FLYERS FOR THE RACE TRACK.

SPORTS OF VARIOUS KINDS, TOO.

The Gun Club Tournament Will Attract a Crowd—Bicycle Day Has Some Good Events.

The State fair will not lack for diversions outside of features illustrative of the fertility of the soil in the golden Northwest.

The great pacer W. W. P., with a record of 2:05 1/4, has been engaged to pace against his world's wagon record of 2:08 1/2.

There will be numerous minor features, among them a Ferris wheel, sixty feet high, live animal exhibits, the great painting, "Cubly," the Animatograph, thrilling water contest by steam fire engines, brass band and jubilee concerts, etc.

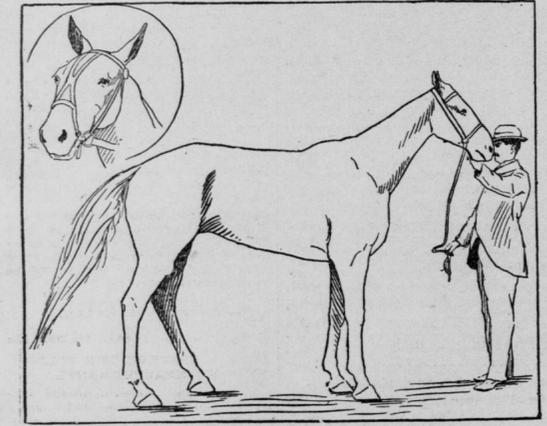

The fair proper is going to constitute a stupendous aggregation of the industrial and natural products of the new Northwest.

Minnesota is going to make a wonderful display of agricultural products, arranged by counties, so that the visitors may judge of the fertility and adaptability of certain sections of the state to various lines of agriculture.

In every department of the fair the largest number of entries for exhibits ever recorded is reported. Twenty-one herds of cattle, many from the foremost breeders of the country, are reported in the cattle department.

ST. PAUL WILL HAVE ONE. MIMIC RAILWAY COLLISION WILL BE SHOWN HERE.

If Emile Zola, the great French novelist, could be present Friday, Sept. 4, he would be enabled to see a realistic scene that would furnish him effects of an actual railroad collision from which the great man could write a story that would make an impression on the mind of the reader only equaled by Stevenson's great story of Jekyll and Hyde.

The company's business is to give real railroad disasters, not, however, endangering life. That a show of this kind is exciting and interesting is attested by the shrieks of fear by spectators when witnessing two immense iron horses, each weighing seventy-five tons, collide, running at a rate of fifty miles an hour.

The manner in which the engines are brought into actual contact is both soul-stirring and interesting. The regulation standard gauge will be laid, starting from the main track and extending a mile into a vacant lot.

In order to attain the sufficient speed the engines will be so placed that when the actual collision occurs there will be but little left to show what a terrible havoc is made by the coming together of the iron monsters.

The trains are to be complete in every detail, there will be the engineer standing on the engine, a brakeman standing on the top of the first car, a brakeman and conductor in the caboose.

So that there is not any danger attending the exhibition the management provides for the handling of the crowds by strong wire ropes stretched on each side of the track at a distance of 40 feet, thus providing against all contingencies for any possibility of spectators becoming over-enthusiastic, thereby getting in the way.

At the suggestion of a prominent railroad man of the city the engines will be named St. Paul and Minneapolis. Even at this early date many of the local people are making bets as to which engine will be on top after the collision.

Arrangements have been made with the Omaha railroad to run excursion trains to handle the crowds, and at a later date the exact time of leaving will be advertised.

Played the Old Lock Game. Gregory Schuler, of Hastings, visited St. Paul yesterday. He returned home last night with his stock of experience increased by his participation in the game.

Sons of Veterans Meeting. A state meeting of St. Paul camp, Sons of Veterans U. S. A., will be held tomorrow evening, Aug. 24. A number of recruits are expected to attend. That arrangements made for the encampment.

TO STATE FAIR EXHIBITORS.

Remember that the Minnesota State Fair this year is organized on the basis of a great EXPOSITION OF NORTHWESTERN RESOURCES;

that there are to be State Exhibits from Washington, Oregon, Idaho, Montana, North and South Dakota of natural and industrial products, accompanied by Commissioners from each State;

that Minnesota will have County exhibits from each of the leading agricultural Counties of the State, as well as large collective farm exhibits and miscellaneous agricultural displays.

Remember that, although new buildings are provided, space has been practically already all assigned, necessitating some exhibitors showing under tents.

Remember that but one week remains before the Fair, and that all displays must be in order Monday morning, August 31st; that Monday is the great Deere-Webber Co. Bicycle Day, when all cyclists coming to the ground on wheels will be admitted at half-price and children free.

Remember that there will be 200,000 people in the Twin Cities the week of August 31 to September 5, nearly all of whom, with others, will attend the State Fair, giving it the greatest attendance in the history of Minnesota State Fairs.

Get your displays in order and decorations finished by Saturday, if possible. This is to be the greatest Fair Minnesota has ever had. Make your preparations accordingly.

E. W. RANDALL, Secretary.
