

His Day Is About Over

and cooler times are at hand, for which every one with a memory of the torrid summer rejoices.

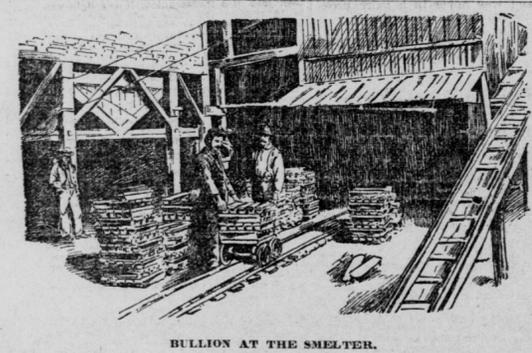

And Fall styles in clothing are ready, if you know where to look for them. Clothes, more clothes, you can find at almost any store; but there is only one best place where style is as much a consideration as the cloth itself.

BROWNING, KING & CO. Seventh and Robert Streets.

UTAH'S NEW GOLD CAMP THE JOHANNESBURG OF AMERICA AND ITS THREE GREAT GOLDEN BLANKETS.

(Copyrighted, 1896, by Frank G. Carpenter.) SALT LAKE CITY, Sept. 17.—The most wonderful of the new gold regions of the United States is now being developed within three hours' rail of Salt Lake city. It is only thirty miles away, as the crow flies, and its treasures have until now lain undisturbed within almost walking distance of one of the liveliest centers of the West.

one mine which has already produced more than \$1,000,000 worth of gold, and which has paid to its stockholders \$500,000 in dividends. Other mines have been opened which have gold ore in sight of an estimated value of more than \$10,000,000, and within the past eighteen months more than 2,500 mining claims have been taken up within its limits.

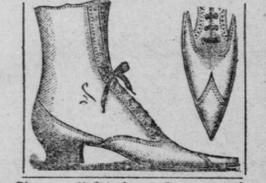

no paying means of getting out the gold. Marcus Daly reduced the ore to powder, and day after day panned and washed it looking for gold. At last he threw down his pan in disgust and said that the assayer was a fraud.

\$3 per ton, while in the Sunshine mine, about four miles away, the ore can be dug out and turned into gold for less than \$2 per ton. There are already five cyanide mills in operation in the district, and there are others in course of construction.

AMERICA'S JOHANNESBURG.

LOVERING SHOE CO. 306-388 Wabasha St., Opp. P. O.

City, and we may ride down the Utah valley, either over the Union Pacific or the Denver, Rio Grande & Western railroads to Fairfield, where we get the wonderful standard gauge which by many loops and winding turns, drags us up the mountains and lands us in the little nest in the hills where the mining town of Mercur lies. We are now a mile and a half above the sea, and surrounded by some of the most beautiful scenery of the United States. The mountains are as gray and silvery as the hills of Greece. The sage brush on their sides seems to be covered with frost, and the hills are dotted with flowers of all colors. Above us stretches a sky as blue as that of Italy, and all about us rise the great shafts of the working mines. In the heart of the town of Mercur, there is a street running along the one street which skirts the gulch. This street is filled with men, the most of whom have their pants in their boots and who wear no coats, their flannel

shirts being stuck into their trousers. At first you think they are lazy, but you soon learn that they are miners, and that the mines work day and night in eight-hour shifts, so that there are always men of duty waiting for their turn to work in their mines are to be seen on all sides.

with nearly every other piece of mining property in the eight-mile stretch which I have described. The upper blanket is not quite so thick nor is it so pure as the lower blanket. It is made up of a mass of small pieces of gold, and is not so valuable as the lower blanket. It is made up of a mass of small pieces of gold, and is not so valuable as the lower blanket.

to find the most economical and best methods for getting out the gold. The Mercur mine here, is run on business principles. No money is spared to cheapen the cost of production, and the cost is as low as possible. He is a convert to the idea in the Clifton house that the "No. 13" there is lucky instead of otherwise.

KILLING FROSTS. Present Cold Wave One of Exceptional Severity. WASHINGTON, Sept. 19.—The weather bureau has furnished the following bulletin to the press: A decided fall of 20 to 22 degrees in the past twenty-four hours has given the lowest temperatures ever reported in this decade in the Upper Missouri valley and in Duluth, Minn., and in the past twenty-four hours has given a fall of 24 degrees at Huron. Killing frosts were reported this morning at Miles City, Moorhead, Huron and Valentine, Neb.; heavy frosts at North Platte and Duluth; light frosts at St. Paul and Des Moines. It is probable that on Sunday morning this cold wave will give falling frosts, and as low, if not lower temperatures, than before noted in Lower Michigan, Indiana, Illinois, Missouri, Oklahoma and Indian territory, although the present temperature is quite high. Monday morning severe killing frosts will probably be experienced in Western New York, Western Pennsylvania, Ohio, Virginia, Kentucky, Arkansas and North Texas, and frosts in Tennessee and northern portions of Mississippi and Louisiana.

Special warnings have been sent to all those regions, and they have been widely distributed throughout the post-offices.

REVENUE COLLECTIONS. Receipts for August Were Over Eleven Millions. WASHINGTON, Sept. 19.—The monthly statement of collections of internal revenue issued today shows the total receipts for the month of August to have been \$11,627,074, as compared with \$12,162,885 during August, 1895. For the two months of the present fiscal year the receipts were \$48,224 in excess of the same period in 1895. The August receipts from the several sources of revenue, together with the increase of decrease in each as compared with the same month in 1895, are given as follows: Spirits, \$5,657,428; increase, \$21,657; Tobacco, \$2,375,655; decrease, \$399,248; Fermented liquors, \$2,425,562; decrease, \$220,228; Oleomargarine, \$60,253; decrease, \$24,094; Miscellaneous, \$18,167; decrease, \$13,860. For the month of July, 1896, as compared with July, 1895, the statement shows a loss of

REVENUE STANDS HIGH. Showing of the Banks Much More Satisfactory. NEW YORK, Sept. 19.—The Financial Review says this week: "The recovery of the New York banks now stands at the highest figure reported since Aug. 1 last. The interior movement has been very strong during this period, and even if the banks do not hold the cash that has come from abroad in their vaults, it has gone to other sections and is there performing an important work. The movement of crops has been so much earlier that it has created a legitimate demand for money, and as the future holds out a certainty of gold imports, the banks can use portions of the present surplus in a local way. The imports have opened a new source of supply, permanent for this season, at least, and there is no reason to anticipate a prolonged stringency. The banks are still taking out new circulation for temporary use and the total now is \$19,221,160, a figure higher than ever reported."

BEER OF COURSE

FRANK G. CARPENTER. "NO. 13" IS LUCKY ONCE MORE.

Bryan's Old Room at the Clifton Re-creates the Order of Things. CHICAGO, Sept. 19.—"No. 13" is the room William J. Bryan was occupying in the Clifton house when he was nominated for president. In spite of the unlucky number, this room is said to be a very lucky one to occupy, and

for membership stands in the center of the room on a raised dais on which falls a brilliant light. With the religio medica in one hand and an hour-glass in the other, the novice stands repeating the solemn words of the pledge. Her picture is draped in mourning and turned with its face toward the altar. It will be seen that the object of the S. P. H. D. society is purely humanitarian. The founders of the society are: Wm. J. Bryan, president; J. D. Chaney, secretary; Miss I. Fairfax, historian. The object of the members is best explained by an extract from the constitution: "We, the members of this association, believe it to be a crime against society and future generations for certain persons to marry."
