NO DEMOCRATS THERE.

Aldermen Get Together to Arrange Their States.

The aldermen had a caucus in the private apartments of the janitor of the city hall last evening. Caucuses have been held in many strange places, but never in the dwelling portion of the municipal building of this city. Why it was held at the city hall council chamber or even in the grand jury's rooms at the new court house is merely a matter of conjecture.

Modern Guns.

Awful Force of an Eight-Inch Gun in the Chilean War.

In dwelling upon the wonderful power of modern guns Albert Matthews gives illustrations from the recent Chilean civil war, showing the effectiveness of the smaller sizes of breech-loading rifles.

Mr. Smithers—I say, landlady, this butter has a most peculiar odor.

Blessed Invention.

Science has invented a noiseless piano, and every dweller in a city will be delighted to hear more of it. This instrument is so constructed that it can be played in a room without any noise being heard outside.
