestion was also beneficial.

Very truly yours, William W. Grout. There is something wrong when one feels "tired all the time." It is contrary to every condition of good health. There ought to be no necessity of drum-ming into the ears of tired men and women who feel they are broken in health, and are every day losing in weight and strength, the

urgent need of taking Paine's celery com-pound, now 'tis spring, to restore their spent nerve force and purify their blood. Some of the earliest good results noticed from taking Paine's celery compound during spring remedy known today that never fails these spring days is a regularity of the bowels.

Physicians of every school have been from

the start urged to inquire into the formula of Paine's celery compound, that they might

satisfy themselves of its wonderful power of

making the sick well. Prof. Edward E. Phelps, M. D., LL. D., as soon as he pre-

sented Paine's celery compound to his fellow physicians, was always anxious to have the

invigorator tried in cases that had resisted

the usual methods of treatment, that he might prove the truth of every claim made

for his newly discovered formula for Paine's

Paine's celery compound cannot be judged by the standard of any ordinary medicine,

sarsaparilla or nerve tonic. It is a great modern, scientific discovery, singularly un-

like any remedial agent that has ever aimed to effect a similar purpose—to make people
