RIVER AT S. A. M. Gauge, Danger Height of Reading, Wind, Change.

THERE ARE CREDITORS AND CREDITORS. Our esteemed contemporary, the Moorhead News, which is always vigorous and interesting, approves the abhorrence with which the Globe regards the action of the European powers under the compulsion of Turkish bondholders.

man, if he be had, simply because it is his policy, although it may be in itself a wise one, than it is to accept some other policy, regardless of its merits, simply because he might not like it.

over a dam erected by the government at a cost of some \$600,000 for the sole benefit of a water power company whose revenues are derived from leases of the power thus created, this attitude of the Minneapolis paper is very much a platitude, with a dash of cant.

NO MORE JOBS LIKE THAT. A Minneapolis paper, discussing the paternalistic proposition of the Pioneer Press that the federal treasury bear the expense of erecting one big dam between here and Minneapolis, instead of two small ones, to provide a water power for the use of manufacturers, says, with an affectation of Democracy foreign to its nature, that the government is not in the habit of making public improvements for private benefit.

function, not by originating financial bills, but by taking those sent over by the house and building on the bare title their own structure, virtually assuming power to raise and spend money.

AS WE EXPECTED. We had no idea that the Minneapolis Journal would be able to answer in plain terms the plain question that we asked it, in view of its confident assertion that the Republican party would proceed to effect banking and currency reform "at the proper time."

NO HARMONY THERE. War On Among the Musicians Gathered at Kansas City. KANSAS CITY, Mo., May 9.—The Courier-Miller factionists of the musicians have adjourned since die in their capacity as the convention of the American Federation of Musicians but as the National League of Musicians they simply took a recess and remained to carry on the war Monday with the Greater Music Hall.

ATTENDANCE GOOD AND SHOWING STEADY INCREASE. NASHVILLE, Tenn., May 9.—The first seven days of the centennial exposition showed an attendance of 47,000 yesterday, the eighth day, more than surpassed all expectations; 26,000 admissions were registered during the day and night, several thousand more than attended on the opening day, making a total of 73,500 who have attended, although the government building is not open to visitors and the pictures in the department were not displayed. With continued good weather the coming week will show increased attendance, for as yet the attendance has been almost exclusively from the city of Nashville. Tomorrow begins a week of many meetings and assemblies at the exposition grounds, which will be well attended.

pay for two years, and in that period he was employed by a contractor and a hickory company which was doing business with the navy department. His pay from the government was \$2,000 and from the contractors \$2,500 a year.

UNCLE SAM TOO GENEROUS. ESPECIALLY WHERE THERE IS A STRONG PULL AT WORK. HERBERT PUT A STOP TO IT. But His Orders Have Since Been Revoked—Science at Government Expense.

AT THE THEATERS. A quantity of good singing, dancing and clever specialties rendered it unnecessary that "A Railroad Ticket," which opened at the Metropolitan last night, should have much that is new in the way of a plot.

GOVERNMENT AND SCIENCE. After the Schley expedition congress appropriated money for presents, which were taken by an officer of the navy across Siberia to be delivered to the persons who had been kind to Gen. Schley and his men during the hour of need, but with that the government washed its hands of polar expeditions, and the excursions of Peary have been made without any aid from Congress.
