KEEN

Was the Vision of This Astronomer Who Discovered a Comet With His Naked Eye.

Prof. Lewis Swift, of Lowe observatory, Echo mountain, California, can boast of a feat which perhaps no other astronomer in the world has ever performed at all—he has discovered a comet by means of his unaided vision.

It is difficult for a person not versed in astronomical lore to really appreciate the marvelous achievement of seeing a comet with the naked eye. The first place, his runaway heavenly body is, as a rule, discovered before it possibly can reach a point near enough to the earth to be described by human vision. There are every day year in and year out, numberless telescopes with keen eyes at their lower ends and all looking heavenward. Thus it may be seen how very difficult it is for a comet to come within telescopic vision without being seen by some one.

In a letter to the writer Prof. Swift has the following to say concerning his unique discovery and the method thereof: "The comet that I have just seen without the aid of a telescope has not, so far as I have been able to learn, been seen by any other astronomer. I happened to see it was this. When one-third of the sun had set below the mountain, I noticed through the telescope a faint, irregularly shaped, luminous object about one degree above the sun's upper limb. It was at once apparent that the object could neither be a star nor planet, and I concluded that it was a comet.

"The conclusion that it was a comet was soon reached by me. Seizing an opera glass I hastily inspected the luminous object, and to my surprise it increased both in size and brightness. You must understand, to fully appreciate my surprise, that it is a very unusual thing to find a comet so near to the sun, and to witness all this without the aid of a pair of spectacles. The comet was still another surprise, however, for by its aid I discovered that there were two comets, one of which was in a position to become visible to me without a glass, and the second one, when the telescope was turned full upon it, seemed of unusual size and brightness.

"Within about five minutes I saw both the sun and the comets slowly sink from view behind a spur of the Sierra Madre mountains. The glasses I used in surveying the second comet were of the ordinary sort you see at the theater.

"Now that I was at the observatory engaged in my study of the heavens with my four-and-a-half-cent telescope, I swept around the sun to get, if possible, another view of the second comet. I had seen the previous day the sun's disk had half disappeared below the mountain peak, I detected what I faintly surmised to be the comet. Its appearance to me no brighter than when aided by the comet-seeker, than when I first looked at it with the naked eye.

"Now that the moon is away from the morning sky, I sincerely trust that either I or some other astronomer in the astronomical field will again see the two strange comets. I confess that I have been unable to get as much detail regarding the comet as I should have liked, for the fact that they were visible only in the daytime rendered my observations a very difficult task, and greatly retarded the results.

AN INVITATION.

It Gives Us Pleasure to Publish the following Announcement. All women suffering from any form of illness peculiar to their sex are requested to communicate promptly with Mrs. Pinkham, at Lynn, Mass. All letters are received, opened, read and answered by women only.

A woman can freely talk of her private illness to a woman; thus has been established the eternal confidence between Mrs. Pinkham and the women of America. This confidence has induced more than 100,000 women to write Mrs. Pinkham for advice during the last few months.

Think what a volume of experience she has to draw from! No physician living ever treated so many cases of female ills, and from this vast experience surely it is more than possible that she will help your case.

She is glad to have you write or call upon her. You will find her a woman full of sympathy, with a great desire to assist those who are sick. If her medicine is not what you need, she will frankly tell you so, and there are nine chances out of ten that she will tell you exactly what to do for relief.

She asks nothing in return except your good will, and her advice has relieved thousands.

Surely, any willing woman, rich or poor, is very foolish if she does not take advantage of this generous offer of assistance.

Never in the history of medicine has the demand for one particular remedy for female diseases equalled that attained by Lydia E. Pinkham's Vegetable Compound, and never in the history of Mrs. Pinkham's wonderful Compound has the demand for it been so great as it is today.

AMERICANS ARE GOOD MUSICIANS. Mme. Calve Declares They Are Superior to Other People.

"The Americans have, it seems to me," writes Mme. Calve in the Ladies' Home Journal, "in the field of music, all the characteristics of the conquering race. They are possessed of the most exquisite taste, which when properly cultivated and trained, are almost unrivaled; they have indomitable energy, perseverance and pluck; they are not deterred by no trouble, and prevented by no obstacle. Poverty, weariness, exertion, lack of work—none of these living conditions give them any concern. The average art worker has terrors for them. Their physique and their temperament seem made for toil and to surmount obstacles of every kind, and success which they are daily achieving, in the field of both operatic and concert art, is testimony to their natural fitness for accomplishment and to their ability to excel. They seem, in fact, to be most lavishly fitted by nature for the part which they are called upon to play. Their gifts of voice, energy, pluck and perseverance they frequently add a beauty of face and grace of form and movement to their talents. Music, to me, is the most important factors in the success of the singer's career. They have, too, the temperament which makes great artists and great comedians. Their artistic feeling which has for its standard perfection, and which is satisfied with nothing less.

"For the average singer America offers most excellent teachers; she can find all she needs at home," writes Mme. Calve in an article on "The Vocal Artist" in the Ladies' Home Journal. "Foreign training is practically necessary so long as impressors consider Europe their market and retired artists make it their home. Music, to me, is the most important factors in the success of the singer's career. They have, too, the temperament which makes great artists and great comedians. Their artistic feeling which has for its standard perfection, and which is satisfied with nothing less.

PROPOSALS FOR CITY LIGHTING.

Notice is hereby given that sealed proposals will be received at this office, Room 118, City of St. Paul, until 5 o'clock p. m. Dec. 1st, for a contract for lighting with gasolene certain streets and public grounds of the City of St. Paul according to the specifications herein attached.

The portions of the city to be lighted are streets and public grounds which have been lighted for the past year by the City of St. Paul, and the portions of the City of St. Paul which are to be lighted according to the terms of the contract mentioned.

The contract to be made will be entered into at the Court House as soon as the Commission of the City of St. Paul has received proposals received pursuant to this notice, and it will be made between the City of St. Paul and the successful bidder.

Proposals must state the price per lamp per month at which the bidder will furnish the necessary gasolene and all other material equal to a fourteen-candle power light in each street lamp herein mentioned, from sunset until dawn of each and every night during the term of said contract, including the lighting of all streets, boulevards, parks and squares, and furnishing the material thereof, and keeping them properly set and ready for use.

The proposals must also state the price per lamp per month at which the bidder will furnish the necessary gasolene and all other material equal to a fourteen-candle power light in each street lamp herein mentioned, on the moon schedule, requiring 100 lamps per lamp per month, according to the monthly schedule provided by the Commissioner of Public Works, during the term of said contract, including the lighting of all streets, boulevards, parks and squares, and furnishing the material thereof, and keeping them properly set and ready for use.

Proposals must also state the price each at which the bidder will furnish, sell to the city, and place in place the lamps herein mentioned, including the gasolene burners capable of producing a light equal to a 14-candle power light, to be used in lamps of the same capacity as the lamps now in use, and which may be ordered by the Commission of the City of St. Paul.

Proposals will also state what charge will be made for the use of each gasolene burner which may be ordered by the City of St. Paul, and which may be ordered by the Commission of the City of St. Paul, and which may be ordered by the Commission of the City of St. Paul.

It is understood that the bidder upon the coming in of the bid, reserves the right to accept or reject any or all of the lamps which may be ordered by the Commission of the City of St. Paul, and the same to be placed where ordered by the Commission of the City of St. Paul.

Proposals must state the price each at which the bidder will furnish, sell to the city, and place in place the lamps herein mentioned, including the gasolene burners capable of producing a light equal to a 14-candle power light, to be used in lamps of the same capacity as the lamps now in use, and which may be ordered by the Commission of the City of St. Paul.

Proposals will also state what charge will be made for the use of each gasolene burner which may be ordered by the City of St. Paul, and which may be ordered by the Commission of the City of St. Paul, and which may be ordered by the Commission of the City of St. Paul.

It is understood that the bidder upon the coming in of the bid, reserves the right to accept or reject any or all of the lamps which may be ordered by the Commission of the City of St. Paul, and the same to be placed where ordered by the Commission of the City of St. Paul.
