

MINNEAPOLIS DIED IN THE STREET

OFFICE 20 SOUTH FOURTH STREET.

G. G. Hartley, president of the Duluth street railway, was at the West hotel yesterday. Speaking of affairs in the Zenith city, he incidentally mentioned a number of conferences which met in Minneapolis Saturday and stated that the manufacturers of that article in Duluth were heavily aggrieved with the demand for the restoration of the \$2 cent.

Yesterday morning a man named John Smith, residing at 1231 Lyndale avenue north, fell on the sidewalk in front of 1481 Twentieth avenue north, and was severely injured. He was removed to his home in the North side patrol wagon.

Friday night watchman in Foutell Bros' furniture store, corner of First avenue south and Fifth street, discovered a small blaze in the boiler room at about 11 o'clock. An alarm was immediately turned in and the threatened danger averted by the prompt work of the extinguishers. The damage was comparatively small, resulting mostly from smoke which worked its way all through the building.

Harry F. Higgins, a reporter of the Times, met with a severe accident at his home, 826 Twentieth avenue, yesterday afternoon. While lighting the gas the match accidentally set fire to a lounge. In attempting to throw it out of the window the match fell on his leg, burning. While his injuries are not considered of a serious nature, they are very painful. He will be confined to his home for some days.

An autopsy was held yesterday on the remains of George B. Beck, a colored man, found dead in his room at 414 Second avenue south last Saturday. It was found that he had died of cholera morbus. There will be no inquest.

REVIVED THE NORSE TONGUE.

Sons of the Northland Do Honor to the Memory of Ivar Aasen.

The "Mindefest" held last evening at David Hall by the Norwegian society in honor of the late Norwegian grammarian, Ivar Aasen, was attended by several hundred people, who had gathered to their presence to do homage to the departed compiler of the Norwegian dictionary, and to the principal features of the programme were the memorial address by Prof. J. O. Breda, professor of Scandinavian literature at the university, and the production of Aasen's play "Arvingen."

Prof. Breda's address dealt with the life of Aasen, and the work accomplished by him in the Norwegian language through his efforts. Although the speaker did not sympathize with him in his efforts in the direction of changing the language of the country, still he considered the work of Aasen of infinite value to the literature of the country. It was a great means of bringing forth what was real Norwegian in the language.

For 400 years Norway had been a dominion of Denmark. During these four centuries the customs and language of the Danes had been forced upon the people, and the old Norwegian language had almost entirely disappeared. It was not until the late 18th century that the Danish language was introduced into the country. It was a great means of bringing forth what was real Norwegian in the language.

Prof. Breda did not believe that Aasen's cherished idea would ever materialize, but the agitation was continued by the Norwegian literature. The speaker spoke of the life and habits, his simplicity and the many characteristics that cling to the name. The festival closed with a rendition of the play "Arvingen" in the way, is a ridicule of the attempt of the country people to assimilate city habits and talk. The play was efficiently produced by members of "Främ."

Adorning the stage was a crayon painting of Ivar Aasen by Einar Oshlo, of Brooklyn, N. Y., presented to the society. It is from a photograph of Aasen taken two years ago. It is said that at the taking of this photograph the only thing that Aasen wore was a starched shirt and collar.

Canada Is Prosperous. W. G. McMahon, a prominent merchant of Winnipeg, was at the West hotel yesterday and went to Milwaukee last night. He was rather extreme in discussing the issues that have brought Manitoba before the religious world, contenting himself with a mere expression of opinion, and stating that he was not settled permanently. He stated that Canada was enjoying a period of prosperity, especially the western portion, which was due largely to the boom in mining. In this respect the prairie provinces, giving British Columbia a close chase. The mining has been a profitable business, and the river trade has been a profitable business. Mr. McMahon stated that one mine was sold very recently for \$1,500,000.

Missing Charles Lord Found. Charles H. Lord, whose mysterious disappearance was causing his family in this city considerable anxiety, has been heard from. A telegram was received yesterday by his wife from his brother in San Francisco stating that he had been found, but that he is at present very ill. He will be brought home at the earliest moment possible. Considerable relief was expressed by the family upon the breaking of the news, as they greatly feared that he would never be seen alive.

Made Another Change. Rev. Charles A. Reese, formerly pastor of Central Baptist church in this city, has resigned the pastorate of Lawrence, Mass., church to accept the position of financial secretary of the Newton Theological institution, which is the position which he held at that institution previous to his removal from this city. Mr. Reese will devote all of his time to raising necessary funds.

Junior Templars Entertained. Those delegates present in the city attending the sixth annual convention of the Junior Division of the Scandinavian branch of the Independent Order of Good Templars of a musical and literary character, which was held at the Eastern Star No. 29 in Burnham hall, Central Ave., last evening, including many residents of the city.

McKinley's At-Home Day. CANTON, O., Dec. 27.—President-elect McKinley spent the greater part of the day at his own home, receiving family information. This morning he attended his quarterly conference of the Presbyterian church, which was held at the residence of Mrs. Miss Duncan, of Cleveland, who took the sacrament with her husband. McKinley took a short drive and spent a part of the time allotted to this pastime to a visit to his mother.

Governor in the Orient. PARIS, Dec. 27.—M. Paul Daumer, formerly minister of finance, has been appointed governor of Indo-China.

ESTABLISHED, BUT IT IS EXPECTED THAT THE OFFICER WILL BE HONORABLY DISMISSED.

ON HIM VERY SHORTLY, IF HE HAS NOT BEEN WARNED AND LEFT THE CITY.

A new charge has been placed against the officer in the case of the Saturday afternoon the residence of H. Swartz, a watchman at 809 Morgan avenue north, was entered and considerable property was taken, including \$25 cash, a gold watch, two chains and an overcoat. The evidence is said to be conclusive as to Ross and Crane having turned the trick. The officer in question is a little girl named Peterson, who lives in that vicinity. She stated most positively yesterday that she saw the watchman and the other man in that part of the city, but that she had seen Ross leaving the house.

Both prisoners still maintain indifference, and have nothing to say in regard to the charges against them. It is thought, however, that Ross will weaken when he finds the evidence accumulating against him, and will tell of all the work done by Crane and himself, as well as reveal the identity of the third party.

Crane is no stranger to the police. He was arrested some time ago on a charge of grand larceny and sentenced to the reform school. He was released about three months ago on parole, and came immediately to this city, but shortly after disappeared. He returned about six weeks or two months ago and has been arrested several times since. The police are not at all surprised that he is in trouble again, as they have always been keeping an eye on his movements, expecting he would return to his old ways.

Decided lived near the end of Lyndale avenue, not far from Richfield, with his sister. He was between 65 and 70 years of age.

ROBBERY OF THE TROLLEY CAR.

DETECTIVES HAVE A PLAIN CASE AGAINST SUSPECTS.

Last evening Detectives Courtney and Morrissey succeeded in definitely concluding the case of burglary upon Ross and Crane. After a lengthy and careful search they succeeded in locating their room at 224 Hennepin avenue, where they found a small trunk containing a small clock, just as Ross appeared from the Swartz residence Saturday afternoon. When shown this Ross admitted that he had taken the article.

The officers further learned the right names. Crane's right name is Frank Frost, and that of Ross is Ross E. Ross. The officers also learned that they will be induced to break down and tell the officers of all the crimes they have committed, including the case of the trolley car.

Ross, or Budget, was sent to a reform school on a charge of burglary. He and a companion named Williams were in the trolley car when the robbery occurred. Williams had hidden the goods. He finally brought up in a vacant house in North Hennepin street, just as Ross appeared from the Swartz residence Saturday afternoon. When shown this Ross admitted that he had taken the article.

Both Ross and Williams were arrested. Ross was paroled, returning to the city a few weeks ago.

ARE SUSPICIOUS.

Certain Citizens Do Not Think Haney Will Talk.

Matters in regard to the investigation of alleged corruption in the city council have quieted down just at present. Exciting times are looked for, however, as soon as the grand jury convenes and again takes up the examination of witnesses.

Considerable comment has been made on the statement published yesterday that City Clerk Haney had agreed to return to the city as soon as he is able to travel, and appear before the grand jury, telling that body all that he knows in regard to the charges of bribery. Many think that the news is too good to be true, and look with suspicion on the statement, thinking that while he will undoubtedly return, as stated, and go before the grand jury, it is a great question if he will tell all that he knows in regard to this matter. Why he did it, it would be his own business.

It is his personal opinion that he will tell no more than is absolutely necessary to save his own back. The speaker spoke of the life and habits, his simplicity and the many characteristics that cling to the name. The festival closed with a rendition of the play "Arvingen" in the way, is a ridicule of the attempt of the country people to assimilate city habits and talk. The play was efficiently produced by members of "Främ."

Adorning the stage was a crayon painting of Ivar Aasen by Einar Oshlo, of Brooklyn, N. Y., presented to the society. It is from a photograph of Aasen taken two years ago. It is said that at the taking of this photograph the only thing that Aasen wore was a starched shirt and collar.

McKinley took a short drive and spent a part of the time allotted to this pastime to a visit to his mother.

MEMORIES OF AN EXTINCT RACE IN THE PACIFIC OCEAN.

DESERTED CHANNEL ISLANDS.

THOROUGHLY EXPLORED AT LAST BY PROF. CHARLES FREDERICK HOLDEN.

SAN NICOLAS' LONE WOMAN.

REMAINS THAT TELL OF AN INTERESTING TRIBE OF QUITE AESTHETIC TASTE.

The deserted Channel Islands of the Pacific, which lie some twenty miles off the southern coast of California, have at last undergone a thorough exploration by Prof. Charles Frederick Holden, with the result that much of absorbing interest regarding the extinct inhabitants of these lovely isles has been discovered. He visited San Nicolas, Santa Catalina and San Clemente and made many excavations and many rich finds.

Giants once lived in the exquisitely lovely Channel Islands, for many skeletons have been found there more than seven feet high. Tradition has it that the warlike tribes of the Aleutian Islands came down in boats more than a century ago and practically exterminated the Channel Islanders. Certain it is that most of the unhappy wretches met death by violence, for nearly all the skulls discovered are crushed by the blow from blunt instruments. The club is the weapon of the Aleutian savage, and this seems to fit the tradition.

A few escaped, and up to about thirty years ago the remnants of the tribe were still living on San Nicolas. In 1855 the Franciscans of the Santa Barbara mission, learning that there were but sixteen of the strange Indian race then living, determined to rescue them. They went over in a sloop and succeeded in doing so. The tribe was taken to the island of San Juan, where they were placed in a mission.

At the last moment an Indian woman returned for her child, and one of the frequent storms of the Channel Islands springing up, the sloop was driven away. It went on the rocks of Point Conception and all on board were lost. So only this woman was left, and she was left to her fate.

In 1851, however, Capt. George Nidever visited the island to hunt sea otter, and was amazed to find human footprints in the sand. Two years later he returned to investigate the matter, and succeeded in capturing the remaining Indian, now an old woman.

She was dressed in birdskins, and was engaged in making a shelter from a seal. They took her to Santa Barbara, where she lived for several years, and was known far and wide as "the lone woman of San Nicolas." But she never learned enough English to be able to tell anything of the life and the tradition of her strange race.

Holden in his exploration just concluded found many things that conclusively proved the existence of a race in San Nicolas, one 300 feet long by 50 wide, composed of abalone shells, which were brought from the sea two miles distant, thus showing evidence of a large population.

He found objects of stone, bone and shell piled in heaps. There were pendulous rings and curious objects in pearl among them, proving that the natives had some knowledge of pearl fishing. That they played games was shown by the finding of perforated and oval shells, and many small and peculiarly shaped implements. Some of the most remarkable were very high and narrow, others so heavy there was great difficulty in rolling them down to the shore. One showed evidence of ornamentation with abalone.

Sculptured forms of miniature sea life were found among them, and many proved a love of art and ornamentation. According to Prof. Holden the Islanders depended for food on abalone, the sea otter, seals and fish, and frequently they brought to an advanced period of the stone age.

San Clemente, twenty miles long and five wide, found many things that conclusively proved the existence of a race in San Clemente, one 300 years ago it had a large population. One square mile of the island was covered with abalone shells and ancient implements. Several mortars found there on Santa Catalina show an aesthetic taste among the natives, for they were decorated with mosaic of abalone. A sword handle was decorated with a plate made of abalone.

Prof. Holden declares that the islands were inhabited for many centuries, for he found heaps of abalone shells, and the remains of the natives, which he calculated required centuries for its formation. The islands have been a mine of archaeological treasure ever since they were first systematically explored, was made by Mr. W. G. W. Harford, subsequently exhibited to the valuable collection to admiring scientific friends in the East. Dr. W. H. Holmes, in his report on the expedition to the islands, made a valuable contribution to the study of the islands, and also secured some wonderfully interesting specimens of primitive implements.

What is Castoria?

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Opium, Morphine nor other Narcotic substance. It is a harmless substitute for Paregoric, Drops, Soothing Syrup, and Castor Oil. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria is the Children's Panacea—the Mother's Friend.
